**Cold, Clear, and Deadly** Melvin J. Visser, 2007 Understanding persistent organic pollutants POPs has occupied Melvin J Visser for over a decade Visser's quest to understand contamination in the far north led him to discover that developing countries continue to use POPs As polluted air travels around the globe it falls as rain into northern waters This fact complicated by trade agreements and a belief that without POPs developing countries would have no agriculture at all makes *Cold Clear and Deadly* must read for anyone concerned about the silent but deadly toxic chemicals in our food and water

Nature and Colonialism A Reader provides students with a collection of classic texts on environmental thought and invites

them to analyze the texts alongside the often contrarian ideas of expansion development and human exceptionalism Readers are encouraged to consider early perspectives on the hierarchical power relationships between political economic entities and nature peoples and whether foundational views of environmentalism supported the proliferation of colonial ideology The collection begins with a piece by Zitkala Sa a Dakota Sioux activist and writer and highlights a voice of resistance against the redefinition and reimagining of nature via colonialist thought Students read seminal works related to nature by Charles Darwin George Perkins Marsh Henry David Thoreau John Muir and Gifford Pinchot They are challenged to engage in sociocultural inquiry to better understand how views of the relationship between humans and nature have developed over time as well as how they continue to shape modern thought and perspectives regarding environmentalism Designed to stimulate critical thought and inquiry Nature and Colonialism is an ideal supplementary textbook for courses in environmental science or philosophy especially those with emphasis on the relationship between humans and their environment
