The comprehensive coverage offers an accessible bridge between disciplines for students and practitioners in the fields of human resource management information systems and strategic management. Chapters on intellectual capital and the philosophy of knowledge demonstrate the breadth of coverage from the evolution of the subject area to the leading edge of contemporary research. Learning outcomes, exercises, and questions for further thought stimulate the reader and encourage them to reflect on their learning. This is an excellent book which manages to combine a consideration of the philosophy of knowledge with the practical discussion of what it means to manage knowledge in an organisational context. The book integrates many disparate strands from the literature and in doing so provides a comprehensive and coherent coverage of this emerging area.
