Major Depressive Disorder (MDD) is one of the most prevalent psychiatric disorders, with a lifetime prevalence rate of roughly 20%. MDD is a leading cause of disability and premature death worldwide, leads to greater impairment in work functioning than other chronic medical conditions, and has an estimated annual cost of \$210 billion in the US. The proposed text is designed for mental health professionals and will present state-of-the-art treatment options that are used in the Depression Clinical and Research Program (DCRP)

at the Massachusetts General Hospital. The text provides different treatment options so that providers can 'think outside the box' of conventional interventions. The introductory sections discuss general themes about diagnosing and treating depression. The major body of the book, however, consists of chapters organized under the topics of new medication, new psychotherapy, alternative treatments, and consideration of specific populations and how to modify interventions to best treat these patients. Each chapter begins with a case vignette to illustrate key characteristics of the disorder process or treatment and reviews the history, research support, and new advances of these topics. In addition, the chapters include a description of how to apply this topic in treatment and frequently asked questions and answers. This book will be a unique contribution to the field. Existing guides focus on individual treatments of Depression, or include brief descriptions of interventions as a whole. The DCRP has consistently been a forerunner of clinical treatments for depression and often treats challenging cases of this disorder. This book will provide a practical and useful resource with wide applicability. First published in 1973, this book considers the differences between mainstream schools and special educational needs schools, for children with learning disabilities. It contains a wealth of research data, case history material and reference to existing literature, designed to answer many questions which parents, heads, and schoolteachers have asked. Questions considered include whether children with disabilities do as well in ordinary schools as children without, whether they are as happy and well adjusted, and how they fit into the social structure of the class. The book also looks at whether much teasing occurs and how practical difficulties can be overcome. The Manual for Courts-Martial (MCM), United States (2012 Edition) updates the MCM (2008 Edition).
