Logistics 4.0 and Future of Supply Chains İsmail İyigün, Ömer Faruk Görçün, 2021-11-14 This book provides a detailed theoretical background of Logistics 4.0 using real world examples and case studies and proposes a methodological framework to understand the technological revolutions happening in the present day from the perspective of logistics management. With the fourth industrial revolution, new technologies such as artificial intelligence, cloud computing, 3D printers, and the Internet of Things started to take greater prominence in the world of business. One of the sectors most affected by changes brought on by this Industry 4.0 is logistics, which has given rise to the concept of Logistics 4.0. Covering a wide range of topics on Logistics 4.0 such as warehousing, big data, 3D printing, robotics, and cloud computing, this book would be a valuable read for those involved in logistics management, academics, and students in the areas of supply chain management, logistics industry 4, and big data.

Global Logistics C. Donald J. Waters, 2007 Taking a truly international perspective, this book outlines the current situation and provides a wealth of useful ideas and practical information on all the current and future trends in logistics and distribution. This new edition contains new sections including logistics in China, central and eastern Europe.

Modern Logistics Management John F. Magee, William C. Copacino, Donald B. Rosenfield, 1985-10-02 This comprehensive overview of logistics provides a conceptual framework for understanding the logistics system, the integration of its basic elements, and its relationship to the overall firm. Discusses both manufacturing and physical distribution, new technologies in each of these areas, and how they related to each other and to the company. New topics covered range from approaches to strategic logistics planning and multi location inventory planning to international logistics issues and future directions. Includes case studies.

Switchpoints for the Future of Logistics Ingo Wieck, Martin Streichfuss, Thorsten Klaas-Wissing, Wolfgang Stölzle, 2011-11-04 Roland Berger Strategy Consultants and the University of St Gallen's Chair of Logistics Management conducted this study in order to identify and assess switchpoints that will shape the future of the logistics industry. Rather than making projections focused on a fixed point in time, the authors instead aimed to identify the most unpredictable developments that could impact logistics. Consequently, the topics for discussion range from fairly specific near future developments to more exploratory blue sky topics. Throughout their highly interesting discussions with respondents and experts, the authors encountered a wide range of uncommon and unexpected but not at all unlikely projections for the future.

Worldwide Logistics Ben G. Radstaak, Mark H. Ketelaar, 1998

Urban Logistics Michael Browne, Sönke Behrends, Johan Woxenius, Genevieve Giuliano, José Holguin-Veras, 2018-12-03 Approximately 80 per cent of European and American citizens live in an urban environment. Due to their large populations and extensive commercial establishments, urban areas require large quantities of goods and services for commercial and domestic use. This results in increasing levels of demand for freight transport services. Freight transport in towns and cities is a major contributor to environmental impacts, particularly to local air pollution and noise. Urban Logistics addresses public policy makers, freight transport companies, and receivers of supplies, providing them with the information and guidance to affect change in the logistics of the city. Urban Logistics is written by an outstanding team of international editors combining their expertise and using their research from leading business schools in Sweden and the US. There are also valuable contributions from academics and industry experts from companies and universities from all over the world. The book includes clear examples of initiatives that work and business case developments, as well as toolkits for policymakers and managers who are devising new initiatives. There is an in-depth examination of different aspects of urban logistics, such as retail logistics for cities, urban food supply chains, services, and the special logistics requirements involved in construction, waste management, and e-commerce and home delivery. There is also a focus on networks and partnerships and an analysis of innovation as a new constant.

Factors Affecting Transportation Logistics James Shuler, 2011-07-01 The purpose of this book Factors Affecting Transportation Logistics is to provide the reader a basic understanding of various factors that logistics decision makers use when making logistic-related decisions. There are two major factor categories: internal environmental factors and external environmental factors. Internal environmental factors are divided into four levels: individual, service, functional, and organizational levels. External environmental factors are divided into information technology, supply chain, globalization, and corporate structure.
