Oedipus the King is the first tragic play in Sophocles' classic Oedipus trilogy. The plays tells the story of a man who eventually becomes the King of Thebes while fulfilling an extremely

tragic prophecy. A witty, subversive guide that turns conventional "wisdom" upside down! Too many books tell us what to do to achieve happiness---unfortunately, often at great risk, expense, or effort. 101 Things NOT to Do Before You Die is not one of those books. It's a book for the rest of us. Robert W. Harris says it's what we don't do that determines our happiness quotient. Using the exciting principle of "selective inaction," the author helps us adjust our thinking so we can make more satisfying decisions in everyday situations. For example, do you think you'll feel complete if you try to run with the bulls? Don't do it! Do you feel compelled to drive around searching for the "best" parking spot? Don't do it! Are you sometimes tempted to confuse Randy Quaid with Dennis Quaid? Just don't do it! Do you think that you should watch the colorized version of It's a Wonderful Life? Or ponder the lyrics to "Louie, Louie"? Or read War and Peace? Or push an elevator button more than twice? Think again! In many cases, you'll be better off not doing what "they" say you should do. Let 101 Things NOT to Do Before You Die be your guide to getting more out of life--- simply by doing less. The woods are lovely,

dark and deep, But I have promises to keep, And miles to go before I sleep, And miles to go before I sleep. A Man for All Seasons dramatises the conflict between King Henry VIII and Sir Thomas More. It depicts the confrontation between church and state, theology and politics, absolute power and individual freedom. Throughout the play Sir Thomas More's eloquence and endurance, his purity, saintliness and tenacity in the face of ever-growing threats to his beliefs and family, earn him status as one of modern drama's

greatest tragic heroes. The play was first staged in 1960 at the Globe Theatre in London and was voted New York's Best Foreign Play in 1962. In 1966 it was made into an Academy Award-winning film by Fred Zinneman starring Paul Scofield. "A Man for All Seasons is a stark play, sparse in its narrative, sinewy in its writing, which confirms Mr Bolt as a genuine and solid playwright, a force in our awakening theatre." (Daily Mail) A FINANCIAL TIMES BEST BOOK OF THE YEAR • An essential tool for individuals, organizations, and communities of all sizes to jump-start dialogue on racism and bias and to transform well-intentioned statements on diversity into concrete actions—from a leading Harvard social psychologist. FINALIST FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD • LONGLISTED FOR THE PORCHLIGHT BUSINESS BOOK AWARD "Livingston has made the important and challenging task of addressing systemic racism within an organization approachable and achievable."—Alex Timm, co-founder and CEO, Root Insurance Company How can I become part of the solution? In the wake of the social unrest of 2020 and growing calls for racial justice, many business leaders and ordinary citizens are asking that very question. This book provides a compass for all those seeking to begin the work of anti-racism. In The Conversation, Robert Livingston addresses three simple but profound questions: What is racism? Why should everyone be more

concerned about it? What can we do to eradicate it? For some, the existence of systemic racism against Black people is hard to accept because it violates the notion that the world is fair and just. But the rigid racial hierarchy created by slavery did not collapse after it was abolished, nor did it end with the civil rights era. Whether it's the composition of a company's leadership team or the composition of one's neighborhood, these racial divides and disparities continue to show up in every facet of society. For Livingston, the difference between a solvable problem and a solved problem is knowledge, investment, and determination. And the goal of making organizations more diverse, equitable, and inclusive is within our capability. Livingston's lifework is showing people how to turn difficult conversations about race into productive instances of real change. For decades he has translated science into practice for numerous organizations, including Airbnb, Deloitte, Microsoft, Under Armour, L'Oreal, and JPMorgan Chase. In The Conversation, Livingston distills this knowledge and experience into an eye-opening immersion in the science of racism and bias. Drawing on examples from pop culture and his own life experience, Livingston, with clarity and wit, explores the root causes of racism, the factors that explain why some people care about it and others do not, and the most promising paths toward profound and sustainable progress, all while inviting readers to challenge their

assumptions. Social change requires social exchange. Founded on principles of psychology, sociology, management, and behavioral economics, *The Conversation* is a road map for uprooting entrenched biases and sharing candid, fact-based perspectives on race that will lead to increased awareness, empathy, and action. Robert Langdon, while at the U.S. Capital Building, finds an object encoded with five symbols, which is an ancient invitation to usher its recipient into a long-lost world of esoteric wisdom. When Langdon's beloved mentor, Peter Solomon, is kidnapped, he realizes his only hope of saving Peter is to accept this mystical invitation and follow wherever it leads him. Langdon is instantly plunged into a clandestine world of Masonic secrets, hidden history, and never-before-seen locations - all of which seem to be dragging him toward a single, inconceivable truth. Written in the 16th century, *The Prince* remains one of the most influential books on political theory. Its author, Niccolò Machiavelli was an Italian diplomat and political theorist, and is considered the father of modern political thought. Originally published in hardcover in 1972, *A Day No Pigs Would Die* was one of the first young adult books, along with titles like *The Outsiders* and *The Chocolate War*. In it, author Robert Newton Peck weaves a story of a Vermont boyhood that is part fiction, part memoir. The result is a moving coming-of-age story that still resonates with teens today. Just when you thought you'd accepted your own

mortality . . . *Everything Is Going to Kill Everybody* is bringing panic back. Twenty illustrated, hilariously fear-inducing essays reveal the chilling and very real experiments, dangerous emerging technologies, and terrifying natural disasters that soon could—or very nearly already did—bring about the end of humanity. In short, everything in here will kill you and everyone you love. At any moment. And nobody's told you about it—until now: • Experiments in green energy like the HiPER, which uses massive lasers to create a tiny “contained” sun; it's an idea that could save the world if it doesn't consume us all in a fiery fusion reaction first. • Global disasters like the hypercane—a hurricane so large it could cover all of North America and shoot trailer parks into space! • Terrifying new developments in robotics like the EATR, which powers itself on meat—an invention in the running for “Worst Decision Made by Anybody.” Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry

Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game. The you-are-there story of one of the most ferocious small-unit combats in US history . . . As part of the massive Allied invasion of Normandy, three airborne divisions were dropped behind enemy lines to sow confusion in the German rear and prevent panzer reinforcements from reaching the beaches. In the dark early hours of D-Day, this confusion was achieved well enough, as nearly every airborne unit missed its drop zone, creating a kaleidoscope of small-unit combat. Fortunately for the Allies, the 505th Regimental Combat Team of the 82nd Airborne Division hit on or near its drop zone. Its task was to seize the vital crossroads of Ste Mère Eglise, and to hold the bridge over the Merderet River at nearby La Fièvre. Benefiting from dynamic battlefield leadership, the paratroopers reached the bridge, only to be met by wave after wave of German tanks and infantry desperate to force the crossing. Reinforced by glider troops, who suffered terribly in their landings from the now-alert Germans, the 505th not only held the

vital bridge for three days but launched a counterattack in the teeth of enemy fire to secure their objective once and for all, albeit at gruesome cost. In *No Better Place to Die*, Robert M. Murphy provides an objective narrative of countless acts of heroism, almost breathtaking in its "you are there" detail. No World War II veteran is better known in 82nd Airborne circles than Robert M. ("Bob") Murphy. A Pathfinder and member of A Company, 505th PIR, Bob was wounded three times in action, and made all four combat jumps with his regiment, fighting in Sicily, Italy, Normandy, and Holland. He was decorated for valor for his role at La Fièrè, and is a Chevalier of the French Legion of Honor. After the war, he was instrumental in establishing the 505th RCT Association. A selection of the Military Book Club Activities to be used in the classroom to accompany the reading of *A Day No Pigs Would Die*. It was a mild May morning in Charleston, South Carolina, in 1862, the second year of the Civil War, when a 23-year-old enslaved man named Robert Smalls boldly seized a Confederate steamer. With his wife and two young children hidden on board, Smalls and a small crew ran a gauntlet of heavily armed fortifications in Charleston Harbour and delivered the valuable vessel and the massive guns it carried to nearby Union forces. Smalls' courageous and ingenious act freed him and his family from slavery and immediately made him a Union hero. It also challenged much of the country's view of what

African Americans were willing to do for their freedom. In *'Be Free or Die*, ' Cate Lineberry tells the remarkable story of Smalls' escape and his many accomplishments during the war, including becoming the first black captain of an Army vessel. In celebration of the twenty-fifth anniversary of the publication of Robert Newton Peck's bestselling classic, *A Day No Pigs Would Die*, here is the eagerly anticipated sequel. This must for schools, libraries, and summer reading lists is now available for the first time in paperback. Times are difficult during the Great Depression, and thirteen-year-old Rob Peck must struggle to keep his family together after the death of his father. Disaster after disaster strikes and the family is forced to sell their farm. Relying solely on their strong Shaker faith and close family ties, the Pecks finally prevail and young Rob learns that true wealth extends beyond money and that real values are priceless. "A history of Romania traces the author's intellectual development throughout his extensive visits to the country, sharing his observations about its reflection of European politics, geography and key events while exploring the indelible role of Vladimir Putin."--NoveList. With over 65 books published, including the breathtaking (and somewhat autobiographical) *A Day No Pigs Would Die*, Robert Newton Peck has enjoyed an illustrious writing career. Now, in an autobiography as unique as he is, Peck tells his story through the people in his life. From his roots as a poor Vermont farmer's son to his

years as a soldier in World War II, from his time slogging away in a paper mill to his semi-retirement in Florida, Peck shows us people who too often go unseen and unheard—the country's poor and uneducated. "For decades, I've examined the autobiographies of my fellow authors. Bah! Many could have been titled *And Then I Wrote . . .* So instead of my life and lit, here is the unusual, a tarnished treasury of plain people who enriched me, taught me virtues, and helped me hold a mite of manhood. They're not fancy folk, so please expect no long-stemmed roses from a florist. They are, instead, the unarranged flora that I've handpicked from God's greenhouse . . . weeds in bloom." From the Hardcover edition. A book that vigorously defends heroin users and sex workers? In *You Will Die: The Burden of Modern Taboos* Robert Arthur does that and more to demonstrate that taboos are not relics of primitive societies. America has its own ridiculous phobias and beliefs that cause tedium, suffering, and death. The government and the media use these taboos to lie and mislead. It is not a conspiracy, but by pushing panic for votes and viewers they thwart our pursuit of happiness. *You Will Die* exposes the fallacies and the history behind our taboos on excrement, sex, drugs, and death. Arthur uses racy readability and rigorous documentation to raze sacred shrines of political correctness on the left and of conventional wisdom on the right. From the proper way to defecate to how to reach nirvana, anticipate the unexpected. It is not simply a

novel exploration of sex and drugs, but also of individuality, liberty, and the meaning of life. You Will Die gives readers a new way of seeing their world and allows them to make a more informed choice about living an authentic life. Winner of the 2008 Montaigne Medal awarded for most thought-provoking independent book. "... ya gotta fight back against the Sarah Palin 'idiot herd' with something." Wayne Coyne, Lead Singer, The Flaming Lips "... one of my favorite books ..." Mark Frauenfelder, Editor, Boing Boing "This book is a MUST READ! I loved it." Dr. Mark Benn, Psychologist, Colorado State University The definitive text on the mystery of R.F.K.'s assassination by a reporter who "got inside this story . . . with his impressive grasp of all the loose ends" (Kirkus Reviews). On the night of June 4, 1968, Sirhan Sirhan shot and killed Sen. Robert F. Kennedy in a steamy pantry of the Los Angeles Ambassador Hotel. Kennedy and his entourage had been celebrating his victory in the California primary for the Democratic nomination for president. Everybody knew that Sirhan was the assassin. But was there a wider conspiracy? Did the FBI truly solve the crime? After working his way deep inside the investigation—and spending more than two hundred hours in direct conversation with Sirhan—Robert Blair Kaiser wrote the quintessential book on Robert Kennedy's murder. Then, forty years later, Kaiser returned to the evidence, revising his original text as he probed even further into this mystifying

tragedy. Widely recognized as an important contribution to the literature of political assassinations and as a primary document on the tragedy of Kennedy's death, "R.F.K. Must Die!" is more than ever a stunning look into the mind of a killer and the substance of an assassination. "This account of how a once reviled theory, Baye's rule, came to underpin modern life is both approachable and engrossing" (Sunday Times). A New York Times Book Review Editors' Choice Bayes' rule appears to be a straightforward, one-line theorem: by updating our initial beliefs with objective new information, we get a new and improved belief. To its adherents, it is an elegant statement about learning from experience. To its opponents, it is subjectivity run amok. In the first-ever account of Bayes' rule for general readers, Sharon Bertsch McGrayne explores this controversial theorem and the generations-long human drama surrounding it. McGrayne traces the rule's discovery by an 18th century amateur mathematician through its development by French scientist Pierre Simon Laplace. She reveals why respected statisticians rendered it professionally taboo for 150 years—while practitioners relied on it to solve crises involving great uncertainty and scanty information, such as Alan Turing's work breaking Germany's Enigma code during World War II. McGrayne also explains how the advent of computer technology in the 1980s proved to be a game-changer. Today, Bayes' rule is used

everywhere from DNA de-coding to Homeland Security. Drawing on primary source material and interviews with statisticians and other scientists, The Theory That Would Not Die is the riveting account of how a seemingly simple theorem ignited one of the greatest controversies of all time. Covering the theory of computation, information and communications, the physical aspects of computation, and the physical limits of computers, this text is based on the notes taken by one of its editors, Tony Hey, on a lecture course on computation given b This enchanting companion to Robert Beatty's instant #1 New York Times bestseller Willa of the Wood is perfect for any reader who cares deeply about the natural world. Patrick Cockburn When Lara Marlowe met Robert Fisk in 1983 in Damascus, he was already a famous war correspondent. She was a young American reporter who would become a renowned journalist in her own right. For the next twenty years, they were lovers, husband and wife and friends, occasionally angry and estranged from one another, but ultimately reconciled. They learned from each other and from the people in the ruined world they reported from: Lebanon, torn apart by a vicious civil war as well as

Israeli and Syrian occupations; Iran, where they were the only journalists to interview the Middle East's chief hostage-taker and dispatcher of suicide bombers; the Islamist revolt that claimed up to 200,000 lives in Algeria; the disintegration of former Yugoslavia and two US-led wars on Iraq. This is at once a portrait of a remarkable man, the story of a Middle East broken by its own divisions and outside powers, and a moving account of a relationship in dark times. When 4-year-old Colton Burpo emerges from life-saving surgery with remarkable stories of his visit to heaven, his family doesn't know what to believe. *Heaven is For Real* details what Colton saw and his family's journey towards accepting their young son had visited the afterlife. "Do you remember the hospital, Colton?" Sonja said. "Yes, mommy, I remember," he said. "That's where the angels sang to me." Colton told his parents he left his body during an emergency surgery—and proved that claim by describing exactly what his parents were doing in another part of the hospital during his operation. He talked of visiting heaven and

described events that happened before he was born and how he spoke with family members he'd never met. Colton also astonished his parents with descriptions and obscure details about heaven that matched the Bible exactly, even though he had not yet learned to read. With disarming innocence and the plainspoken boldness of a child, Colton recounts his visit to heaven, describing: Meeting long-departed family members, Jesus, the angels, how "really, really big" God is, and how much God loves us. How Jesus called Todd, Colton's father, to be a pastor. *The Battle of Armageddon Retold* by his father, but using Colton's uniquely simple words, *Heaven Is for Real* offers a glimpse of the world that awaits us, where as Colton says, "Nobody is old and nobody wears glasses." *Heaven Is for Real* will forever change the way you think of eternity, offering the chance to see, and believe, like a child. Praise for *Heaven is for Real*: "A beautifully written glimpse into heaven that will encourage those who doubt and thrill those who believe." —Ron Hall, coauthor of *Same Kind of Different as Me* A Vermont farm. From the #1 New York Times bestselling author of *The 48 Laws of Power* comes the definitive new book on decoding the behavior of the people around you. Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he

turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense. On 21 March 1960, Robert Mangaliso Sobukwe, leader of the Pan Africanist Congress (PAC), led a mass defiance of South Africa's pass laws. He urged blacks to go to the nearest police station and demand arrest. When police opened fire on a peaceful crowd in the township of Sharpeville, 68 people were killed. The protest changed the course of South Africa's history. Afrikaner rule stiffened and black resistance to apartheid went underground. Sobukwe was jailed for three years on charges of incitement, but the government, fearful of his power, rushed through the 'Sobukwe Clause' to keep him in prison without trial. For the next six years,

Sobukwe was kept in solitary confinement on Robben Island, the infamous apartheid prison near Cape Town. *How Can Man Die Better* is the story of this South African hero, but it also the story of the friendship between Robert Sobukwe and Benjamin Pogrund, former Deputy Editor of the *Rand Daily Mail*. Their joint experiences and debates chart the course of a tyrannical regime and the growth of black resistance. "I couldn't imagine a finer or livelier guide through the world of opera. . . . [Levine] distills a lifetime of passion and insight into this immensely enjoyable survey, and with the right comic touch to make you wonder how opera ever seemed intimidating." —Thomas May, author of *Decoding Wagner* Despite the popular success of the Metropolitan Opera's "Live in HD" series, opera's grand world of soaring sopranos and breathtaking baritones—of tragic *Rigoletto*, triumphal *Sigmund*, and desperate *Orfeo*, of faithful *Figaro*, heartbroken *Pagliacci*, and lusty *Don Giovanni*—remains wrapped in an aura of impenetrable esotericism. Piercing this veil of opera's perceived inaccessibility, acclaimed classical music critic Robert Levine extends a witty and insightful invitation to enjoy opera in *Weep, Shudder, Die*, offering a new generation of aficionados a priceless way to access to music's greatest achievement. Two powerful writers draw upon philosophy to find a roadmap for grace and equanimity in the face of the death of our planet. Tugwell Dockery hasn't spoken since the horrific events that unfolded

one afternoon six years ago at his grandfather's ranch. Now he's back there, newly orphaned, living with his grandfather and gutsy great-aunt. The only person who understands him is his brother, Broda Joe. But Broda Joe's in jail, and Tug hasn't seen him in two years.
