FM 34-52 Intelligence Interrogation Department of Department of the Army,2017-12-13 The 1992 edition of the FM 34 52 Intelligence Interrogation Field Manual *Prosecutors in the Boardroom* Anthony S. Barkow,Rachel E. Barkow,2011-04-18 Who should police corporate misconduct and how should it be policed In recent years the Department of Justice has resolved investigations of dozens of Fortune 500 companies via deferred prosecution agreements and non prosecution agreements where instead of facing criminal charges these companies become regulated by outside agencies Increasingly the threat of prosecution and such prosecution agreements is being used to regulate corporate behavior This practice has been sharply criticized on numerous fronts agreements are too lenient there is too little oversight of these

agreements and perhaps most important the criminal prosecutors doing the regulating aren't subject to the same checks and balances that civil regulatory agencies are. Prosecutors in the Boardroom explores the questions raised by this practice by compiling the insights of the leading lights in the field including criminal law professors who specialize in the field of corporate criminal liability and criminal law, a top economist at the SEC who studies corporate wrongdoing and a leading expert on the use of monitors in criminal law. The essays in this volume move beyond criticisms of the practice to closely examine exactly how regulation by prosecutors works. Broadly the contributors consider who should police corporate misconduct and how it should be policed and in conclusion offer a policy blueprint of best practices for federal and state prosecution. Contributors: Cindy R. Alexander, Jennifer Arlen, Anthony S. Barkow, Rachel E. Barkow, Sara Sun Beale, Samuel W. Buell, Mark A. Cohen, Mariano Florentino Cuellar, Richard A. Epstein, Brandon L. Garrett, Lisa Kern Griffin, and Vikramaditya Khanna.

Satellite Remote Sensing Rosa Lasaponara, Nicola Masini, 2012-01-18. This book provides a state of the art overview of satellite archaeology and it is an invaluable volume for archaeologists, scientists and managers interested in using satellite Earth Observation (EO) to improve the traditional approach for archaeological investigation, protection and management of Cultural Heritage. The recent increasing development of EO techniques and the tremendous advances in Information and Communication Technologies (ICT) have resulted primarily in Cultural Heritage applications. The book focuses on new challenging prospects for the use of EO in archaeology, not only for probing the subsurface to unveil sites and artifacts but also for the management and valorization as well as for the monitoring and preservation of cultural resources. The book provides a first class understanding of this revolutionary scenario which was unthinkable several years ago. The book offers: i) an excellent collection of outstanding articles focusing on satellite data processing, analysis and interpretation for archaeological applications; ii) impressive case studies; iii) striking examples of the high potential of the integration of multi-temporal, multi-scale, multi-sensors techniques. Each chapter is composed as an authoritative contribution to help the reader grasp the value of its content. The authors are renowned experts from the international scientific community. Audience: This book will be of interest to scientists in remote sensing applied to archeology, geoarchaeology, paleo-environment, paleo-climate and cultural heritage.
