Java Performance Tuning Jack Shirazi, 2003-01-21 Java application performance is tied pretty heavily to the underlying Java Virtual Machine and the new 1.4 version of Java has significant changes that mean previously used performance tips and strategies may no longer work. Significantly revised and expanded this second edition not only covers Java 1.4 but adds new coverage of JDBC, NIO, Servlets, EJB and JavaServer Pages Suitable for intermediate and advanced Java developers this text also covers JDBC, RMI, CORBA, Servlets, JavaServer Pages and custom tag libraries, XML, internationalization, JavaMail, Enterprise JavaBeans and performance tuning. It should be a useful resource for teaching how to create a tuning strategy, how to use profiling tools to understand a program's behaviour and how to avoid performance penalties from inefficient code making them more efficient and effective. The result is code that's robust, maintainable and fast.

The Consolidation of Democracy in East-Central Europe Karen Dawisha, Bruce Parrott, 1997-06-13 Edited by two of the world's leading analysts of post-communist politics this book brings together distinguished specialists on the Baltic states, Estonia, Latvia and Lithuania, Poland, the Czech Republic, Slovakia and Hungary. The authors analyse the patterns of post-communist democratization in these countries, paying particular attention to the process of party formation, electoral politics, the growth of civil society and the impact of economic reform on the emergence of interest groups. Karen Dawisha and Bruce Parrott provide theoretical and comparative chapters on post-communist political development across the region. This book will provide students and scholars with detailed analysis by leading authorities plus the latest research data on recent political and economic developments in each country.

The Electronics of Radio David Rutledge, 1999-08-13 This fascinating book provides a stimulating introduction to analog electronics by analysing the design and construction of a radio transceiver. Essential theoretical background is given along with carefully designed laboratory and homework exercises. The author begins with a thorough description of basic electronic components and simple circuits.

and goes on to describe the key elements of radio electronics including filters amplifiers oscillators mixers and antennas Laboratory exercises lead the reader through the design construction and testing of a popular radio transceiver the NorCal 40A A diskette containing the widely known circuit simulation software Puff is included in the book This was the first book to deal with elementary electronics in the context of radio It can be used as a textbook for introductory analog electronics courses for more advanced undergraduate classes on radio frequency electronics and will also be of great interest to electronics hobbyists and radio enthusiasts

Democratic Consolidation in Eastern Europe: Volume 1: Institutional Engineering Jan Zielonka,2001 This is the first volume in a series of books on democratic consolidation in Eastern Europe The series focuses on three major aspects of democratic consolidation in Eastern Europe institutional engineering transnational pressures and civil society This first volume analyses constraints on and opportunities of institutional engineering in Eastern Europe to what extent and how elites in Eastern Europe have been able to shape if not manipulate the politics of democratic consolidation through institutional means The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years The volume tries to avoid complex debates about definitions methods and the uses and misuses of comparative research Instead it tries to establish what has really happened in the region and which of the existing theories have proved helpful in explaining these developments The volume starts with a presentation of conceptual and comparative frameworks followed by in depth empirical analyses of the thirteen individual countries undergoing democratic consolidation The first conceptual and comparative part contains three chapters The first chapter explains what institutional engineering is about and describes our experiences with institutional engineering in former transitions to democracy It also focuses on the import and export of institutional designs The second chapter analyses the utility of constitutions in the process of democratic consolidation The third chapter compares constitutional designs and problems of implementation in Southern and Eastern Europe The empirical case studies deal with the following countries Estonia Latvia Lithuania Bulgaria Romania Ukraine Russia Belarus the Czech Republic Slovakia Slovenia Hungary and Poland And the conclusions evaluate the enormous impact of institutions on politics in Eastern Europe and show how central constitutional designs are to the institutional engineering in the societies undergoing transitions to democracy
