The purpose of this book is to illustrate the magnificence of the fabless semiconductor ecosystem and to give credit where credit is due We trace the history of the semiconductor industry from both a technical and business perspective We argue that the development of the fabless business model was a key enabler of the growth in semiconductors since the mid 1980s Because business models as much as the technology are what keep us thrilled with new gadgets year after year we focus on the evolution of the electronics business We also invited key players in the industry to contribute chapters These In Their Own Words chapters allow the heavyweights of the industry to tell their corporate history for themselves focusing on the industry developments

both in technology and business models that made them successful and how they in turn drive the further evolution of the semiconductor industry
