In the age of satellites and the Internet, worldwide communication has become increasingly unified amid overblown claims about the redemptive possibilities of international networks. But this rhetoric is hardly new. As Armand Mattelart demonstrates in *Networking the World, 1794-2000*, globalization and its attendant hype have existed since road and rail were the fastest way to move information. Mattelart plates contemporary global communication networks into historical context and shows that the networking of the world began much earlier than many assume, in the late eighteenth century. He argues that

the internationalization of communication was spawned by such Enlightenment ideals as universalism and liberalism, and examines how the development of global communications has been inextricably linked to the industrial revolution, modern warfare, and the emergence of nationalism. Throughout, Mattelart eloquently argues that discourses of better living through globalization often mask projects of political, economic, and cultural domination. Academic research projects contribute to many advancements in modern life. Thus, the supervision of such works on the doctoral level is extremely important, and must constantly evolve in order to help disseminate the most accurate information available. Examining the Changing Role of Supervision in Doctoral Research Projects: Emerging Research and Opportunities is a pivotal scholarly resource that examines the current practices that research supervisors adhere to and outlines innovative ways that these techniques can be improved upon. Covering relevant topics such as study environments, technology support, research networks, and research design, this publication is ideal for academics, graduate students, and researchers that are interested in discovering a more streamlined method of supervision for research works. Now featuring new cover artwork, Moore's popular book "To Live Is Christ" looks closely at the passionate and inspiring faith and life of the apostle Paul. This book provides an overview of the ACCESS program, a mental health program that has been developed and tested as an efficacious treatment for college students with ADHD. This program is at the cutting edge of clinical research, incorporating treatment strategies that allow for dissemination in real world settings in order to effectively assist college students experiencing difficulties in their academic, personal, social, and emotional functioning. As cognitive behavioral approaches have proved to be the most successful psychological treatments to date, the techniques in this volume follow that model in a detailed and nuanced fashion. The authors provide a week by week breakdown of the program, supplemented by handouts and worksheets designed to facilitate better understanding of the areas targeted by the

program. Filling a notable gap in research addressing the ADHD college student population, CBT for College Students with ADHD is a crucial resource for campus mental health practitioners as well as a broad range of clinicians dealing with emerging adults. When World War II became history, there was a big reception in Boston Harbor followed by a heartwarming celebration at home. Jim would now be able to keep the promise he made to his four sweethearts residing on the west coast; a mighty long way from his bailiwick. Sweethearts Miriam and Loretta were waiting in Oregon and he would board the Great Northern Railway to see them. Rita and Connie were sitting on pins and needles in Los Angeles. His cousin Andy returned home from the War, bought an old Ford, and wanted to go along with Jim to see Hollywood and swing at the famous Palladium. Two of their high school buddies were hitching rides to the north woods and they wanted to go along. So, Jim made arrangements to visit Miriam and Loretta in Oregon; take a semester of classes at Indiana University; and then begin the long journey to Hollywood in his cousin Contrary to popular belief, economic growth is not the antithesis of environmental quality; rather, the two go hand in hand if the incentives are right. The author shows how, by developing and protecting the institutions of freedom rather than regulating human use of natural resources through political processes, we can have our environmental cake and eat it too. The doctor who receives a visit from a chick who needs help with deeply embedded... love beads; the wedding dress maker hit on by the horny bride; the hot woman dentist who puts you to sleep and then into hot sexual bondage... hey, you never know, it could happen to you!
