

Katlyn and Sarah are best friends. Sarah is 36 years less than double Katlyn's age. In 6 years, Sarah's age will be 12 years more than half of Katlyn's age. How old is each girl?

let $x = \text{kat's age}$

then $2x - 36 = \text{sar's age}$

in 6 years

$x + 6 \rightarrow \text{kat}$

How to Solve Word Problems in Algebra, 2nd Edition Mildred Johnson, Timothy E. Johnson, 1993-01-21 Solving word problems has never been easier than with Schaum's *How to Solve Word Problems in Algebra*. This popular study guide shows students easy ways to solve what they struggle with most in algebra word problems. *How to Solve Word Problems in Algebra, Second Edition* is ideal for anyone who wants to master these skills. Completely updated with contemporary language and examples, features solution methods that are easy to learn and remember plus a self-test. *Beginning and Intermediate Algebra* Tyler Wallace, 2018-02-13 Get better results with high quality content, exercise sets, and step-by-step pedagogy. Tyler Wallace continues to offer an enlightened approach grounded in the fundamentals of classroom experience in *Beginning and Intermediate Algebra*. The text reflects the compassion and insight of its experienced author with features developed to address the specific needs of developmental level students. Throughout the text, the author communicates to students the very points their instructors are likely to make during lecture, and this helps to reinforce the concepts and provide instruction that leads students to mastery and success. The exercises, along with the number of practice problems and group activities available, permit instructors to choose from a wealth of problems, allowing ample opportunity for students to practice what they learn in lecture to hone their skills. In this way, the book perfectly complements any learning platform, whether traditional lecture or distance learning; its instruction is so reflective of what comes from lecture that students will feel as comfortable outside of class as they do inside class with their instructor.

Open Middle Math Robert Kaplinsky, 2023-10-10 This book is an amazing resource for teachers who are struggling to help students develop both procedural fluency and conceptual understanding. Dr. Margaret Peg Smith, co-author of *5 Practices for Orchestrating Productive Mathematical Discussions*, and Robert Kaplinsky, the co-creator of Open Middle Math, bring his new class of tasks designed to stimulate deeper thinking and lively discussion among middle and high school students in *Open Middle Math Problems That Unlock Student Thinking, Grades 6-12*. The problems are characterized by a closed beginning, meaning all students start with the same initial problem, and a closed end, meaning there is only one correct or

optimal answer The key is that the middle is open in the sense that there are multiple ways to approach and ultimately solve the problem These tasks have proven enormously popular with teachers looking to assess and deepen student understanding build student stamina and energize their classrooms Professional Learning Resource for Teachers Open Middle Math is an indispensable resource for educators interested in teaching student centered mathematics in middle and high schools consistent with the national and state standards Sample Problems at Each Grade The book demonstrates the Open Middle concept with sample problems ranging from dividing fractions at 6th grade to algebra trigonometry and calculus Teaching Tips for Student Centered Math Classrooms Kaplinsky shares guidance on choosing problems designing your own math problems and teaching for multiple purposes including formative assessment identifying misconceptions procedural fluency and conceptual understanding Adaptable and Accessible Math The tasks can be solved using various strategies at different levels of sophistication which means all students can access the problems and participate in the conversation Open Middle Math will help math teachers transform the 6th 12th grade classroom into an environment focused on problem solving student dialogue and critical thinking [You Can, Toucan, Math](#) David A.
