Introduction to Aviation Insurance and Risk Management Nov 26 2023 The third edition of Introduction to Aviation Insurance and Risk Management has provided the opportunity to improve the book and extend its life into the 21st Century. Old material has been deleted and newer, more timely material added. Unlike the previous editions, a number of industry professionals have contributed to the new version. Despite these changes the primary purpose of the book remains the same - to introduce the basic principles of insurance and risk with their special application to the aviation industry. It has been designed for several similar, yet distinct audiences: the college student, corporate pilots or fixed base operators, and individuals in the insurance business.

Insuring the Air Transport Industry Against Aviation War and Terrorism Risks and Allied Perils Oct 14 2022 This book explores the central problems underlying the insurance of aviation war and terrorism risks and associated perils. It critically analyses the reasons why conventional insurance markets are unwilling or unable to provide sustainable insurance coverage for aviation war and terrorism risks in the aftermath of catastrophic events such as the terrorist events of September 11, 2001. It also examines some of the prominent concepts proposed and/or implemented after 9/11 to determine whether and to what extent these concepts avoid identified pitfalls. Like many of life's essentials, the importance of insurance is most evident when it is not available. The sheer scale and magnitude of the insurance losses that followed 9/11 caused conventional insurance markets (which hitherto had been offering generous insurance coverage for aviation war and terrorism risks to air transport operators for little or no premium) to withdraw coverage forthwith. The ensuing absence or insufficiency of commercial insurance coverage for aviation war and terrorism risks has sparked a global search for viable and sustainable

alternatives. Ten years have since elapsed, and despite numerous efforts, the fundamental problems remain unresolved. The book proceeds on the premise that the underlying issues are not entirely legal in nature; they have immense economic, psychological and policy implications that cannot be underestimated. A multidisciplinary approach is therefore used in examining the issues, drawing heavily upon analytical principles adapted from law and economics and behavioural law and economics. It is hoped that the resulting study will be beneficial not only to lawyers and those interested in aviation insurance but also to economists, air transport insurance program managers, capital market investors and governmental policymakers, both at the national and international levels.

Aviation Insurance Nov 02 2021 The value of aircraft is increasing, and their price rising. Passenger numbers and freight tonnage are increasing, as is the complexity of liability when something goes wrong. The many international organisations involved in any claim add to the difficulties but Peter Viccars has managed to produce a book that the layman can understand. Essential reading for the industry.

Aviation Insurance Apr 27 2021 Pursuant to a congressional requirement, GAO reviewed the Federal Aviation Administration's (FAA) Aviation Insurance Program, focusing on: (1) whether sufficient funds are available to pay the insurance claims; (2) how FAA war-risk coverage compares with that of commercial insurers; and (3) how FAA administers the program. GAO found that: (1) the Aviation Insurance Program does not have sufficient funds available to pay potential insurance claims for many of the aircraft registered for the program; (2) FAA inability to pay a claim promptly could cause a financial hardship for the affected airline, jeopardize other airlines' confidence in the program, and reduce the airlines' willingness to provide needed airlift services; (3) FAA insurance policies do not specifically provide the same comprehensive coverage as commercial insurance policies; (4) although FAA recognized the need to revise its war-risk policies as early as May 1990, it did not complete new nonpremium policies until April 1994 and still has not established a date for issuing its new premium policies; and (5) weaknesses in the administrative process could hamper the program's effectiveness and result in delays in claims payment.

Pilot's Guide to Aviation Insurance Dec 04 2021

General Aviation Dec 16 2022 A substantial proportion of all domestic aviation accidents and fatalities that occur each year involve general aviation (GA), which includes all aviation except commercial and military. Under federal law, the Secretary of Transportation is responsible for ensuring that commercial air carriers

carry liability insurance. However, no such federal requirements exist for GA aircraft owners. In some cases, accidents involving uninsured or underinsured GA aircraft owners have occurred where individuals (passengers or third parties) who incurred losses received little or no compensation. This book examines existing liability insurance requirements for GA aircraft owners; premiums for GA liability insurance; and factors that selected stakeholders cited which should be considered in determining whether to adopt a federal liability insurance requirement. Furthermore, this book discusses the characteristics of and trends in general aviation accidents from 1999 through 2011; and recent actions taken by the Federal Aviation Administration (FAA) to improve general aviation safety.

A Pilot's Guide to Aircraft Insurance Mar 26 2021 The AOPA Pilot's guide to aircraft insurance consists of a collection of AOPA Pilot articles that discuss the various aspects of aircraft insurance.
