the universe of Maxwell Oct 14 2021 This book proposes a surprising new cosmological theory and a fresh look at physics, with the creation of a new one, called "rational" and competing with the classical and official physics. New hypothesis on the ether, experimentally upheld in laboratory, completely changes the vision of the Universe and gives smart answers to many questions not yet solved: why the suns are in rotation, why planets are on the same plane, why they are so different, and many others. If the Theory of Relativity, the Big Bang and Quantum Physics seem odd to you, this book will explain to you why. If you don't like physics, you'll change your mind.

Marlborough's America Dec 16 2021 Scholars of British America generally conclude that the early eighteenth-century Anglo-American empire was commercial in economics, liberal in politics, and parochial in policy, somnambulant in an era of "salutary neglect," but Stephen Saunders Webb here demonstrates that the American provinces, under the spur of war, became capitalist, coercive, and aggressive, owing to the vigorous leadership of career army officers, trained and nominated to American government by the captain general of the allied armies, the first duke of Marlborough, and that his influence, and that of his legates, prevailed through the entire century in America. Webb's work follows the duke, whom an eloquent enemy described as "the greatest statesman and the greatest general that this country or any other country has produced," his staff and soldiers, through the ten campaigns, which, by defanging France, made the union with Scotland possible and made "Great Britain" preeminent in the Atlantic world. Then Webb demonstrates that the duke's legates transformed American colonies into provinces of empire. "Marlborough's America," fifty years in the making, is the fourth volume of "The Governors-General."

The Unwanted Jul 11 2021 Published in association with the United States Holocaust Memorial Museum, a riveting story of Jewish families seeking to escape Nazi Germany. In 1938, on the eve of World War II, the American journalist Dorothy Thompson wrote that "a piece of paper with a stamp on it" was "the difference between life and death." The Unwanted is the intimate account of a small village on the edge of the Black Forest whose Jewish families desperately pursued American visas to flee the Nazis. Battling formidable bureaucratic obstacles, some make it to the United States while others are unable to obtain the necessary documents. Some are murdered in Auschwitz, their applications for American visas still "pending." Drawing on previously unpublished letters, diaries, interviews, and visa records, Michael Dobbs provides an illuminating account of America's response to the refugee crisis of the 1930s and 1940s. He describes the deportation of German Jews to France in October 1940, along with their continuing quest for American visas. And he re-creates the heated debates among U.S. officials over whether or not to admit refugees amid growing concerns about "fifth columnists," at a time when the American public was deeply isolationist, xenophobic, and antisemitic. A Holocaust story that is both German and American, The Unwanted vividly captures the experiences of a small community struggling to survive amid tumultuous world events.
