Command Of The Air General Giulio Douhet,2014-08-15 In the pantheon of air power spokesmen Giulio Douhet holds center stage His writings more often cited than perhaps actually read appear as excerpts and aphorisms in the writings of numerous other air power spokesmen advocates and critics Though a highly controversial figure the very controversy that surrounds him offers to us a testimonial of the value and depth of his work and the need for airmen today to become familiar with his thought The progressive development of air power to the point where today it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact in many ways the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision Douhet together with Hugh Boom Trenchard of Great Britain and William Billy Mitchell of the United States is justly recognized as one of the three great spokesmen of the early air power era This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book published in 1921 Readers may well find much that they disagree with in this book but also much that is of enduring value The vital necessity of Douhet s central vision that command of the air is all important in modern warfare has been proven throughout the history of wars in this century from the fighting over the Somme to the air war over Kuwait and Iraq

Introduction to Glass Science and Technology James E Shelby,2015-11-06 This book provides a concise and inexpensive introduction for an undergraduate course in glass science and technology The level of the book has deliberately been maintained at the introductory level to avoid confusion of the student by inclusion of more advanced material and is unique in that its text is limited to the amount suitable for a one term course for students in materials science ceramics or inorganic chemistry The contents cover the fundamental topics of importance in glass science and technology including glass formation crystallization phase separation and structure of glasses Additional chapters discuss the most important properties of glasses including discussion of physical optical electrical chemical and mechanical properties A final chapter provides an introduction to a number of methods used to form technical glasses including glass sheet bottles insulation fibre optical fibres and other common commercial products In addition the book contains discussion of the effects of phase separation and crystallization on the properties of glasses which is neglected in other texts Although intended primarily as a textbook *Introduction to Glass Science and Technology* will also be invaluable to the engineer or scientist who desires more knowledge regarding the formation properties and production of glass

A Life of Magic Chemistry George A. Olah,2000-12-29 The fascinating autobiographical reflections of Nobel Prize winner George Olah How did a young man who grew up in Hungary between the two World Wars go from cleaning rubble and moving pianos at the end of World War II in the Budapest Opera House to winning the Nobel Prize in Chemistry George Olah takes us on a remarkable journey from Budapest to Cleveland to Los Angeles with a stopover in Stockholm of course An innovative scientist George Olah is truly one of a kind whose amazing research into extremely strong acids and their new chemistry yielded what is now commonly known as superacidic magic acid chemistry A Life of Magic Chemistry is an intimate look at the many journeys that George Olah has traveled from his early research and teaching in Hungary to his move to North America where during his years in industry he continued his study of the elusive cations of carbon to his return to academia in Cleveland and finally his move to Los Angeles where he built the Loker Hydrocarbon Research Institute to find new solutions to the grave problem of the world s diminishing natural oil and gas resources and to mitigate global warming by recycling carbon dioxide into hydrocarbon fuels and products Professor Olah invites the reader to enjoy the story of his remarkable path marked by hard work imagination and never ending quests for discovery which eventually led to the Nobel Prize Intertwining his research and teaching with a unique personal writing style truly makes A Life of Magic Chemistry an engaging read His autobiography not only touches on his exhilarating life and pursuit for new chemistry but also reflects on the broader meaning of science in our perpetual search for understanding and knowledge
