category that includes some of Europe's most beloved traditional styles Parmigiano Reggiano Gruyère and Comté to name a few In the United States raw milk cheese forms the backbone of the resurgent artisan cheese industry as consumers demand local traditionally produced and high quality foods Internationally award winning artisan cheeses like Bayley Hazen Blue Jasper Hill VT would have been unimaginable just forty years ago when American cheese meant Kraft Singles Unfortunately the artisan cheese industry faces an existential regulatory threat Over the past thirty years the US Food and Drug Administration FDA has edged toward an outright ban on raw milk cheeses Their assault on traditional cheesemaking goes beyond a debate about raw milk safety the FDA has also attempted to ban the use of wooden boards the use of ash in cheese ripening and has set stringent microbiological criteria that many artisan cheeses cannot meet The David versus Goliath existence of small producers fighting crushing regulations is true in parts of Europe as well where beloved creameries are going belly up or being bought out because they can't comply with EU health ordinances Centuries old cheese styles like Fourme d'Ambert and Cantal are nearing extinction leading Prince Charles to decry the bacteriological correctness of European regulators The dirty secret is that Listeria and other bacterial outbreaks occur in pasteurized cheeses more often than in raw milk cheeses and traditional processes like ash ripening have been proven safe In *Ending the War on Artisan Cheese* Dr Catherine Donnelly forcefully defends traditional cheesemaking while exposing government actions in the United States and abroad designed to take away food choice under the false guise of food safety This book is fundamentally about where and how our food is produced the values we place on methods of food production and how the roles of tradition heritage and quality often conflict with advertising politics and profits in influencing our food choices
