**Making Hard Decisions with DecisionTools** Robert Taylor Clemen, Terence Reilly, 2001 MAKING HARD DECISIONS WITH DECISIONTOOLS is a special version of Bob Clemen's best selling text MAKING HARD DECISIONS This straight forward book teaches the fundamental ideas of decision analysis without an overly technical explanation of the mathematics used in management science This new version incorporates and implements the powerful DecisionTools by Palisade Corporation the world's leading toolkit for risk and decision analysis At the end of each chapter topics are illustrated with step by step instructions for DecisionTools This new version makes the text more useful and relevant to students to business and engineering

**Tools and Modes of Representation in the Laboratory Sciences** U. Klein, 2001-10-31 Fourteen chapters provide insights into the efforts of 19th and 20th century scientists to construct working representations of invisible objects such as the structural formula of a dye a three dimensional model of a protein or a table conveying relationships between chemical elements The essays focus on scientists pragmatic use of representation exploring the concrete ways that scientists implement sign systems as productive tools both to achieve and to shape their organizational goals Editor Klein is associated with the Max Planck Institute for the History of Science Berlin Annotation copyrighted by Book News Inc Portland OR

**Clinician's Guide To Neuropsychological Assessment** Rodney D. Vanderploeg, 2014-04-04 Neuropsychological assessment is a difficult and complicated process Often experienced clinicians as well as trainees and students gloss over fundamental problems or fail to consider potential sources of error Since formal test data on the surface appear unambiguous and objective they may fall into the habit of overemphasizing tests and their scores and underemphasizing all the factors that affect the validity reliability and interpretability of test data But interpretation is far from straightforward and a pragmatic application of assessment results requires attention to a multitude of issues This long awaited updated and greatly expanded second edition of the Clinician's Guide to Neuropsychological Assessment like the first focuses on the clinical practice of neuropsychology Orienting readers to the entire multitude of issues it guides them step by step through evaluation and helps them avoid common misconceptions mistakes and methodological pitfalls It is divided into three sections fundamental elements of the assessment process special issues settings and populations and new approaches and methodologies The authors all of whom are actively engaged in the clinical practice of neuropsychological assessment as well as in teaching and research do an outstanding job of integrating the academic and the practical The Clinician's Guide to Neuropsychological Assessment Second Edition will be welcomed as a text for graduate courses but also as an invaluable hands on handbook for interns postdoctoral fellows and experienced neuropsychologists alike No other book offers its combination of breadth across batteries and approaches depth and practicality

**Reading Law** Antonin Scalia,Bryan A. Garner,2012 In this groundbreaking book Scalia and Garner systematically explain all the most important principles of constitutional statutory and contractual interpretation in an engaging and informative style with hundreds of illustrations from actual cases Is a burrito a sandwich Is a corporation entitled to personal privacy If you trade a gun for drugs are you using a gun in a drug transaction The authors grapple with these and dozens of equally curious questions while explaining the most principled lucid and reliable techniques for deriving meaning from authoritative texts Meanwhile the book takes up some of the most controversial issues in modern jurisprudence What exactly is textualism Why is strict construction a bad thing What is the true doctrine of originalism And which is more important the spirit of the law or the letter The authors write with a well argued point of view that is definitive yet nuanced straightforward yet sophisticated

**The Perception of the Environment** Tim Ingold,2021-11-29 In this work Tim Ingold offers a persuasive new approach to understanding how human beings perceive their surroundings He argues that what we are used to calling cultural variation consists in the first place of variations in skill Neither innate nor acquired skills are grown incorporated into the human organism through practice and training in an environment They are thus as much biological as cultural To account for the generation of skills we have therefore to understand the dynamics of development And this in turn calls for an ecological approach that situates practitioners in the context of an active engagement with the constituents of their surroundings The twenty three essays comprising this book focus in turn on the procurement of livelihood on what it means to dwell and on the nature of skill weaving together approaches from social anthropology ecological psychology developmental biology and phenomenology in a way that has never been attempted before The book is set to revolutionise the way we think about what is biological and cultural in humans about evolution and history and indeed about what it means for human beings at once organisms and persons to inhabit an environment The Perception of the Environment will be essential reading not only for anthropologists but also for biologists psychologists archaeologists geographers and philosophers This edition includes a new Preface by the author

Being Alive Tim Ingold,2011-04-19 Anthropology is a disciplined inquiry into the conditions and potentials of human life Generations of theorists however have expunged life from their accounts treating it as the mere output of patterns codes structures or systems variously defined as genetic or cultural natural or social Building on his classic work *The Perception of the Environment* Tim Ingold sets out to restore life to where it should belong at the heart of anthropological concern *Being Alive* ranges over such themes as the vitality of materials what it means to make things the perception and formation of the ground the mingling of earth and sky in the weather world the experiences of light sound and feeling the role of storytelling in the integration of knowledge and the potential of drawing to unite observation and description Our humanity Ingold argues does not come ready made but is continually fashioned in our movements along ways of life Starting from the idea of life as a process of wayfaring Ingold presents a radically new understanding of movement knowledge and description as dimensions not just of being in the world but of being alive to what is going on there
