Geography Teacher Education and Professionalization Eyüp Artvinli, Inga Gryl, Jongwon Lee, Jerry T. Mitchell, 2022-11-02 This book focuses on how current and prospective teachers worldwide are prepared for the significant task of teaching geography given the important role of teachers. It eschews a traditional career-centric framework pre-service in service teaching in favor of a topical approach toward issues that all teachers face. The book updates thinking on geography education subfields such as GI education and fieldwork and traces important contemporary discourses such as digitalization and sustainability. The book further explains the broad variety of institutionalization of geography teacher education in various political systems. In short, this book collects strategies for geography teacher educators worldwide to provide insight into the challenges, conditions, and solutions present at the classroom and institutional level. As such, this book is a must-have for teacher educators and geography teachers worldwide.

Atlas of Hawai'i University of Hawaii at Hilo. Dept. of Geography, 1998-01-01 A large-format atlas includes 250 geographical, topographical, and reference maps, 215 color photographs, charts, and graphs, an introduction to Hawaiian place names, and essays on the state's physical, biological, cultural, and social environment. Simultaneous UP.

OECD Reviews of Evaluation and Assessment in Education: Georgia Li Richard, Ruochen, Kitchen Hannah, George Bert, Richardson Mary, Fordham Elizabeth, 2019-12-19 This review, developed in partnership with UNICEF, provides Georgia with recommendations to strengthen its evaluation and assessment system to focus on helping students learn. It will be of interest to countries that wish to strengthen their own evaluation and assessment systems and in turn improve educational outcomes.

Fundamentals of Geomorphology Richard John Huggett, 2011-03-15 This extensively revised, restructured, and updated edition continues to present an engaging and comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes while reflecting on the latest developments in the field. *Fundamentals of Geomorphology* begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss structure, structural landforms associated with plate tectonics, and those associated with volcanoes, impact craters, and folds, faults, and joints, process and form, landforms resulting from or influenced by the exogenic agencies of weathering, running water, flowing ice, and meltwater, ground ice, and frost, the wind, and the sea, landforms developed on limestone, and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. *Fundamentals of Geomorphology* provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.
