Error Analysis and Interlanguage Stephen Pit Corder,1981      **The Native Speaker in Applied Linguistics** Alan Davies,1991      *Idiosyncratic Dialects and Error Analysis* Stephen Pit Corder,1971      A Contrastive Metrical Analysis of Main Word Stress in English and Cairene Colloquial Arabic Mohamed Fathy Khalifa,2017-06-20 This book analyses Cairenes interlingual errors in English main word stress following Halle and Vergnaud s 1987 metrical model and Archibald s 1998 parameter resetting The findings show the difficulty the research subjects had in stressing items with stress different from Cairene Colloquial Arabic CCA and with stress similar to CCA The book also shows that the subjects correct stress patterns were due to parameter resetting and that English stress patterns that are both different and more marked than corresponding CCA stress patterns caused learning difficulties for the subjects      An Introduction to Language and Linguistics Dr. Pandey Om Prakash,2021-12-28 This book has been designed for Undergraduate and Postgraduate students of English Language and Literature The six sections of the book contain diffuse topics scattered across various books Language Linguistics Phonetics Teaching of English language Functional Grammar Communicative English Each section is followed by an exercise of objective questions which consolidate the subject learned in the previous section This book will prove to be an effective tool in the hands of students preparing for their university examinations as well as various competitive examinations      **Language Teaching and Language Use in Non-Native Settings** Antoine Willy Ndzotom Mbakop,Nicoline Agbor Tabe,2020-09-11 From Cameroon to Turkey through Jordan this short volume illuminates the discrepancy between stated language teaching norms and real life language use in non native settings It underscores the limitations of teaching materials styles and methods with regard to learners communication needs and provides well matched answers to foreign language classroom problems This book will be of interest to language teachers and researchers who will gain an insight into the challenges of the foreign language class in different non native milieus and therefore enrich their teaching competence Educational policy makers can also use it as a guide for designing contextually appropriate curricula and materials      **Errors and Intelligence in Computer-Assisted Language Learning** Trude Heift,Mathias Schulze,2007-11-13 This book provides the first comprehensive overview of theoretical issues historical developments and current trends in ICALL Intelligent Computer Assisted Language Learning It assumes a basic familiarity with Second Language Acquisition SLA theory and teaching CALL and linguistics It is of interest to upper undergraduate and or graduate students who study CALL SLA language pedagogy applied linguistics computational linguistics or artificial intelligence as well as researchers with a background in any of these fields      **Introducing Applied Linguistics** Stephen Pit Corder,1993      **The Linguistic Toolkit for Teachers of English** Rolf Kreyer,2023-10-23 In contrast to literary or cultural studies linguistics is not taught in the EFL classroom yet it plays a major role in any English language teaching degree Given this

discrepancy it does not come as a surprise that students sometimes ask I want to be a teacher Why do I need all this The main goal of this textbook is to demonstrate the relevance of linguistic expertise for the EFL classroom It explores a wide range of topics phonetics phonology lexis corpus linguistics text linguistics and the power of language with a clear focus on providing a convincing answer to the question above With its highly accessible style and layout a wealth of examples and exercises as well as a large range of additional innovative online materials this textbook sets out to convince its readers that they will be better teachers if they are good linguists

**Multiple Perspectives on Language Play** Nancy

Bell,2016-12-19 Interest in language play and linguistic creativity has increased in recent years and the topic has been taken up from a variety of perspectives In this book disparate approaches to the topic are brought together demonstrating that a number of phenomena whose similarities might not have been immediately recognized have an academic home under the umbrella of language play and linguistic creativity The contributions to this collection illustrate the variety of questions that can be asked regarding the social cognitive emotional political and cultural mechanisms and significance of innovative linguistic practices and point to new directions of inquiry Furthermore the work exemplifies a variety of ways in which this research can be carried out as well as the range of contexts in which it might be investigated including second language classrooms online settings and workplaces Taken together the chapters serve to illustrate the range of work that we will be accepting in the Language Play and Creativity series viewed individually each makes a unique contribution to some aspect of our understanding of creative language use

**The Bilingual Mental Lexicon** Longxing Wei,2019-11-13 This book

proposes the Bilingual Lemma Activation Model as a method for exploring the nature and activity of the bilingual mental

lexicon in both speech production and language acquisition This model claims that the bilingual s two languages are not equally activated in code switching one playing a crucial role in grammatical frame building and the other being activated at a lexical level due to psycholinguistic reasons To test this model the book analyzes bilingual speech data from naturally occurring intrasentential code switching instances involving various language pairs A second claim of this model is that code switching naturally occurs because certain lemmas underlying some particular lexical items stored in the bilingual mental lexicon are language specific and such lemmas are in contact in bilingual speech To further test this model second language acquisition data are analyzed here to describe and explain sources of language transfer at the level of abstract lexical structure Thus from some psycholinguistic perspectives this model views bilingual speech involving code switching and interlanguage performance data as predictable outcomes of bilingual systems in contact This book will appeal to graduate students and researchers in both theoretical and applied linguistics

[Errors in English Pronunciation among Arabic Speakers](#) Mohamed Fathy Khalifa, 2020-01-17 This book is a contrastive analysis of Arabs errors in English pronunciation regarding segmentals consonants consonant clusters and vowels and suprasegmentals main word stress It also explains the main interlingual reasons behind these errors and presents some teaching suggestions for surmounting them The findings show that the subjects substitute their own Arabic sounds for unfamiliar English ones producing incorrect English sounds In addition they apply Arabic main word stress rules instead of English ones producing incorrect English stress patterns The book also shows that English sounds and stress patterns that are both different and more marked than corresponding Arabic ones caused learning difficulties for the subjects
