New Syllabus Additional Mathematics (NSAM) is a series of textbooks and workbooks designed to prepare students for the Singapore-Cambridge GCE O-level examination in Additional Mathematics. Together with the textbook, the workbook will provide students with ample practice to apply the various skills and concepts learnt to solving problems in both examination and reallife situations. The workbook contains the following features: REVISION NOTES Revision Notes are found at the start of each chapter. They emphasise the important concepts and formulae in the chapter. PRACTICE QUESTIONS Practice Questions provide students with a wide range of questions for further practice. The questions are classified into three levels of difficulty. • questions require students to use specific skills and concepts in the chapter directly to solve problems. • questions require students to apply their skills and concepts to solve problems. • questions require students to apply various skills and concepts, including the use of problem-solving skills, to solve problems. Revision Exercise The Revision Exercise is found after every few chapters to help students to recall and consolidate all the concepts learnt in these chapters. Mid-Year Specimen Papers and End-of-Year Specimen Papers The Mid-Year Specimen Papers and End-of-Year Specimen Papers have been written to follow closely to the format of school•s Mid-Year and End-of-Year examinations. It is hoped that when students use this book, to reinforce the concepts that they are weak in, they will eventually gain success in Additional Mathematics. Comprehensive student-friendly resources designed for teaching Cambridge International AS and A Level English Language (syllabus 9093). The core aim of this Coursebook is to help students to develop and apply the key skills they need to achieve in AS and A Level English Language. They will build the skills needed for assessment through frequent activities. Divided into two distinct parts for AS and A Level studies, the book covers a wide range of reading skills, such as understanding aspects of style, voice and tone. It also addresses the conventions of key kinds of writing and spoken language, from scripted speeches to travel articles, and looks at how they can capture these conventions in their own work. Through clear explanations, a large number of worked examples and many exercises, this textbook prepares students for the International Baccalaureate Mathematics Standard Level course. This book is aimed at everyone preparing for the ISTQB® Certified Tester – Foundation Level exam based on the Foundation Level syllabus (version 4.0) published in 2023. It provides candidates with reliable knowledge based on this document and thus distinguishes itself from all the information about ISTQB® syllabi and exams on the Internet, which is often of rather poor quality and may even contain serious errors. The book expands and details many issues that are described in the new 2023 version of the syllabus in a perfunctory or general way only.

According to the ISTQB® guidelines for syllabus-based training, an exercise must be provided for each learning objective at the K3 level, and a practical example must be provided for each objective at the K2 or K3 level. In order to satisfy these requirements, the authors prepared numerous exercises and examples for all learning objectives at these levels. In addition, for each learning objective, one or more sample exam questions are presented which are similar to those that the candidate will see in the exam. This makes the book an excellent aid for studying and preparing for the exam and verifying acquired knowledge. New QMaths is the only maths series for the new Queensland syllabus that offers two fully customised Year 10 texts to cater for individual differences. New QMaths 10B is fully customised to take advantage of the links between the Years 1 to 10 and the Mathematics B and C syllabuses. Students are given tasks at Levels 6 and 6+, with an emphasis on rigour and formality. Wherever possible, the authors have arranged the content of New QMaths 10A and New QMaths 10B in parallel. This extends to using the same headings for chapters and subsections, even though the actual contents diverge in terms of complexity. The intention is to promote flexibility in class arrangements and help teachers with their organisation or work programs. In larger schools, this will allow flexibility in the grouping of students, especially in the earlier part of Year 10. In smaller schools, it will permit individuals in a class to be working on similar topics for much of the time. New QMaths 10B Target Students: a Those who have demonstrated that they are close to Level 6 outcomes at the beginning of Year 10 a Students intending to proceed to Mathematics B or Mathematics B and Mathematics C on completion of Year 10. It provides complete coverage of outcomes for Level 6 and Beyond Level 6 Approach: a New QMaths 10B focuses on Levels 6 and 6+, with heavy emphasis on algebra to prepare students for Maths B and Maths C in Year 11 a There is greater exposure to mathematical rigour and formal methods, particularly in algebra and geometry, with the inclusion of topics such as the interpretation of various sets of real numbers, calculation of rates of change from graphs, and multistep problems a Students are given more opportunities to succeed at a higher level of modelling and problem solving a Topics such as area and volume are extended beyond what is appropriate for students working to attain Level 6 Exercises encourage students to track, trace or copy letters and text models to practise their handwriting skills. Words, sentences and stories in various text types are modelled, using foundation handwriting. Each workbook includes: a comprehensive teaching program, a slope card to help students maintain the required foundation slope, writing and spelling extension activities, a skills checklist for parents and teachers to assess students' progress in handwriting and for students to develop a sense of achievement as their handwriting skills improve. This new syllabus is designed for teachers and students who are interested in learning and understanding the connection between aerial and floor movements. It teaches not only aerial skills and tricks, but also how these elements can be seamlessly merged with dance movements on the ground. Our detailed "Step by step" floor & aerial exercises contain all the information required to effectively link movements into sequences: music, counts, starting position, space, tips, and outcomes. This book also provides a variety of support materials, including: descriptions of aerial rigging equipment, important instructions for safety and spotting, lesson examples with time management, and illustrations of essential aerial dance positions. It also contains a glossary of dance terminology. In its unique synthesis of yoga, ballet, contemporary dance, and circus, Aerial Dance for Dancers offers teachers and dancers inclusive access to the resources of this innovative, expressive movement style. A Taste for Brown Sugar boldly takes on representations of black women's sexuality in the porn industry. It is based on Mireille Miller-Young's extensive archival research and her interviews with dozens of women who have worked in the adult entertainment industry since the 1980s. The women share their thoughts about desire and eroticism, black women's sexuality and representation, and ambition and the need to make ends meet. Miller-Young documents their interventions into the complicated history of black women's sexuality, looking at individual choices, however small—a costume, a gesture, an improvised line—as small acts of resistance, of what she calls "illicit eroticism." Building on the work of other black feminist theorists, and contributing to the field of sex work studies, she seeks to expand discussion of black women's sexuality to include their eroticism and desires, as well as their participation and representation in the adult entertainment industry. Miller-Young wants the voices of black women sex workers heard, and the decisions they make, albeit often within material and industrial constraints, recognized as their own.
