Disease Control Priorities, Third Edition (Volume 2) Robert Black, Ramanan Laxminarayan, Marleen Temmerman, Neff Walker, 2016-04-11 The evaluation of reproductive maternal newborn and child health RMNCH by the Disease Control Priorities Third Edition DCP3 focuses on maternal conditions childhood illness and malnutrition Specifically the chapters address acute illness and undernutrition in children principally under age 5 It also covers maternal mortality morbidity stillbirth and influences to pregnancy and pre pregnancy Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood in particular the overlap and commonality with the child development volume The DCP3 evaluation of these conditions produced three key findings 1 There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy unsafe abortion nonsexually transmitted infections infertility and violence against women 2 Investments in the continuum of care can have significant returns for improved and equitable access health poverty and health systems 3 There is a large difference in how RMNCH conditions affect different income groups investments in RMNCH can lessen the disparity in terms of both health and financial risk

How Tobacco Smoke Causes Disease United States. Public Health Service. Office of the Surgeon General, 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies Mechanisms of disease are important because they may provide plausibility which is one of the guideline criteria for assessing evidence on causation This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke This evidence is relevant to understanding how smoking causes disease to identifying those who may be particularly susceptible and to assessing the potential risks of tobacco products

Biolog, 1998 *Application of Systematic Review Methods in an Overall Strategy for Evaluating Low-Dose Toxicity from Endocrine Active Chemicals* National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Endocrine-Related Low-Dose Toxicity, 2017-08-14 To safeguard public health the US Environmental Protection Agency EPA must keep abreast of new scientific information and emerging technologies so that it can apply them to regulatory decision making For decades the agency has dealt with questions about what animal testing data to use to make predictions about human health hazards how to perform dose response extrapolations how to identify and protect susceptible subpopulations and how to address uncertainties As alternatives to traditional toxicity testing have emerged the agency has been faced with additional questions about how to incorporate data from such tests into its chemical assessments and whether such tests can replace some traditional testing methods Endocrine

active chemicals EACs have raised concerns that traditional toxicity testing protocols might be inadequate to identify all potential hazards to human health because they have the ability to modulate normal hormone function and small alterations in hormone concentrations particularly during sensitive life stages can have lasting and significant effects To address concerns about potential human health effects from EACs at low doses this report develops a strategy to evaluate the evidence for such low dose effects

The Testis Henry G. Burger, David M. De Kretser, 1981 *Meiosis and Gametogenesis*, 1997-11-24 In spite of the fact that the process of meiosis is fundamental to inheritance surprisingly little is understood about how it actually occurs There has recently been a flurry of research activity in this area and this volume summarizes the advances coming from this work All authors are recognized and respected research scientists at the forefront of research in meiosis Of particular interest is the emphasis in this volume on meiosis in the context of gametogenesis in higher eukaryotic organisms backed up by chapters on meiotic mechanisms in other model organisms The focus is on modern molecular and cytological techniques and how these have elucidated fundamental mechanisms of meiosis Authors provide easy access to the literature for those who want to pursue topics in greater depth but reviews are comprehensive so that this book may become a standard reference Key Features Comprehensive reviews that taken together provide up to date coverage of a rapidly moving field Features new and unpublished information Integrates research in diverse organisms to present an overview of common threads in mechanisms of meiosis Includes thoughtful consideration of areas for future investigation

Emergency Response Guidebook U.S. Department of Transportation, 2013-06-03 Does the identification number 60 indicate a toxic substance or a flammable solid in the molten state at an elevated temperature Does the identification number 1035 indicate ethane or butane What is the difference between natural gas transmission pipelines and natural gas distribution pipelines If you came upon an overturned truck on the highway that was leaking would you be able to identify if it was hazardous and know what steps to take Questions like these and more are answered in the Emergency Response Guidebook Learn how to identify symbols for and vehicles carrying toxic flammable explosive radioactive or otherwise harmful substances and how to respond once an incident involving those substances has been identified Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them Keeping this guide around at all times will ensure that if you were to come upon a transportation situation involving hazardous substances or dangerous goods you will be able to help keep others and yourself out of danger With color coded pages for quick and easy reference this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials

Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States some populations suffer from far greater disparities in health than others Those disparities are caused not only by fundamental differences in

health status across segments of the population but also because of inequities in factors that impact health status so called determinants of health Only part of an individual s health status depends on his or her behavior and choice community wide problems like poverty unemployment poor education inadequate housing poor public transportation interpersonal violence and decaying neighborhoods also contribute to health inequities as well as the historic and ongoing interplay of structures policies and norms that shape lives When these factors are not optimal in a community it does not mean they are intractable such inequities can be mitigated by social policies that can shape health in powerful ways Communities in Action Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States This report focuses on what communities can do to promote health equity what actions are needed by the many and varied stakeholders that are part of communities or support them as well as the root causes and structural barriers that need to be overcome
