Curriculum Design and Praxis in Language Teaching presents a variety of methodologies and theoretical perspectives for current and future postsecondary instructors in the areas of linguistics, second-language acquisition, and world literatures. Offering valuable insights for instructors, the materials presented in this book integrate perspectives and resources from various target languages, world regions, and cultures into areas related to teaching and learning within the field of language. From critical assessments of the current academic curriculum to the fine-tuning of lesson planning, the essays in this collection address the innovative design and implementation of traditional, blended, and online language courses. Including inter-artistic approaches, case studies, and practical guides, this book provides theoretical and hands-on suggestions regarding how to mindfully reinforce students' socio-cultural engagement and linguistic development both inside and outside of their language-learning classrooms. The innovative ideas for language pedagogy presented in this book – including implementing technology, enhancing engaged spaces of learning, and adapting to the ever-changing field of pedagogy – represent agile ways of blending old and new approaches to carry forward into twenty-first-century postsecondary classrooms. Comprehensive Criminal Procedure, Fifth Edition is perfect for all introductory courses in criminal procedure law (including both investigation and adjudication courses, as well as comprehensive and survey courses). The casebook focuses primarily on constitutional criminal procedure law, but also covers relevant statutes and court rules. The casebook is deliberately challenging—it is designed for teachers who want to explore deeply not only the contemporary state of the law, but also its historical and theoretical foundations. The casebook incorporates a particular emphasis on empirical knowledge about the real-world impacts of law-in-action; the significance of race and class; the close relationship between criminal procedure law and substantive criminal law; the cold reality that hard choices sometimes must be made in a world of limited criminal justice resources; and, finally, the recognition that criminal procedure law always should strive to achieve both fairness to the accused and justice for society as a whole. New to the Fifth Edition: Cutting edge developments in caselaw, statutory material, and academic commentary An important reordering of certain areas of the Fourth Amendment and related materials that make them even more user-friendly Insightful examination of the turmoil in the modern Fourth Amendment cases as the Supreme Court, notably splintered over the appropriate methods of interpreting the Constitution, faces the implications of rapidly changing technology. The latest in case law, statutory material, and academic commentary about due process, the right to counsel, pretrial practice, guilty pleas, trial rights, sentencing, double jeopardy, and post-trial procedures Increased emphasis on the role of prosecutorial decision-making An updated treatment of the critical role of plea bargaining A new section on forfeitures and the Eighth Amendment Professors and students will benefit from: A rigorous and challenging criminal procedure casebook with careful presentation and editing A prestigious author team that incorporates the latest and most highly respected developments in legal scholarship in the field of criminal procedure law An appropriate balance of explanatory text and secondary material Thematic organization structured around important main themes Extensive revisions and updates A casebook that is the only criminal procedure casebook on the market today that enables students to understand the roots of the modern controversy over privacy and security in a digital age The District Attorney Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: legal terminology, documents and forms; criminal law and procedures; reading comprehension; preparing written material, including grammar and spelling; and more. The growing trend for high-quality computer science in school curricula has drawn recent attention in classrooms. With an increasingly information-based and global society, computer science education coupled with computational thinking has become an integral part of an experience for all students, given that these foundational concepts

and skills intersect cross-disciplinarily with a set of mental competencies that are relevant in their daily lives and work. While many agree that these concepts should be taught in schools, there are systematic inequities that exist to prevent students from accessing related computer science skills. The Handbook of Research on Equity in Computer Science in P-16 Education is a comprehensive reference book that highlights relevant issues, perspectives, and challenges in P-16 environments that relate to the inequities that students face in accessing computer science or computational thinking and examines methods for challenging these inequities in hopes of allowing all students equal opportunities for learning these skills. Additionally, it explores the challenges and policies that are created to limit access and thus reinforce systems of power and privilege. The chapters highlight issues, perspectives, and challenges faced in P-16 environments that include gender and racial imbalances, population of growing computer science teachers who are predominantly white and male, teacher preparation or lack of faculty expertise, professional development programs, and more. It is intended for teacher educators, K-12 teachers, high school counselors, college faculty in the computer science department, school administrators, curriculum and instructional designers, directors of teaching and learning centers, policymakers, researchers, and students. A teen's suspicious death, a shocking police cover-up and a mother's search for the truth. In 1990, on a November night that hit -28 degrees Celsius, seventeen-year-old Neil Stonechild disappeared only blocks from his mother's home. His frozen body was found three days later, eight kilometres from where he was last seen in downtown Saskatoon. The police investigation was cursory — no one seemed to wonder about the abrasions on his wrists or the scrapes on his face, or the fact that he was missing a shoe. Neil was drunk and out walking, the police believed, and had died by misadventure. His mother, Stella Bignell, tried her best to push for answers, but no one in authority wanted to listen to a native woman whose sons had often been in trouble with the law. But Stella did not give up, and neither did the only witness, sixteen-year-old Jason Roy, who had seen Neil, beaten and bleeding, in the back of a Saskatoon police cruiser the night he disappeared. Starlight Tour recounts their struggle for justice in the face of indifferent officials, destroyed police files and institutionalized racism. In the decade following Neil's death, rumours persisted that police sometimes drove natives beyond the edge of town and abandoned them. But it was only in January 2000, when two more men were found frozen to death, that the truth about Neil Stonechild's fate began to emerge. A third man, Darrell Night, survived his "starlight tour," and lived to tell the tale. And soon one of the country's most prominent aboriginal lawyers, Donald Worme, was on the case. With exclusive co-operation from the Stonechild family, Worme, and other key players, and information not yet revealed in the press coverage, Starlight Tour is an engrossing and damning portrait of rogue cops, racism, obstruction of justice and justice denied, not only to a boy and his mother but to the entire country's native community. Mastering the Law School Exam is designed to provide students with a knowledgeable, reasonable, and rational voice to navigate the intricacies of law school exams. This book is practical rather than theoretical where the emphasis is on providing the type of detailed examples necessary to show students precisely "how to do it" and "how to write it." By working with numerous illustrations in the context of substantive law, students learn to: Fill the gap between what the professor refers to as learning to "think like a lawyer" and the actual means for doing so. Create a successful path from note-taking to outlining to exam writing. Identify the basic skills that exams seek to test and the precise manner in which they are tested. Become familiar with the general types of law school exams through examples and detailed analyses of sample answers. Use the language of the law in the writing of issues, statements of the rule, and analysis of the facts. Draw appropriate inferences from the facts. Improve close reading skills as well as writing skills. Be pro-active by taking formative assessments in a variety of subject areas and formats. Simulate exam conditions by writing exams under timed conditions. Target assessments according to identified learning objectives. Self-assess by following detailed grading rubrics. Use formative assessment to improve learning through identified feedback mechanisms. Draw appropriate inferences from the facts. Organize their thoughts to write an organized analysis. Develop a facility with adapting the "IRAC" structure of legal analysis to answer multiple-choice questions, write essay answers, and address varying performance test tasks. 71870 BPP Learning Media's QLTT Study Manuals are the perfect companion for study towards the lawyers conversion test and are also ideal as generic law material or reference sources for accountants and business professionals from all disciplines. Like its predecessors, this Fifth Edition of The Practice of Research in Criminology and Criminal Justice (by Ronet Bachman and Russell K. Schutt) provides complete coverage of the use and results of the contemporary methods employed in criminology and criminal justice research today. Specifically designed for undergraduate and beginning graduate criminal justice courses and programs, this text teaches research design and techniques within the context of substantive criminology and criminal justice issues of interest to students who will become professionals in the field. Students learn about the wide realm of research methods available to them, delve deeper into topics relevant to their field of study, and benefit from the wide variety of exercises included in the text and on the student study website that help them practice as they learn. Essentials of Forensic Medicine and Toxicology, 1st Edition Provides medical and medicolegal information to lawyers in the practice of civil and criminal law and related fields. With case table. Provides templates and detailed instructions for writing the formats on the Multistate Performance Test (MPT) part of the bar exam. Contains twelve (12) actual MPT tasks, as released by the National Conference of Bar Examiners (NCBE) and used here with permission, in a variety of formats and a range of difficulty. Full sample answers for the MPT tasks and notes on analyzing all 12 tasks. Systems and checklists for managing time. Special tips for California bar candidates and for foreign-trained lawyers. This classic text, first published in 1990, is designed to introduce law students, law teachers, practitioners, and judges to the basic ideas of mathematical probability and statistics as they have been applied in the law. The third edition includes over twenty new sections, including the addition of timely topics, like New York City police stops, exonerations in death-sentence cases, projecting airline costs, and new material on various statistical techniques such as the randomized response survey technique, rare-events meta-analysis, competing risks, and negative binomial regression. The book consists of sections of exposition followed by real-world cases and case studies in which statistical data have played a role. The reader is asked to apply the theory to the facts, to calculate results (a hand calculator is sufficient), and to explore legal issues raised by quantitative findings. The authors' calculations and comments are given in the back of the book. As with previous editions, the cases and case studies reflect a broad variety of legal subjects, including antidiscrimination, mass torts, taxation, school finance, identification evidence, preventive detention, handwriting disputes, voting, environmental protection, antitrust, sampling for insurance audits, and the death penalty. A chapter on epidemiology was added in the second edition. In 1991, the first edition was selected by the University of Michigan Law Review as one of the important law books of the year. The Assistant Attorney Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: legal research; preparing written material; legal terminology, documents and forms; and more.
