

Moral values, ethics and philosophy

5 pages | 1231 words

The dream of a child starts with a stereo type suggestion from parents that the baby will be a doctor - engineer. The baby has no other option to dream of being doctor or engineer. Our education system was framed by the British rulers to create civil servants to serve their purpose. They had created dreams of civil service. As a legacy of the British and the Pakistani system we inherited Bangladesh Civil Service (BCS). However, the glory of civil service has been fading gradually. Education system at home and abroad now aims at creating good executives. The present dream of the youngsters is to find jobs in mobile phone company.

Considering the good market, the private entrepreneurs established a number of private universities where degrees are offered on Computer science, Engineering, Medical Science and Business Administration. These universities have less interest in social science. Philosophy is a less prioritised subject in the university and hardly any student is found having interest to study Philosophy.

The people living in the 21st century have no time to waste in a very ancient field of study like philosophy. People now send their children to universities to groom them up as future executives in Multinational companies. Students are more interested to obtain professional degrees rather than education in social science. The new generation has different attitude towards life style, human relation, demand and satisfaction

We can not live alone. The world is one family and living in this planet demands co-operation with others. Philosophy teaches the discipline of humanity. It defines how to think, how to reason, how to put together good arguments, how to analyse alternatives and action and evaluate its consequences.

Human society creates ideas and thoughts; philosophy guides principle of human life. Without it, there can be no real government, no institution. It is philosophy that has created human ideologies, interpretations, and viewpoints. Philosophy is at the heart of every issue, at the center of every change within society, and within every radical movement human beings have created. Any tradition, any ideology, any religion has behind them a philosophy. The problem perhaps is that common people in today's society do not like complicated thoughts, the moment they see an obstacle, they scream in rage, they want the simplistic philosophy of a society that consumes and moves and moves and never stops.

The consumption loving practical people believe that there is no particular use for philosophy, because it deals with intangible ideas, which cannot be proved scientifically or verified objectively, and which have nothing to do with providing greater creature comforts or material progress.

The teaching starts with parents telling what it is wrong to lie, cheat, and steal. These children grow up and enter into the real world with some knowledge of right and wrong. But ethics are learnt throughout our lives as we associate with others. In the work place, people learn responsibility, teamwork, punctuality, and communication skills.
