Directions (Q. Nos. 15-17) Read the information carefully and answer the questions follow that.

A cricket tournament had three teams - India, Australia and Sri Lanka taking part in it. The format of the tournament was such that in the preliminary stage each of these teams, would play the other teams four times. Four points are awarded for a win and in case a team beats another team by a huge margin, it is given a bonus point in addition to the four points. At the end of the preliminary stage, the top two teams, in terms of the points scored, reaches the finals. No match in the tournament ends in a tie and if two teams end up with the same number of points at the end of the preliminary stage, the team with the better net run rate is placed higher.

Peter P. Marra, Chris Santella, 2016-09-20 Why our cats are a danger to species diversity and human health In 1894 a lighthouse keeper named David Lyall arrived on Stephens Island off New Zealand with a cat named Tibbles In just over a year the Stephens Island Wren a rare bird endemic to the island was rendered extinct Mounting scientific evidence confirms what many conservationists have suspected for some time that in the United States alone free ranging cats are killing birds and other animals by the billions Equally alarming are the little known but potentially devastating public health consequences of rabies and parasitic Toxoplasma passing from cats to humans at rising rates Cat Wars tells the story of the threats free ranging cats pose to biodiversity and public health throughout the world and sheds new light on the controversies surrounding the management of the explosion of these cat populations This compelling book traces the historical and cultural ties between humans and cats from early domestication to the current boom in pet ownership along the way accessibly explaining the science of extinction population modeling and feline diseases It charts the developments that have led to our present impasse from Stan Temple s breakthrough studies on cat predation in Wisconsin to cat eradication programs underway in Australia today It describes how a small but vocal minority of cat advocates has campaigned successfully for no action in much the same way that special interest groups have stymied attempts to curtail smoking and climate change Cat Wars paints a revealing picture of a complex global problem and proposes solutions that foresee a time when wildlife and humans are no longer vulnerable to the impacts of free ranging cats **The Coding**
