**Research Interviewing** Elliot George MISHLER, Elliot George Mishler, 2009-06-30 Interviews hold a prominent place among the various research methods in the social and behavioral sciences This book presents a powerful critique of current views and techniques and proposes a new approach to interviewing At the heart of Mishler's argument is the notion that an interview is a type of discourse a speech event it is a joint product shaped and organized by asking and answering questions This view may seem self evident yet it does not guide most interview research In the mainstream tradition the discourse is suppressed Questions and answers are regarded as analogues to stimuli and responses rather than as forms of speech questions and the interviewer's behavior are standardized so that all respondents will receive the same stimulus respondents social and personal contexts of meaning are ignored While many researchers now recognize that context must be taken into account the question of how to do so effectively has not been resolved This important book illustrates how to implement practical alternatives to standard interviewing methods Drawing on current work in sociolinguistics as well as on his own extensive experience conducting interviews Mishler shows how interviews can be analyzed and interpreted as narrative accounts He places interviewing in a sociocultural context and examines the effects on respondents of different types of interviewing practice The respondents themselves he believes should be granted a more extensive role as participants and collaborators in the research process The book is an elegant work of synthesis clearly and persuasively written and supported by concrete examples of both standard interviewing and alternative methods It will be of interest to both scholars and clinicians in all the various fields for which the interview is an essential tool

**The Active Interview** James A. Holstein, Jaber F. Gubrium, 1995-04-20 The book provides an academic basis for discussion and development of active interviewing methods. The ideas raised will be interesting and valuable to those involved in developing new methodologies in qualitative research and interviewing. Helen Masey in Social Research Association News: The interpretive turn in social science has taken the interview and turned it upside down. Once thought to be the pipeline through which information was transmitted from a passive subject to an omniscient researcher, the new active interview considers the interviewer and interviewee as equal partners in constructing meaning around an interview event. This changes everything from the way of conceiving a sample to the ways in which the interview may be conducted and the results analyzed. In this brief volume, James A. Holstein and Jaber F. Gubrium outline the differences between the active interview and the traditional interview and give novice researchers clear guidance on conducting an interview that is the rich product of both parties. Students and professionals who use qualitative methods in the fields of sociology, anthropology, communication, psychology, education, social work, gerontology, and management will find *The Active Interview* to be a helpful and cogent guidebook.

The book concludes with practical advice and perspectives from experienced researchers who use interviews as a method of data generation.
