An Outline of United States History (Classic Reprint) W. D. Struble, 2016-10-13 Excerpt from An Outline of United States History The old method of teaching history by assigning a certain number of pages in the text book to be memorized is we are glad to be able to say pretty generally a thing of the past having been discarded by all progressive educators The topical method has found favor because it is the method which develops the student's individuality and makes it possible for him to compare the views of different authors thus doing away with the difficulty some teachers experience from diversity of text books It is the best because it teaches the pupil to think and compare as well as to remember facts When carried to its full development the topical method becomes the outline method which combines with the advantages possessed by the topical method many which it does not possess About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Outlines of United States History J. N. Johnston, 19??

Outlines of United States History C. A. Woody, 2018-01-21 Excerpt from Outlines of United States History Exponential System This Outline of United States History is designed when in the hands of teachers to aid them in the assignment of lessons to suggest different ways of making the subject interesting to classes and to help them to a more extended knowledge of History Its arrangement makes it a valuable aid to the students of History in any grade It assigns the Topic for their study and where it was thought beneficial to the student forms of answers have been given but in no instance has the author attempted to study lessons for the pupils realizing that mental development is as much dependent on thought as physical growth on exercise We have endeavored to make this Outline complete without being technical The Normal Idea of Instruction has been ever in View in its preparation We detest the idea of assigning lessons by pages and ignore the practice of close adherence to text books No author can incorporate all in one common text upon History No author is wholly unbiased and without prejudice Then to get a full and accurate conception of facts we must search many works The Topic Method requires this It is the true Normal plan It makes bold and thoughtful students students in fact and not parrots and one idea pupils They soon learn to question one author until others confirm him The results of such research and questioning are ever the same industrious study hours live history classes and bold and accurate students The history hours for both study and recitation are always too short when the teacher is fully imbued with his subject and exercises fair judgment in the assignment of work About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Methods and Outlines in United States History J. A. Joseph,2015-06-16 Excerpt from Methods and Outlines in United States History If the present is the fruit of the past there is no more valuable study than history But the value depends so much upon the method of study and the means of presenting it It is impossible to secure a correct comparative value of any study for one teacher will make it of a much more or less value than another But studies do have an inherent value Arithmetic develops the mind in a certain way and has a certain purpose The same is true of geography or history The teacher ought first ask himself why do we study this subject or that one Where does it most naturally apply and how may it be best applied In teaching a subject then I would consider the two parts first value second methods or why first and how second About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
