### Issue of Bullying in Schools

Bullying, it is a very rampant problem in schools, kids are bullied in schools every day. So bullying should be a prioritized problem. Bullying Needs to be prioritized by schools because many kids have been bullied, there are many people who are standing up against bullying, and it is not being prioritized as it should by schools. This is not fair to any of the students that schools have not prioritized Bullying

The first reason bullying needs to be prioritized by schools because many students have been bullied and harmed in schools. "Almost 60% of middle school kids have claimed to be bullied," this was in many articles that I read and this shows that there are many kids who are bullied in their schools. This fits in with my claims because there should not be as many kids continuously being bullied as there is now. Another example of this is almost 3 million kids do not go to school because of their bully's. This shows that bullying needs to be prioritized by schools, and then n it going to school could affect their life in the long term and not allow them to be able to get a good job and continue to get education.

Another reason bullying needs to be prioritized by schools is because there are many people and teens that are standing against the bullying. Alex Libby is one example of this because he appeared in the documentary "bully" which was liked "more than 120,000 times on facebook" by people who may be bullied. This is in line with the claim because many teaches could have seen Alex Libby, who also appeared in another b ugly movie called "The bully affect" and seen the harmful affect that bullying can have on kids or students. Another example of a person who stands up to bullying is a woman by the name of Emily-Anne Rigal, she wants to stop bullying and started a organization called "WeStopHate" which is focused on bullying and cyber bullying. This fits with the claim because having an Anti-bullying organization in schools can have a 50% decrease in bullying.

Finally, bullying should be stoped because schools are not prioritizing bullying as much as as there should be. "More than 40 states have bullying statutes, but less than half tell when a teacher should step in." This is to good because the teacher may not know when to step i, and like is some one is being continuously bullied , the students could say its just a joke or they are just kidding. This shows that bullying should be prioritized by schools and even create a protocol for it for bullying.

Another example of schools not doing as much as they should is they are not talking to their students as much, talking to students can be very beneficial to the students not being bullied. This fits with my claim because "only about 16% of school staff know that someone is being bullied." And also, "much of the time when someone is being bullied, adults are the last one to know," so the students could tell the students

Bullying has long been tolerated as a rite of passage among children and adolescents There is an implication that individuals who are bullied must have asked for this type of treatment or deserved it Sometimes even the child who is bullied begins to internalize this idea For many years there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate But bullying is not developmentally appropriate it should not be considered a normal part of the typical social grouping that occurs throughout a child's life Although bullying behavior endures through generations the milieu is changing Historically bullying has occurred at school the physical setting in which most of childhood is centered and the primary source for peer group formation In recent years however the physical setting is not the only place bullying is occurring Technology allows for an entirely new type of digital electronic aggression cyberbullying which takes place through chat rooms instant messaging social media and other forms of digital electronic communication Composition of peer groups shifting demographics changing societal norms and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents educators and school administrators health care providers policy makers families and others concerned with the care of children this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences

**Bullying in Schools** Ken Rigby, 2007 Bullying is now widely recognised as a serious problem that affects many children in schools It can take many forms including direct verbal and physical harassment and indirect forms such as deliberate exclusion and the targeting of individuals using cyber technology Continual and severe bullying can cause both short term and long term damage making it difficult for victims to form intimate relationships with others and for

habitual bullies to avoid following a delinquent lifestyle and becoming perpetrators of domestic violence Even though this type of abuse affects many of our school children Ken Rigby believes there are grounds for optimism This passionate and motivating book shows that there are ways of reducing the likelihood of bullying occurring in a school and effective ways of tackling cases when they do occur Using up to date studies *Bullying in Schools* helps us to understand the nature of bullying and why it so often takes place in schools Importantly it examines and evaluates what schools can do to promote more positive peer relationships within the school community and take effective and sustainable action to deal with problems that may arise Teachers parents school leaders policy makers and health professionals will find it invaluable and empowering
