***Assessing Listening for Chinese English Learners*
Sep 26 2021 This book reports in detail the newly developed Communicative Listening Comprehension Test (CLCT) for the National College English Test (CET) of China. Following the principles of communicative testing in general and test construction approach proposed by Bachman and Palmer (1996) in particular, the project develops CLCT for CET-4 and CET-6. The research begins with the construction of frameworks of listening task characteristics and communicative listening ability. Subsequently, based on a survey of Chinese college students' English listening needs and an analysis of listening tasks in influential English listening course books and public tests, CLCT-4 and CLCT-6 test specifications are developed. Finally, sample papers are produced and a series of posteriori studies are conducted to examine the**

difficulty and usefulness of the newly developed notes-completion task type in two CLCT tests. As an example of successful integration of communicative testing theories and test construction practice, this research provides valuable insights into listening test development for other large-scale tests.

Building a Validity Argument for a Listening Test of Academic Proficiency Dec 30 2021 Over the years, various approaches to validation have emerged in psychological and educational assessment research, which can be classified into traditional approaches and modern approaches. Traditional approaches view validity as a multicomponential concept including, for example, content, construct, and predictive validity, while modern approaches conceptualize it as a unitary concept evaluated through argumentation. Drawing on the modern approach, this book builds a validity argument for an International English Language Testing System (IELTS) listening test sample. The book provides some insights into the listening sub-skills that the test engages, the psychometric dimensionality of the test, variables that predict item difficulty parameters, bias across age, nationality, test experience, and gender, as well as predictive-

referenced evidence of validity. A variety of techniques including the Rasch model and structural equation modelling are used to answer the research questions and to build a validity argument framework; this argument organizes the thematically related findings into a coherent treatment of the validity of the listening test. The book presents the first treatment of validity argument and related analytical tools in one volume and maps the psychometric/statistical analysis tools onto the validity argument framework. It also provides an extensive literature review of listening comprehension, validation, and psychometric modeling and proposes both methods for developing and validating self-assessment instruments and novel approaches to improving the quality of language assessments.

Examining Listening Apr 14 2023 This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical

evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

Teaching and Researching Chinese Second Language Listening Mar 01 2022 Teaching and Researching Chinese Second Language Listening focuses on Chinese L2 listening with theory and pedagogy at its heart. The objectives of the book are to recount the development of Chinese L2 listening pedagogy, to synthesize research on Chinese L2 listening, and to propose a Chinese L2 listening approach. This book is the first to bridge the gap between Chinese L2 and general L2 listening and develop a much-needed systematic teaching approach to Chinese listening based on research findings in L2 listening, the unique features of the Chinese language, and the

distinctive characteristics of the Chinese L2 learner population. This book grounds Chinese L2 teaching in solid theories of L2 acquisition and teaching. The research-informed and evidence-based Chinese L2 teaching approach proposed in the book seeks to move beyond the traditional product-oriented approach to integrate form-, meaning-, process-, and learner-focused listening. This book also discusses Chinese L2 listening from learners' perspectives: heritage versus non-heritage learners and motivation. These are presented together with theory and teaching practice. The book is aimed at researchers, in-service teachers and students taking upper-level undergraduate courses and postgraduate courses for programs in Chinese applied linguistics and teaching Chinese as a second language (TCSL). Chinese listening studies to date have mostly been published in the Chinese language, which severely limits their readership. This book is therefore written in English to fill the gap in current scholarship. Due to a large number of Chinese learners and the consequential booming programs in TCSL and CIE (Chinese international education), it is important to dedicate a book specifically to Chinese listening.

Rethinking the Second Language Listening Test
Aug 06 2022 Testing second language listening proficiency validly and reliably has always posed a challenge. In the days before the widespread

availability of recorded material, tests were reliant upon the voice of the examiner. Each test administration was a unique phonetic event, with enormous variations of delivery between examiners and even within the performance of a single examiner on different occasions. The presentation was read-aloud, and the texts chosen were often those that had been written to be read (including literary extracts). The resulting input to test takers bore little resemblance to natural connected speech.

Assessing L2 Listening Jun 23 2021 This book is relevant for language testers, listening researchers, and oral proficiency teachers, in that it explores four broad themes related to the assessment of L2 listening ability: the use of authentic, real-world spoken texts; the effects of different speech varieties of listening inputs; the use of audio-visual texts; and assessing listening as part of an interactive speaking/listening construct. Each theme is introduced with a review of the relevant literature, and then is examined through either two or three

empirical studies. The notion of authenticity underlies each of these four themes. By creating more authentic test tasks that are similar to real world language tasks, test developers can create listening assessments that not only more effectively assess test takers' communicative competence, but can also have a positive washback effect on educational systems.
