This book presents an overview of current views on the origin of life and its earliest evolution. Each chapter describes key processes, environments and transition on the long road from geochemistry and astrochemistry to biochemistry and finally to the ancestors of today's organisms. This book combines the bottom-up and the top-down approaches to life including the origin of key chemical and structural features of living cells and the nature of abiotic factors that shaped these features in primordial environments. The book provides an overview of the topic as well as its state of the art for graduate students and newcomers to the field. It also serves as a reference for researchers in origins of life on Earth and beyond. The M998 HMMV (High Mobility Multipurpose Wheeled Vehicle) was introduced in 1983 to replace the ubiquitous M151 commonly called a Jeep. The HMMV will be replaced by the JLTV with the first fieldings beginning in 2019 for the US Military. This manual is a reprint of the official manual. Chilton's original line of model-specific information covers older vehicles. Each manual offers repair and tune-up guidance designed for the weekend for the weekend mechanic, covering basic maintenance and troubleshooting. For the hobbyist or used car owner, this information is essential and unavailable elsewhere. Part company history, part business tale, and part action novel, Hummer tells the story of the Humvee's rise from a utility vehicle bred for military use to a suburban status-symbol. More than a simple story of GM's clever branding scheme at a perfect juncture in automotive, consumer, and world histories, this book is a cultural dissection of what images make Americans open their pocketbooks so readily, and how buying American consumers was never so easy-or conflicted. - The H2 is a huge hit for GM- Hummer is an American icon like the Corvette and Ford Pickup- This book offers a fun-to-read story- H3 is on its way in 2006- Interest continues to grow in this unique vehicle, with buyers pushing GM production numbers up for the Hummer. Americans got their first real look at the Hummer during the first Gulf War. Interestingly, because of the advent of 24-hour news at this same point in time, the Gulf War served as priceless free advertising for AM General's war machine. After seeing the Hummer in action, movie star Arnold Schwarzenegger reportedly helped to convince AM General to prep the Hummer for civilian sales and was one of the first to own one. The attention garnered by Schwarzenegger and other celebrities like Tom Clancy, Shaquille O'Neal, G. Gordon Liddy, and any other high-profile American with \$100,000 to spare spurred General Motors to acquire the Hummer name for a new range of smaller SUV's. With a well-timed second war in Iraq, General Motors saw sales of its Hummer H2 skyrocket, just as "Arnold" prepared for the debut of the third installment of his Terminator movies, which cemented his Hollywood status as the king of action movies since the first battle in Iraq. They say timing is everything. With the exploration of everything from consumer buying habits and American economics to global military action and big-budget Hollywood star power, HUMMER tells the story of how priceless and valuable timing has been for America's largest and most recognizable SUV. About the Author Martin Padgett is the editor of the Web's Automotive Authority, www.TheCarConnection.com, and contributes regularly to Stuff magazine as the resident "road warrior." He also writes car news and columns for Import Tuner, Edmunds.com, and other publications. Padgett lives in Atlanta's Morningside neighborhood with his partner of seven years and four cats, an ever-changing roster of cars in the driveway, and easy access to the Gulf Coast. 300+ pages of diagrams, descriptions of techniques and a comprehensive overview of the role direct action plays in resistance--from planning an action, doing a soft blockade, putting up a treesit or executing a lockdown; to legal and prisoner support, direct action trainings, fun political pranks, and more. The DAM has been compiled and updated by frontline activists from around the US to help spread the knowledge and get these skills farther out in the world. This is a review of 190 years of literature on copper and its alloys. It integrates information on pigments, corrosion and minerals, and discusses environmental conditions, conservation methods, ancient and historical technologies. When it entered army service in 1985, AM General's high-mobility multipurpose wheeled vehicle--better known as the Humvee--quickly assumed the status the World War II jeep enjoyed among an earlier generation of soldiers. Humvee at War showcases this iconic vehicle in the many roles and configurations it has taken on over the years--ambulance, troop transport, and armament carrier among them. The HMMWV or High Mobility Multipurpose Wheeled Vehicle, commonly called the Hummer was produced by AM General to replace the venerable Jeep or GPW vehicle that the US Military had used for decades. GM later released a similarly styled, but unrelated Hummer civilian vehicle. This manual is the operator's manual for the HMMWV military vehicle. It is printed as a convenience to enthusiasts, civilian and government operators and others who have need for a professionally printed version of the manual. The use of endoscopic orbital surgery is rapidly expanding in modern day rhinology and oculoplastic practice. In the past two decades, endoscopic techniques have been adapted for lacrimal and orbital surgery. Significant advances have been made in endoscopic endonasal and periocular approaches to the orbital apex and skull base, especially in the last 3 years. There has been no book dedicated to these recent surgical innovations until *Endoscopic Surgery of the Orbit: Anatomy, Pathology, and Management* by Benjamin Bleier, Suzanne Freitag, and Raymond Sacks filled this void. This landmark text and its accompanying videos bring together the global experience of thought leaders and pioneers with multidisciplinary backgrounds. The collective expertise shared throughout 20 chapters codifies the current state of endoscopic orbital surgery and sets the stage for future developments. The opening chapters cover anatomy, physiology, and radiologic aspects pertaining to the orbit, paranasal sinuses, and surrounding structures. Subsequent chapters detail evaluation and endoscopic management of a full spectrum of pathologies utilizing orbital and optic nerve decompression, reconstruction, transorbital approaches, and anesthetic techniques. Key Features State-of-the-art evidence-based medicine including the pros and cons of different treatment approaches Management of operative complications such as sinusitis and iatrogenic intraorbital injury, and postoperative challenges Pathology-specific topics including congenital and acquired lacrimal obstruction, thyroid-related eye disease, trauma, orbital neoplasms, and skull-base neoplasms with orbital involvement 138 original illustrations help elucidate complex anatomy High definition, narrated surgical videos delineate specific surgical techniques This is a must-have resource for otolaryngologists in rhinologic and general practice and ophthalmologists in general and oculoplastic practice. It will also benefit neurosurgeons and plastic & reconstructive surgeons. The comprehensive text, clinical pearls, and accompanying videos facilitate incorporating these techniques into practice, whether one is a surgical trainee or veteran practitioner. Buying a car can be a smart idea - a car loses the lion's share of its value when it is driven off the new car lot, so why let someone else take that loss? But buyer beware: A used car is likely to need more repairs and may come with a short warranty or none at all. In addition, used cars may lack the latest safety features. That is why it is so important for consumers to do extensive research so they can avoid all of the potential pitfalls of buying a used car. The auto experts at "Consumer Reports" have done the work for you and have compiled their extensive research and report their findings into the 2007 edition of *USED CAR BUYING GUIDE*. This fabulous tool will help steer any consumer who is in the market for a used car towards the better-performing and more reliable used car models and away from those models with a troubled past or substandard performance. Before consumers set foot on a used car lot, they should read all the valuable information provided in this book so they can be armed with as much information as possible and the knowledge to make an educated choice. "Consumer Reports" knows cars and offers the most detailed and revealing used car reliability information available anywhere including: - Unbiased reviews of every major model from 1999 - 2006- Lists of the best and worst used vehicles and how to avoid a lemon - A checklist of what to look for when inspecting a used car- Best used cars for gas mileage- Tips on negotiating the best priceReliability, recalls and crash test information-Making sense of safety information -How to get the most money when trading in your current car The majority of this book is devoted to the profiles of 264 cars, minivans, SUVs and trucks, presenting all major 1999-2006 models. Each profile contains a photo from the representative year, a write-up of the vehicle, reliability history, crash-test data, and the model years when key safety gear was added and when a major redesign was made. The M998 HMMV (High Mobility Multipurpose Wheeled Vehicle) was introduced in 1983 to replace the ubiquitous M151 commonly called a Jeep. The HMMV will be replaced by the JLTV with the first fieldings beginning in 2019 for the US Military. This manual is a reprint of the official manual. FM 21-11 1943: Basic field manual, first aid for soldiers.(OBSOLETE) "The purpose of this manual is to teach the soldier what he can do for himself or a fellow soldier if injury or sickness occurs when no medical officer or Medical Department soldier is nearby. Information is also given concerning the use of certain supplies which are for the purpose of helping to keep well. This field manual addresses wounds, fractures/dislocations/ sprains, common emergencies and health measures, effects of severe cold and heat, measures for use in the jungle/tropics and in aircraft and tank injuries, transportation of sick and injured, war gases, and description and uses of first-aid kits and packets. The advancement of tactics used in managing pediatric airway disorders can be attributed to an overall growth of collective knowledge among medical health professionals. This book is designed to sustain that growth of knowledge, with 18 chapters of insight and information by distinguished medical experts in both pediatric anesthesia and pediatric otolaryngology. It concisely and thoroughly covers topics such as subglottic stenosis, pharyngeal airway obstruction, laryngeal airway obstruction, obesity and sleep apnea and thoracic airway obstruction, among others. Chapters include scenarios where the skills and expertise of both anesthesiologists and otolaryngologists are being continually tested; the use of newer drugs and repurposing of older drugs; the combination of smaller amounts of different types of sedatives while avoiding intra-op narcotics and maintaining spontaneous ventilation are described in detail; Finally, a comprehensive review of new research emerging about ultra-rapid narcotics metabolizers among patients, making them more susceptible to medications, such as codeine, along with the latest information on the purported potential neurodevelopmental toxicity of some anesthetic agents are also included. Working as both an educational tool and a practical resource, medical practitioners, students and educators will find this text to be a valuable tool for the safely managing the pediatric patient undergoing anesthesia for difficult airway scenarios. **NEW YORK TIMES BESTSELLER** • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results

shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds. This guide outlines the planning, boats and accessories sailors of small sailboats need to safely embark on ambitious journeys. A memoir by a WWI fighter pilot, with the adventurous spirit of War Horse and the charm of The Little Prince A singular, lyrical book, Sagittarius Rising is at once an exuberant memoir from the Lost Generation and a riveting tale of the early days of flight during World War I. Cecil Lewis lied his way into the British Army's Royal Flying Corps at age sixteen and was ordered to a squadron on the Western Front only a year later. At the time, flying was so new that designers hadn't even decided on basic mechanics such as how many wings a plane should have. Despite this, Lewis mastered virtually every kind of single-engine plane in the RFC, going on to excel in active duty and even to dogfight the Red Baron—and live to tell the tale. Full of infectious charm and written with the prose and pacing of a novel, Sagittarius Rising beautifully recounts Lewis's harrowing exploits in the sky alongside his wild times of partying and chasing girls while on leave in London. His coming-of-age story is unlike any other WWI memoir you've read before. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world.
