for students and teachers      **High and Mighty** Keith Bradsher,2004-01-19 SUVs have taken over America's roads Ad campaigns promote them as safer and greener than ordinary cars and easy to handle in bad weather But very little about the SUV's image is accurate They poorly protect occupants and inflict horrific damage in crashes they guzzle gasoline and they are hard to control Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs including the notorious Ford Firestone rollover controversy In *High and Mighty* he traces the checkered history of SUVs showing how they came to be classified not as passenger cars but as light trucks which are subject to less strict regulations on safety gas mileage and air pollution He makes a powerful case that these vehicles are even worse than we suspect for their occupants for other motorists for pedestrians and for the planet itself In the tradition of *Unsafe at Any Speed* and *Fast Food Nation* Bradsher's book is a damning exposé of an industry that puts us all at risk whether we recognize it or not      Ford Bronco Todd Zuercher,2019-04-15
