Gibbs, 2015-11-17 This fascinating book analyzes 13 control failures in human history from Robespierre's promotion of the French Revolution to Hoover's efforts to stop the Great Depression to the intelligence failures of 9/11 Assessing the causes of 10 additional historical cases the author's comparative analysis shows how each leadership failure was caused by an expansion of the range of control attempts their scope and or their diversity A leader's or other actor's attempts to broaden the range of control targets have been most important in causing great human failures The analysis is timely during an era when war global warming and other vexing problems plague our society Botany James D. Mauseth, 2003 Botany An Introduction to Plant Biology Third Edition provides an updated thorough overview of the fundamentals of botany The topics and chapters are organized in a sequence that is easy to follow beginning with the most familiar structure and proceeding to the less familiar metabolism then finishing with those topics that are probably the least familiar to most beginning students genetics evolution the diversity of organisms and ecology
