Introduction to the AdS/CFT Correspondence Sep 01 2021 Providing a pedagogical introduction to the rapidly developing field of AdS/CFT correspondence, this is one of the first texts to provide an accessible introduction to all the necessary concepts needed to engage with the methods, tools and applications of AdS/CFT. Without assuming anything beyond an introductory course in quantum field theory, it begins by guiding the reader through the basic concepts of field theory and gauge theory, general relativity, supersymmetry, supergravity, string theory and conformal field theory, before moving on to give a clear and rigorous account of AdS/CFT correspondence. The final section discusses the more specialised applications, including QCD, quark-gluon plasma and condensed matter. This book is self-contained and learner-focused, featuring numerous exercises and examples. It is essential reading for both students and researchers across the fields of particle, nuclear and condensed matter physics.

The Life of Lines Jan 30 2024 To live, every being must put out a line, and in life these lines tangle with one another. This book is a study of the life of lines. Following on from Tim Ingold's groundbreaking work *Lines: A Brief History*, it offers a wholly original series of meditations on life, ground, weather, walking, imagination and what it means to be human. In the first part, Ingold argues that a world of life is woven from knots, and not built from blocks as commonly thought. He shows how the principle of knotting underwrites both the way things join with one another, in walls, buildings and bodies, and the composition of the ground and the knowledge we find there. In the second part, Ingold argues that to study living lines, we must also study the weather. To complement a linealogy that asks what is common to walking, weaving, observing, singing, storytelling and writing, he develops a meteorology that seeks the common denominator of breath, time, mood, sound, memory, colour and the sky. This denominator is the atmosphere. In the third part, Ingold carries the line into the domain of human life. He shows that for life to continue, the things we do must be framed within the lives we undergo. In continually answering to one another, these lives enact a principle of correspondence that is fundamentally social. This compelling volume brings our thinking about the material world refreshingly back to life. While anchored in anthropology, the

book ranges widely over an interdisciplinary terrain that includes philosophy, geography, sociology, art and architecture.

British Mail Steamers to South America, 1851-1965 Oct 03 2021 During the nineteenth century the British government and the Admiralty provided large subsidies to commercial companies to run international mail services. Concentrating on the service between Britain and South America, this book explores the economic, maritime and political aspects of the Royal Mail Lines company, which held contracts between 1851 and 1965, and reveals the impacts that a long-distance mail service had upon travel, trade, commerce and the changing patterns of global information exchange.

Dark Lines of London Sep 25 2023 The Da Vinci Codemeets Timelinewhen a London Grad Student find himself in a race against the clock to not only find John Dee's missing grimoire, but to use it to contact Dee himself; in the process stopping a chain of events that would end the world. Spun off historical facts and characters, it is a quintessentially British time-travel story with a strong conspiracy and government cover-up twist.

London Law Monthly Mar 08 2022

Bills of Lading Incorporating Charterparties May 10 2022 Vessels very frequently serve under a long chain of charterparties and sub-charterparties. When this is the case, the legal issues are more convoluted than they might at first seem. Incorporation clauses are commonplace in bills of lading used in the tramp trade due to the desire to make this web of contracts back-to-back. The extent to which the terms of the charterparty referred to can be carried across to the bill of lading has, over the centuries, been hotly disputed in many jurisdictions. Entirely dedicated to the topic of the incorporation of charterparty terms into bills of lading, this book discusses and analyses the legal and practical issues surrounding this topic under English and US law. Through discussions on the incorporation of a wide range of different charterparty terms, the book combines the peculiar and sophisticated rules of incorporation with the legal and practical issues concerning shipping, international trade, arbitration and conflict of laws and jurisdiction.

Lines Jun 03 2024 What do walking, weaving, observing, storytelling, singing, drawing and writing have in common? The answer is that they all proceed along lines. In this extraordinary book Tim Ingold imagines a world in which everyone and everything consists of interwoven or interconnected lines and lays the foundations for a completely new discipline: the anthropological archaeology of the line. Ingold's argument leads us through the music of Ancient Greece and contemporary Japan, Siberian labyrinths and Roman roads, Chinese calligraphy and the printed alphabet, weaving a path between antiquity and the present. Drawing on a multitude of disciplines including archaeology, classical studies, art history, linguistics, psychology, musicology, philosophy and many others, and including more than seventy illustrations, this book takes us on an exhilarating intellectual journey that will change the way we look at the world and how we go about in it. This Routledge Classics edition includes a new preface by the author.

Brodsky's Poetics and Aesthetics Jun 30 2021

County Lines Aug 25 2023 This brief sheds light on evolving drug markets and the county lines phenomenon in the British context. Drawing upon empirical research gathered in the field between 2012-2019 across two sites, Scotland's West Coast and Merseyside in England, this book adopts a grounded approach to the drug supply model, detailing how drugs are purchased, sold and distributed at every level of the supply chain at both sites. The authors conducted interviews with practitioners, offenders, ex-offenders and those members of the general public most effected by organised crime. The research explores how drug markets have continued to evolve, accumulating in the phenomenon that is county lines. It explores how such behavior has gradually become ever more intertwined with other forms of organised criminal activity. Useful for

researchers, policy makers, and law enforcement officials, this brief recommends a rethinking of current reactive policing strategies.

Drawing the Line Mar 20 2023 The second edition of *Drawing the Line: How Mason and Dixon Surveyed the Most Famous Border in America* updates Edwin Danson's definitive history of the creation of the Mason - Dixon Line to reflect new research and archival documents that have come to light in recent years. Features numerous updates and revisions reflecting new information that has come to light on surveyors Charles Mason and Jeremiah Dixon Reveals the true origin of the survey's starting point and the actual location of the surveyors' observatory in Embreeville Offers expanded information on Mason and Dixon's transit of Venus adventures, which would be an important influence on their future work, and on Mason's final years pursuing a share of the fabulous Longitude prize, and his death in Philadelphia Includes a new, more comprehensive appendix describing the surveying methods utilized to establish the Mason-Dixon Line

***Bordering Two Unions* Feb 04 2022** Available Open Access under CC-BY-NC licence. How does Brexit change Northern Ireland's system of government? Could it unravel crucial parts of Northern Ireland's peace process? What are the wider implications of the arrangements for the Irish and UK constitutions? Northern Ireland presents some of the most difficult Brexit dilemmas. Negotiations between the UK and the EU have set out how issues like citizenship, trade, the border, human rights and constitutional questions may be resolved. But the long-term impact of Brexit isn't clear. This thorough analysis draws upon EU, UK, Irish and international law, setting the scene for a post-Brexit Northern Ireland by showing what the future might hold.

Railway Returns for England and Wales, Scotland, and Ireland ... Jun 22 2023

The Race to the North Dec 05 2021 In the late nineteenth century, some of Britain's leading main-line railway companies threw caution to the winds in an attempt to provide the fastest passenger express services between London and Scotland. These became known as the races to the north. There were two phases, in 1888 and 1895, and they spurred the building of new bridges across the Firth of Forth and Firth of Tay. David Wragg gripping, detailed narrative tells the story of this epic engineering and commercial competition. He concentrates on the determination of the railway companies to see who could provide the fastest schedule between London and the main Scottish cities of Edinburgh, Glasgow, Perth, Dundee and Aberdeen. Casting aside their early policy of co-existence on these prestigious and lucrative routes, the West Coast and East Coast companies were drawn into a period of intense, highly publicized rivalry as they sought to dominate the market. David Wragg gives an insight into the conduct of the well-publicized highs and tragic lows of this dramatic story the extension of the lines to the far north, the building of the Tay and Forth bridges including the collapse of the first Tay bridge with 72 fatalities and the repeated bids by the companies to cut the journey times. While he describes the public side of this fascinating story, David Wragg fills in the background, which is no less interesting the pioneering engineering of the steam age, the massive construction projects, the cut-throat battle for passengers and freight and the deep inter-company rivalries that drove the rapid development of the railways during the Victorian period.

Introduction to Research - E-Book Apr 08 2022 Bridge the gap between research and practice with *Introduction to Research: Understanding and Applying Multiple Strategies*,

5th Edition. This easy-to-read edition covers all the major research design strategies: qualitative, quantitative, naturalistic, experimental-type, and mixed method. And with the text's up-to-date research information and references, you will have a solid foundation from which to critique and understand research designs and their applications to healthcare and human service settings. Case examples provide real-life snapshots of what it is like to participate in different types of research processes, identify research dilemmas relevant to chapter subjects, and alert you to problems you might encounter. Authors make the topics more accessible, so research becomes more relevant - and topics come to life. Covers experimental-type, naturalistic, and mixed method design strategies to improve your ability to compare, contrast, and integrate different methods. Presents complex information clearly in a highly readable, and easy-to-understand, manner. Includes detailed discussions of qualitative and quantitative methodologies, a unique and balanced focus that makes this text more comprehensive than others in its field. NEW! Up-to-date research methods, strategies, and references, like digital sources, visual methods, and geographical analysis, give you the latest information on research in diverse areas of health and human services.

Walk the Lines Nov 27 2023 The only way to truly discover a city, they say, is on foot. Taking this to extremes, Mark Mason sets out to walk the entire length of the London Underground - overground - passing every station on the way. In a story packed with historical trivia, personal musings and eavesdropped conversations, Mark learns how to get the best gossip in the City, where to find a pint at 7am, and why the Bank of England won't let you join the M11 northbound at Junction 5. He has an East End cup of tea with the Krays' official biographer, discovers what cabbies mean by 'on the cotton', and meets the Archers star who was the voice of 'Mind the Gap'. Over the course of several hundred miles, Mark contemplates London's contradictions as well as its charms. He gains insights into our fascination with maps and sees how walking changes our view of the world. Above all, in this love letter to a complicated friend, he celebrates the sights, sounds and soul of the greatest city on earth.

The 2nd International Symposium on Rail Transit Comprehensive Development (ISRTCD) Proceedings Mar 27 2021 With the increasing sophistication of urban rail networks, the combined effects of rail transit on urban development are more and more complex and in-depth, and large-scale rail transit construction and operation have placed new demands on planning, construction, investment and financing. This main aim of these proceedings is to study and explore theoretical progress, methodological innovation and lessons learned in aspects of the planning stage, urban planning, architectural design, development and construction, safety systems, management support, etc. involved in the process of comprehensive utilization along urban rail transit lines and in the development and utilization of the surrounding land, in order to provide a platform for decision-makers and researchers involved in urban rail transit construction, urban construction and development.

AIDS in the UK Apr 28 2021 Fifteen years ago the AIDS 'epidemic' did not exist on the public agenda. In just over a decade the public and official response to the disease has resulted in the development of a whole network of organizations devoted to the study, containment, and practical treatment of AIDS. In this important and original analysis of AIDS policy, Virginia Berridge examines the speed and nature of the official (and unofficial) response to this new and critical historical event. The policy reaction in Britain passed through three stages. From 1981-1986 the outbreak of a new contagious disease led to public alarm and social stigmatization, with a lack of scientific certainty about the nature of the disorder. AIDS was a new and open policy area - there were no established departmental, local, or health authority mechanisms for dealing with the problem. This was a period of policy development from below, with relatively little official action and many voluntary initiatives behind the scenes. This phase was succeeded in

1986-1987 by a brief stage of quasi-wartime emergency, in which national politicians and senior civil servants intervened, and a high-level political response emerged. The response was a liberal one of 'safe sex' and harm minimization rather than draconian notification or isolation of carriers. The author demonstrates that despite the 'Thatcher revolution' in government in the 1980s, crisis could still stimulate a consensual response. The current period of 'normalization' of the disease sees panic levels subsiding as the rate of growth slows and the fear of the unknown recedes. Official institutions have been established and formal procedures adopted and reviewed; paid professionals have replaced the earlier volunteers. The 1990s have seen change in the liberal consensus towards a harsher response and the partial repoliticization of AIDS. In this fascinating and scholarly account, Virginia Berridge analyses a remarkable period in contemporary British history, and exposes the reaction of the British political and medical elites, and of the British public to one of the most challenging issues of this century.

The Old Straight Track Jul 04 2024 First published in 1925 THE OLD STRAIGHT TRACK remains the most important source for the study of ancient tracks or leys that criss-cross the British Isles- a fascinating system which was old when the Romans came to Britain. First in the Herefordshire countryside, and later throughout Britain, Alfred Watkins noticed that beacon hills, mounds, earthworks, moats and old churches built on pagan sites seemed to fall in straight lines. His investigation convinced him that Britain was covered with a vast network of straight tracks, aligned with either the sun or the path of a star. Although traces of this network can be found all over the country, the principles behind the ley system remain a mystery. Are they the legacy of a prehistoric scientific knowledge which is now all but lost? And was their purpose secular or religious?

Automotive Industries, the Automobile Aug 13 2022

The Line of Beauty Oct 27 2023 Winner of the Man Booker Prize Named a Best Book of the Century by The New York Times Book Review International Bestseller From acclaimed author Alan Hollinghurst, a sweeping novel about class, sex, and money during four extraordinary years of change and tragedy. In the summer of 1983, twenty-year-old Nick Guest moves into an attic room in the Notting Hill home of the Feddens: conservative Member of Parliament Gerald, his wealthy wife Rachel, and their two children, Toby-whom Nick had idolized at Oxford-and Catherine, who is highly critical of her family's assumptions and ambitions. As the boom years of the eighties unfold, Nick, an innocent in the world of politics and money, finds his life altered by the rising fortunes of this glamorous family. His two vividly contrasting love affairs, one with a young black man who works as a clerk and one with a Lebanese millionaire, dramatize the dangers and rewards of his own private pursuit of beauty, a pursuit as compelling to Nick as the desire for power and riches among his friends. Richly textured, emotionally charged, disarmingly comic, this is a major work by one of our finest writers.

Participatory reading in late-medieval England Dec 17 2022 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book traces affinities between digital and medieval media, exploring how reading functioned as a nexus for concerns about increasing literacy, audiences' agency, literary culture and media formats from the late fourteenth to the early sixteenth centuries. Drawing on a wide range of texts, from well-known poems of Chaucer and Lydgate to wall texts, banqueting poems and devotional works written by and for women, Participatory reading argues that making readers work offered writers ways to shape their reputations and the futures of their productions. At the same time, the interactive reading practices they promoted enabled audiences to contribute to - and contest - writers' burgeoning authority, making books and reading work for everyone.
