Handbook of Research on Digital Violence and Discrimination Studies Özsungur, Fahri, 2022-04-08 Digital violence continues to increase especially during times of crisis. Racism, bullying, ageism, sexism, child pornography, cybercrime, and digital tracking raise critical social and digital security issues that have lasting effects. Digital violence can cause children to be dragged into crime, create social isolation for the elderly, generate inter-communal conflicts, and increase cyber warfare. A closer study of digital violence and its effects is necessary to develop lasting solutions. *The Handbook of Research on Digital Violence and Discrimination Studies* introduces the current best practices, laboratory methods, policies, and protocols surrounding international digital violence and discrimination. Covering a range of topics such as abuse and harassment, this major reference work is ideal for researchers, academicians, policymakers, practitioners, professionals, instructors, and students.

Bloodthirsty Flynn Meaney, 2010-10-05 Some vampires are good. Some are evil. Some are faking it to get girls. Awkward and allergic to the sun, sixteen-year-old Finbar Frame never gets the girl. But when he notices that all the female students at his school are obsessed with a vampire romance novel called *Bloodthirsty*, Finbar decides to boldly go where no sane guy has gone before: he becomes a vampire minus the whole blood-sucking part. With his brooding nature and weirdly pale skin, it's surprisingly easy for Finbar to pretend to be paranormal. But when he meets the one girl who just might like him for who he really is, he discovers that his life as a pseudo-vampire is more complicated than he expected. This hilarious debut novel is for anyone who believes that sometimes even nice guys without sharp teeth or sparkly skin can get the girl. *The Science of Learning and Development* Pamela Cantor, David Osher, 2021-06-21 This essential text unpacks major transformations in the study of learning and human development and provides evidence for how science can inform innovation in the design of settings, policies, practice, and research to enhance the life path, opportunity, and prosperity of every child. The ideas presented provide researchers and educators with a rationale for focusing on the specific pathways and developmental patterns that may lead a specific child, with a specific family, school, and community, to prosper in school and in life. Expanding key published articles and expert commentary, the book explores a profound evolution in thinking that integrates findings from psychology with biology, through sociology, education, law, and history, with an emphasis on institutionalized inequities and disparate outcomes and how to address them. It points toward possible solutions through an understanding of and addressing the dynamic relations between a child and the contexts within which he or she lives, offering all researchers of human development and education a new way to understand and promote healthy development and learning for diverse specific youth, regardless of race, socioeconomic status, or history of adversity, challenge, or trauma. The book brings together scholars and practitioners from the biological, medical, social, and behavioral sciences, educational science, and fields of law and social and educational policy. It provides an invaluable and unique resource for understanding the bases and status of

the new science and presents a roadmap for progress that will frame progress for at least the next decade and perhaps beyond
