**Open Skies for Africa** Charles E Schlumberger,2010-06-23 In Africa where poor roads ports and railways often constrain efficient transportation air transport holds great potential as a lever for economic growth and development Yet Africa has suffered several decades of inefficient air services Uncompetitive flag carriers set up by newly independent African states offered primarily intercontinental flights while the domestic air service market remained underdeveloped and underserved The 1999 pan African treaty on liberalization of access to air transport markets the Yamoussoukro Decision attempted to address these shortcomings Yet a decade later only partial liberalization has been achieved Open Skies for Africa Implementing the Yamoussoukro Decision reviews progress made in carrying out the treaty and suggests ways in which the liberalization process can be encouraged The book analyzes the completed and still pending steps toward implementation of the Yamoussoukro Decision both on a pan African level and within various regions Special focus is given to the challenges posed by the poor aviation safety and security standards that exist in most African countries Finally the book measures the impact that certain policy steps of the Yamoussoukro Decision have had and evaluates the economic significance of air transportation and its full liberalization in Africa The book concludes that the process of liberalizing African air services must continue and provides policy recommendations for the way forward

Safer Healthcare Charles Vincent,René Amalberti,2016-01-13 The authors of this book set out a system of safety strategies and interventions for managing patient safety on a day to day basis and improving safety over the long term These strategies are applicable at all levels of the healthcare system from the frontline to the regulation and governance of the system There have been many advances in patient safety but we now need a new and broader vision that encompasses care throughout the patient s journey The authors argue that we need to see safety through the patient s eyes to consider how safety is managed in different contexts and to develop a wider strategic and practical vision in which patient safety is recast as the management of risk over time Most safety improvement strategies aim to improve reliability and move closer toward optimal care However healthcare will always be under pressure and we also require ways of managing safety when conditions are difficult We need to make more use of strategies concerned with detecting controlling managing and responding to risk Strategies for managing safety in highly standardised and controlled environments are necessarily different from those in which clinicians constantly have to adapt and respond to changing circumstances This work is supported by the Health Foundation The Health Foundation is an independent charity committed to bringing about better health and health care for people in the UK The charity s aim is a healthier population in the UK supported by high quality health care that can be equitably accessed The Foundation carries out policy analysis and makes grants to front line teams to try ideas in practice and supports research into what works to make people s lives healthier and improve the health care system with a particular emphasis on how to make successful change happen A key part of the work is to make links between the knowledge of those working to deliver health and health care with research evidence and analysis The aspiration is to create a virtuous circle using what works on the ground to inform effective policymaking and vice versa Good health and health care are vital for a flourishing society Through sharing what is known collaboration and building people s skills and knowledge the Foundation aims to make a difference and contribute to a healthier population
