The Special Issue "Industrial and Technological Applications of Power Electronics Systems" focuses on: - new strategies of control for electric machines, including sensorless control and fault diagnosis; - existing and emerging industrial applications of GaN and SiC-based converters; - modern methods

for electromagnetic compatibility. The book covers topics such as control systems, fault diagnosis, converters, inverters, and electromagnetic interference in power electronics systems. The Special Issue includes 19 scientific papers by industry experts and worldwide professors in the area of electrical engineering. *Using Biographical Methods in Social Research* provides an informative, comprehensive, accessible and practical guide to the nature and use of biographical methods, combining a consideration of theoretical issues with practical guidance. Barbara Merrill and Linden West consider important questions about what research is for, what makes it valid, to the practical business of interviewing, analyzing and writing up of biographical data. The authors draw on their sociological and psychological orientations to provide a truly interdisciplinary approach to the subject, and provide numerous examples of biographical research across the social sciences. Final work by internationally acclaimed Australian author Gerald Murnane, reflecting on his career as a writer, and the fifteen books which have led critics to praise him as 'a genius on the level of Beckett'. A book which will appeal equally to Murnane's legion of fans, and to those new to his work, attracted by his reputation as a truly original Australian writer. In the first days of spring in his eighty-second year, Gerald Murnane began a project which would round off his career as a writer - he would read all of his books in turn and prepare a report on each. His original intention was to lodge the reports in two of his legendary archives, the Chronological Archive, which documents his life as a whole, and the Literary Archive, which is devoted to everything he has written. But as the reports grew, they themselves took on the form of a book, *Last Letter to a Reader*. The essays on each of his works travel through the capacious territory Murnane refers to as his mind: they dwell on the circumstances which gave rise to the writing, images, associations, reflections on the theory of fiction, and memories of a deeply personal kind. The final essay is on *Last Letter to a Reader*

itself: it considers the elation and exhilaration which accompany the act of writing, and offers a moving ending to what must surely be his last work as death approaches. 'Help me, dear one, to endure patiently my going back to my own sort of heaven.' 'No living Australian writer, not even Les Murray, has higher claims to permanence or a richer sense of distinction' — Sydney Morning Herald 'The emotional conviction...is so intense, the somber lyricism so moving, the intelligence behind the chiseled sentences so undeniable, that we suspend all disbelief.' — J.M. Coetzee In this guide, you will learn about all the basics of artificial intelligence. You'll learn what it is, how it works, and where it came from (or, in other words, how it all started). Aside from that, we'll dive into some data analytics and examples of artificial intelligence. We'll cover several steps in the analytical process, and see what it takes for artificial intelligence to be effective. Last but not least, safety and privacy issues will be brought to light, since today's age is full of hacking, spying, and theft. Therefore, it is mandatory that these devices and systems are kept safe and secure. If any of these topics interest you, then I encourage you to pick up this digital book and start reading or listening to the audio version. The Magnetic Wordplay Series is an excellent way to get your child excited about learning! Children will have hours of fun, exploring and practising, as they piece together sentences, rhymes and words. Two men struggle for possession of a small boat alone on the wasteland of the Sargasso Sea. High adventure! Spanning more than two centuries in Ireland, Castle on the Rise unites the legacy of three women who must risk mending their broken places for life, love, and the belief that even through the depths of our pain, a masterpiece of a story can emerge. When Laine Forrester travels overseas to attend her best friend's vineyard wedding, she expects to find the bride on the brink of a fairy-tale life. But after a series of unforeseen setbacks, it seems the storybook lives they'd imagined are suddenly ripping apart. With hopes of resurrecting a happy ending, Laine agrees to

accompany the newlyweds to the groom's home in Ireland—never expecting she'd be the one drawn in by its wide-open moors, backroads bordering the Irish Sea, and a mysterious castle that dares to keep its secrets hidden. From the storied streets of Dublin to the shores of the Emerald Isle, Laine is drawn in to the land and its rich history. The castle ruins whisper stories of Issy—a photojournalist battling through the 1916 Easter Rising, and Maeve—the castle's lady of legend, fighting for survival through the 1798 rebellion that started it all. Praise for *Castle on the Rise*: “Enchanting and mesmerizing!” —PATTI CALLAHAN, New York Times bestselling author of *Becoming Mrs. Lewis* “*Castle on the Rise* perfectly showcases rising star Kristy Cambron's amazing talent! Perfect pacing, lovely prose, and an intricate plot blend together in a delightful novel I couldn't put down. Highly recommended!” —Colleen Coble, USA TODAY bestselling author of *Secrets at Cedar Cabin* and the *Rock Harbor* series “Cambron's latest is one of her best. Gripping and epic, this intricately woven tale of three generations seeking truth and justice will stay with you long after the last page.” —Rachel Hauck, New York Times bestselling author *Second* in the *Lost Castle* series (*The Lost Castle*, *Castle on the Rise*, *The Painted Castle*) Can be read as a stand-alone, but best if read in order

And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He's finally living alone and working on his syndicated comic strip in privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she'll be gone in a few months... Except now she's determined to find her perfect match by checking out every eligible male in the town, and her choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs? Each book in the Patterson's Bluff series is STANDALONE: \* The Aussie Next Door \* Her Aussie Holiday This book consists of two titles, which are the following: Book 1: In this guide, you will learn about all the basics of artificial intelligence. You'll learn what it is, how it works, and where it came from (or, in other words, how it all started). Aside from that, we'll dive into some data analytics and examples of artificial intelligence. We'll cover several steps in the analytical process, and see what it takes for artificial intelligence to be effective. Last but not least, safety and privacy issues will be brought to light, since today's age is full of hacking, spying, and theft. Therefore, it is mandatory that these devices and systems are kept safe and secure. Book 2: Many people have unanswered questions about artificial intelligence. Today, the majority of those questions will likely be answered. Concerns will be addressed, and examples will be given. This book starts off with a question and answer section about artificial intelligence. It then proceeds to cover specific artificially intelligent applications, such as chatbots and robotics. These pages will show details of things that puzzle many people's minds. But you won't be left in the dark and will enjoy the full benefits of this knowledge. Get ready for The Undoing, soon to be the most talked about TV of 2020. From the creators of Big Little Lies, The Undoing premieres this autumn starring Nicole Kidman, Hugh Grant and Donald Sutherland. 'A great psychological thriller ... I couldn't put it down.' Daisy Goodwin 'Gripping . . . had

me in its thrall from page one . . . Brilliant.' MetroA New York Times bestseller Grace Sachs, a happily married therapist with a young son, thinks she knows everything about women, men and marriage. She is about to publish a book called *You Should Have Known*, based on her pet theory: women don't value their intuition about men, leading to serious trouble later on. But how well does Grace know her own husband? She is about to find out, and in the place of what she thought she knew, there will be a violent death, a missing husband, and a chain of terrible revelations. Left behind in the wake of a very public disaster, and horrified by the ways in which she has failed to heed her own advice, Grace must dismantle one life and create another for herself and her child. Published previously under the title *You Should Have Known* This book connects the different topics and professions involved in information technology approaches to architectural design, ranging from computer-aided design, building information modeling and programming to simulation, digital representation, augmented and virtual reality, digital fabrication and physical computation. The contributions include experts' academic and practical experiences and findings in research and advanced applications, covering the fields of architecture, engineering, design and mathematics. What are the conditions, constraints and opportunities of this digital revolution for architecture? How do processes change and influence the result? What does it mean for the collaboration and roles of the partners involved. And last but not least: how does academia reflect and shape this development and what does the future hold? Following the sequence of architectural production - from design to fabrication and construction up to the operation of buildings - the book discusses the impact of computational methods and technologies and its consequences for the education of future architects and designers. It offers detailed insights into the processes involved and considers them in the context of our technical, historical, social and cultural environment. Intended mainly for

After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest

of his life. It's a summer internship. Never mind that the owners are hot. Never mind that there are three of them. Never mind that they are twice her age. Never mind that they have a secret "play" room in the basement. Never mind that she's never been more intrigued in her life. She only has three months. No matter how deeply she gets involved, she can't stay... Chosen by People and USA Today as a Great Summer Read Georgia Waltz has an enviable life: a plush Manhattan apartment, a Hamptons beach house, two bright twenty-something daughters, and a seemingly perfect marriage. But when Ben dies suddenly, she discovers that her perfect lawyer-husband has left them nearly penniless. As Georgia scrambles to support the family, she and her daughters plumb for the grit required to reinvent their lives, and Georgia even finds that new love is possible in the land of Spanx. Inspiring, funny, and deeply satisfying, *The Widow Waltz* is a compulsively readable tale of forgiveness, healing, and the bonds between mothers and daughters. Learning that Hazel Marie is pregnant with twins and that the father, private investigator J. D. Pickens, has left town, Miss Julia summons the wayward man to solve a local theft in the hopes of reuniting the couple. By the author of *Miss Julia Paints the Town*. The internal combustion engine was invented around 1790 by various scientists and engineers worldwide. Since then the engines have gone through many modifications and improvements. Today, different applications of engines form a significant technological importance in our everyday lives, leading to the evolution of our modern civilization. The invention of diesel and gasoline engines has definitely changed our lifestyles as well as shaped our priorities. The current engines serve innumerable applications in various types of transportation, in harsh environments, in construction, in diverse industries, and also as back-up power supply systems for hospitals, security departments, and other institutions. However, heavy duty or light duty engines have certain major disadvantages, which are well known to everyone. With the increasing usage of

diesel and gasoline engines, and the constantly rising number of vehicles worldwide, the main concern nowadays is engine exhaust emissions. This book looks at basic phenomena related to diesel and gasoline engines, combustion, alternative fuels, exhaust emissions, and mitigations. The Bad Boy Series Collection I've been in love with Hunter Saint my entire life. He was my first love and the one I could never forget. Then Fate intervened and we became enemies. Lund's is a sexy new novella series, featuring a bad boy with a heart of gold and a heroine who can't get him out of her life or her heart. When Fate forces them back together again, can they deny what has long simmered between them? To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know. From, Your Secret Not Admirer "You'll want to keep this book close to your painting table....Guides you from the beginning with information on the materials you need and the basic steps involved."—Decorative Artist's Workbook. Can machines write books? Can artificial intelligence be used for business? Will touch screens be around, or will they be replaced by

voice recognition? What are deepfakes? How do self-driving cars work, and are they going to be a reality soon? These questions all come to light in this brief but informational book about artificial intelligence. Society is changing quickly because of automated systems in place that either benefit or undermine people's living style, jobs, and brains. Today, we explore what that future may hold. We will also look into options for civilians in today's modern world to adapt more quickly. Don't underestimate the rise of artificial intelligence. Understand the future. He taunts me for being a good girl and mocks my high standards. He's cruel, crass, and has enough confidence to last two lifetimes. And I hate him. It wouldn't matter so much if he were avoidable. But considering he's my older brother's best friend and roommate, I see him more than I'd ever want to. His sculpted abs and gorgeous eyes are wasted on such an arrogant man, which makes me hate him even more. Even though I've had a crush on him since I was ten, the feelings weren't mutual and he's always made that very clear. He's always loved getting under my skin and one night against my better judgment, I let him in my bed. I've succumbed to his manwhore ways, but that doesn't change a thing. Because the King is about to get played at his own game-and lose. Checkmate. Come home to 59 Memory Lane with a new novel from the top Kindle and USA Today bestselling author Celia Anderson! Hannibal, the mouse who boasts that he can do many things, gets into real trouble when he says that he can tickle a tiger and the other mice call his bluff.
