We live in a rapidly changing world, a world that seems to be increasingly inhospitable toward preaching. In the face of digital technology, social media, cultural pluralism, and pastoral burnout, how can Christian preachers proclaim the gospel faithfully and effectively? This book answers that question by bringing together a selection of important voices from across North America, Asia, and the Pacific. It argues that Spirit-empowered preaching is characterized by five attributes: it opens the Scriptures, engages the culture, addresses the listener, dissects the preacher, and elevates the Savior. With contributions from authors like William Willimon, Darrell Johnson, Lynne

Baab, Robert Smith Jr., and Paul Windsor, this is an excellent resource for ordained ministers, lay preachers, theological students, and anyone wrestling with the challenge of preaching God's word in a smartphone world. 25th anniversary of SMS standardization by the people who produced the standards, Short Message Service (SMS): The Creation of Personal Text Messaging, describes the development of the SMS standard and its ongoing evolution. The standardization of SMS started in February 1985 as a part of the creation of the second generation digital cellular system GSM, and the 25th anniversary of the first work on SMS provides an opportunity to review and understand how this service was developed. The book also looks to the future, as a large number of new GSM and evolved GSM phones will support SMS as a mass market high availability messaging service, a new simple Multimedia Messaging Service (MMS) suitable for use by everyone and for implementation in every new terminal is proposed. One of the only books which covers the complete SMS genesis from concept ideas to standardization of a first technical solution and its evolution to the present day. Describes the service concept including the limitation of the message length to 160 characters and explains the rationale behind the concept. Based on existing and newly retrieved documentation. Concludes that SMS has a long future since most future GSM phones will support SMS as the only messaging service, and so an SMS evolution is put forward. Click the "Buy Now" button at the top of this page and get your copy of *The Art of The Text Now!* SMS or Text is one of the most popular forms of messaging. Yet, despite its immense popularity, SMS has remained unexamined by science. Not only that, but the commercial organisations, who have been forced to offer SMS by a demanding public, have had very little idea why it has been successful. Indeed, they have, until very recently, planned to replace SMS with other messaging services such as MMS. This book is the first to bring together scientific studies into the values that 'texting' provides, examining both cultural variation in countries as different as the Philippines and Germany, as well as the differences between SMS and other communications channels like Instant Messaging and the traditional letter. It presents usability and design research which explores how SMS will evolve and what is likely to be the pattern of person-to-person messaging in the future. In short, *The Inside Text* is a fundamental resource for anyone interested in mobile communications at the start of the 21st Century. Everybody's been there, the touch of the send button at the wrong time, or the mix up in the contact list, and off she goes, the text message that could get you fired, or at the very least, embarrass you for all future. Texting today is part of our lives but every now and then things go wrong and a message reaches the wrong person. You may be drunk early in the morning,

feeling hot and excited at the office, or just plain stupid. Read these authentic and hilarious text messages and enjoy them for the embarrassment they've caused others, and keep this book as a reminder the next time you pick up your phone. You asked for it and now you've got it! Volume 2 of the extremely popular S#*t People Text series is *HERE* and it is serving up even more bigger laughs than its predecessor! So what is this series of books about you ask? Text messaging is the ultimate form of communication these days and you won't believe how some people abuse the privilege. But no worries, that's exactly why this book exists - to show you the gloriously hilarious things that can happen when modern technology meets modern (yet confounded) humans. Whether it's clueless parents who don't know how to use their smartphones (comedy gold!), or bored, yet clever teens who want to mess around with their friends, this book does not discriminate. If it is real, if it is bizarre, and most importantly, it s#*t-in-your-pants funny, then this book has it! Here are just some of the many gems you will find inside: Son: "Mom, stop, you are not funny. You can't make jokes." Mom: "But, I made you...?"

----- Girlfriend: "I hate you. I don't ever want to see you again." Boyfriend: "Thank god." Girlfriend: "Your an idiot." Boyfriend: "**You're" ----- Mom: "What does IDK, LY, & TTYL mean? Child: "I dont know, love you, talk to you later." Mom: "Okay, I'll ask your sister." So "treat-yo-self" to a good laugh, a good time,

and a brighter day right now! You deserve it! Parents take caution - this book contains humor that is NOT suitable for children.
