Russia's Chechen Wars 1994-2000 Olga Oliker, 2001-09-28 An examination of the difficulties faced by the Russian military in planning and carrying out urban operations in Chechnya Russian and rebel military forces fought to control the Chechen city of Grozny in the winters of 1994 1995 and 1999 2000 as well as clashing in smaller towns and villages The author examines both Russian and rebel tactics and operations in those battles focusing on how and why the combatants' approaches changed over time The study concludes that while the Russian military was able to significantly improve its ability to carry out a number of key tasks in the five year interval between the wars other important missions particularly in the urban realm were ignored largely in the belief that the urban mission could be avoided This conscious decision not to prepare for a most stressful battlefield met with devastating results a lesson the United States would be well served to study

Confessions of the Pricing Man Hermann Simon,2015-10-20 The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer In all walks of life we constantly make decisions about whether something is worth our money or our time or try to convince others to part with their money or their time Price is the place where value and money meet From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store price is the most powerful and pervasive economic force in our day to day lives and one of the least understood The recipe for successful pricing often sounds like an exotic cocktail with equal parts psychology economics strategy tools and incentives stirred up together usually with just enough math to sour the taste That leads managers to water down the drink with hunches and rules of thumb or leave out the parts with which they don't feel comfortable While this makes for a sweeter drink it often lacks the punch to have an impact on the

customer or on the business It doesn't have to be that way though as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes A world renowned speaker on pricing and a trusted advisor to Fortune 500 executives Simon's lifelong journey has taken him from rural farmers markets to a distinguished academic career to a long second career as an entrepreneur and management consultant to companies large and small throughout the world Along the way he has learned from Nobel Prize winners and leading management gurus and helped countless managers and executives use pricing as a way to create new markets grow their businesses and gain a sustained competitive advantage He also learned some tough personal lessons about value how people perceive it and how people profit from it In this engaging and practical narrative Simon leaves nothing out of the pricing cocktail but still makes it go down smoothly and leaves you wanting to learn more and do more as a consumer or as a business person You will never look at pricing the same way again **ITworld International** ,2007 **Brand Relevance** David A. Aaker,2011-01-25 Branding guru Aaker shows how to eliminate the competition and become the lead brand in your market This ground breaking book defines the concept of brand relevance using dozens of case studies Prius Whole Foods Westin iPad and more and explains how brand relevance drives market dynamics which generates opportunities for your brand and threats for the competition Aaker reveals how these companies have made other brands in their categories irrelevant Key points When managing a new category of product treat it as if it were a brand By failing to produce what customers want or losing momentum and visibility your brand becomes irrelevant and create barriers to competitors by supporting innovation at every level of the organization Using dozens of case studies shows how to create or dominate new categories or subcategories making competitors irrelevant Shows how to manage the new category or subcategory as if it were a brand and how to create barriers to competitors Describes the threat of becoming irrelevant by failing to make what customer are buying or losing energy David Aaker the author of four brand books has been called the father of branding This book offers insight for creating and or owning a new business arena Instead of being the best the goal is to be the only brand around making competitors irrelevant **Autocar** ,2005
