

$P_s = 40 \text{ kW}$
 $P_{\text{line}} = 16 \text{ kW}$

$V_L = ?$

$$I = \frac{P_s}{V_L \cos(\theta)}$$

$$\theta = \cos^{-1}\left(\frac{P_{\text{line}}}{P_s}\right)$$
$$\theta = \cos^{-1}\left(\frac{16}{40}\right) = 25.39^\circ$$

$$\theta = \angle V - \angle I \Rightarrow \angle I = \angle V - 25.39^\circ$$
$$P_{\text{line}} = I^2 R$$
$$R = \frac{1600}{(I \cos \theta)^2} = 0.16 \Omega$$

$$Q_{\text{line}} = I^2 X$$
$$X = \frac{2 \cdot 1 \cdot 160}{I^2 \sin^2 \theta} = 0.2 \Omega$$

$$V_L = V_s - I R$$
$$V_L = 110$$

Design after Capitalism Matthew Wizinsky, 2022-03-15 How design can transcend the logics structures and subjectivities of capitalism a framework theoretical grounding and practical principles The designed things experiences and symbols that we use to perceive understand and perform our everyday lives are much more than just props They directly shape how we live In *Design after Capitalism* Matthew Wizinsky argues that the world of industrial capitalism that gave birth to modern design has been dramatically transformed Design today needs to reorient itself toward deliberate transitions of everyday politics social relations and economies Looking at design through the lens of political economy Wizinsky calls for the field to transcend the logics structures and subjectivities of capitalism to combine design entrepreneurship with social empowerment in order to facilitate new ways of producing those things symbols and experiences that make up everyday life After analyzing the parallel histories of capitalism and design Wizinsky offers some historical examples of anticapitalist noncapitalist and postcapitalist models of design practice These range from the British Arts and Crafts movement of the nineteenth century to contemporary practices of growing furniture or biotextiles and automated forms of production Drawing on insights from sociology philosophy economics political science history environmental and sustainability studies and critical theory fields not usually seen as central to design he lays out core principles for postcapitalist design offers strategies for applying these principles to the three layers of project practice and discipline and provides a set of practical guidelines for designers to use as a starting point The work of postcapitalist design can start today Wizinsky says with the next project

Land Fictions D. Asher Ghertner, Robert W. Lake, 2021-03-15 *Land Fictions* explores the common storylines narratives and tales of social betterment that justify and enact land as commodity It interrogates global patterns of property formation the dispossessions property markets enact and the popular movements to halt the growing waves of evictions and land grabs This collection brings together original research on urban rural and peri urban India rapidly urbanizing China and Southeast Asia resource expropriation in Africa and Latin America and the neoliberal urban landscapes of North America and Europe Through a variety of perspectives *Land Fictions* finds resonances between local stories of land's fictional powers and global visions of

landed property's imagined power to automatically create value and advance national development. Editors D. Asher Ghertner and Robert W. Lake unpack the dynamics of land commodification across a broad range of political, spatial, and temporal settings, exposing its simultaneously contingent and collective nature. The essays advance understanding of the politics of land while also contributing to current debates on the intersections of local and global, urban and rural, and general and particular. Contributors: Erik Harms, Michael Watts, Sai Balakrishnan, Brett Christophers, David Ferring, Sarah Knuth, Meghan Morris, Benjamin Teresa, Mi Shih, Michael Levien, Michael L. Dwyer, Heather Whiteside.

The Environmental Rights Revolution David R. Boyd, 2011-11-29. The right to a healthy environment has been the subject of extensive philosophical debates that revolve around the question: Should rights to clean air, water, and soil be entrenched in law? David Boyd answers this by moving beyond theoretical debates to measure the practical effects of enshrining the right in constitutions. His pioneering analysis of 193 constitutions and the laws and court decisions of more than 100 nations in Europe, Latin America, Asia, and Africa reveals a positive correlation between constitutional protection and stronger environmental laws, smaller ecological footprints, superior environmental performance, and improved quality of life. *Encyclopedia of Perception*. E. Bruce Goldstein, 2009-09-15. The field of perception is devoted to explaining the operation of the senses and the experiences and behaviors resulting from stimulation of the senses. Perceptual processes such as recognizing faces, seeing color, hearing music, and feeling pain represent the actions of complex mechanisms yet we usually do them easily. The *Encyclopedia of Perception* presents a comprehensive overview of the field of perception through authoritative essays written by leading researchers and theoreticians in psychology, the cognitive sciences, neuroscience, and medical disciplines. It presents two parallel and interacting approaches: the psychophysical or determining the relationship between stimuli in the environment and perception, and the physiological or locating the biological systems responsible for perception. Are there any processes not associated with perception? Surely there are, but the pervasiveness of perception is truly impressive, and the phenomena of perception and its mechanisms are what this encyclopedia is about. **Key Features:** Contains 16 pages of color illustration and photography to accompany the entries. Offers a varied and broad list of topics including basic research as well as methodologies, theoretical approaches, and real-world applications of perceptual research. Emphasizes human perception but includes ample research because of its importance in its own right and because of what this research tells us about human perception. Written by recognized experts from many disciplines but for an audience with no previous background in perception: students and members of the general public alike. **Key Themes:** Action, Attention, Audition, Chemical Senses, Cognition and Perception, Computers and Perception, Consciousness, Disorders of Perception, Illusory Perceptions, Individual Differences, Human and Comparative Across Species, Not Including Ageing, Disorders and Perceptual Development, Methods, Perceptual Development, Experience, Philosophical Approaches, Physiological Processes, Sense Interaction, Skin and Body Senses, Theoretical Approaches, Visual Perception.

The Right to a Healthy Environment David R. Boyd, 2012-10-03

Canada has abundant natural wealth beautiful landscapes vast forests and thousands of rivers and lakes The land defines Canadians as a people yet the country has one of the worst environmental records in the industrialized world Building on his previous book *The Environmental Rights Revolution* 2012 David R Boyd one of Canada's leading environmental lawyers describes how recognizing the constitutional right to a healthy environment could have a transformative impact by empowering citizens holding governments and industry accountable and improving Canada's green record The overwhelming majority of the world's nations now recognize environmental rights through laws constitutions treaties or court decisions Boyd explores Canada's history of failed efforts to do the same within this international context and offers three pathways to constitutional recognition of the right to a healthy environment This important and provocative book provides a blueprint for renewed leadership in protecting human health the well being of the planet and the interests of future generations

Cincinnati's Underground Railroad Richard Cooper and Dr. Eric R. Jackson, 2014 Cincinnati played a large part in creating a refuge for escaped slaves and in the Underground Railroad movement Nearly a century after the American Revolution the waters of the Ohio River provided a real and complex barrier for the United States to navigate While this waterway was a symbol of freedom and equality for thousands of enslaved black Americans who had escaped from the horrible institution of enslavement the Ohio River was also used to transport thousands of slaves down the river to the Deep South Due to Cincinnati's location on the banks of the river the city's economy was tied to the slave society in the South However a special cadre of individuals became very active in the quest for freedom undertaken by African American fugitives on their journeys to the North Thanks to spearheading by this group of Cincinnati trailblazers the Queen City became a primary destination on the Underground Railroad the first multiethnic multiracial multiclass human rights movement in the history of the United States

believed the criminal justice system worked that only guilty defendants were convicted DNA technology shattered that belief DNA has now freed more than three hundred innocent prisoners in the United States This book examines the lessons learned from twenty five years of DNA exonerations and identifies lingering challenges By studying the dataset of DNA exonerations we know that precise factors lead to wrongful convictions These include eyewitness misidentifications false confessions dishonest informants poor defense lawyering weak forensic evidence and prosecutorial misconduct In Part I scholars discuss the efforts of the Innocence Movement over the past quarter century to expose the phenomenon of wrongful convictions and to implement lasting reforms In Part II another set of researchers looks ahead and evaluates what still needs to be done to realize the ideal of a more accurate system

Ancient Monuments of the Mississippi Valley Ephraim G. Squier, Edwin H. Davis, 1998 Originally published in 1848 as the first major work in the nascent discipline as well as the first publication of the newly established Smithsonian Institution Ancient Monuments of the Mississippi Valley remains today not only a key document in the history of American archaeology but also the primary source of information on hundreds of mounds and earthworks in the eastern United States most of which have now vanished Despite adhering to the popular assumption that the moundbuilders could not have been the ancestors of the supposedly savage Native American groups still living in the region the authors set high standards for their time Their work provides insight into some of the conceptual methodological and substantive issues that archaeologists still confront Long out of print this 150th anniversary edition includes David J Meltzer's lively introduction which describes the controversies surrounding the book's original publication from a bitter decades long feud between Squier and Davis to widespread debates about the links between race religion and human origins Complete with a new index and bibliography and illustrated with the original maps plates and engravings Ancient Monuments of the Mississippi Valley provides a new generation with a first hand view of this pioneer era in American archaeology
