*Passing the Torch* Paul Attewell, David Lavin, 2007-04-05 The steady expansion of college enrollment rates over the last generation has been heralded as a major step toward reducing chronic economic disparities But many of the policies that broadened access to higher education including affirmative action open admissions and need based financial aid have come under attack in recent years by critics alleging that schools are admitting unqualified students who are unlikely to benefit from a college education In *Passing the Torch* Paul Attewell David Lavin Thurston Domina and Tania Levey follow students admitted under the City University of New York's open admissions policy tracking its effects on them and their children to find out whether widening college access can accelerate social mobility across generations Unlike previous research into the benefits of higher education *Passing the Torch* follows the educational achievements of three generations over thirty years The book focuses on a cohort of women who entered CUNY between 1970 and 1972 when the university began accepting all graduates of New York City high schools and increasing its representation of poor and minority students The authors survey these women in order to identify how the opportunity to pursue higher education affected not only their long term educational attainments and family well being but also how it affected their children's educational achievements Comparing the record of the CUNY alumnae to peers nationwide the authors find that when women from underprivileged backgrounds go to college their children are more likely to succeed in school and earn college degrees themselves Mothers with a college degree are more likely to expect their children to go to college to have extensive discussions with their children and to be involved in their children's schools All of these parenting behaviors appear to foster higher test scores and college enrollment rates among their children In addition college educated women are more likely to raise their children in stable two parent households and to earn higher incomes both factors have been demonstrated to increase children's educational success The evidence marshaled in this important book reaffirms the American ideal of upward mobility through education As the first study to indicate that increasing access to college among today's disadvantaged students can reduce educational gaps in the next generation *Passing the Torch* makes a powerful argument in favor of college for all

*Lower Ed* Tressie McMillan Cottom, 2017-02-28 More than two million students are enrolled in for profit colleges from the small family run operations to the behemoths brandished on billboards subway ads and late night commercials These schools have been around just as long as their bucolic not for profit counterparts yet shockingly little is known about why they have expanded so rapidly in recent years during the so called Wall Street era of for profit colleges In *Lower Ed* Tressie McMillan Cottom a bold and rising public scholar herself once a recruiter at two for profit colleges expertly parses the fraught dynamics of this big money industry to show precisely how it is part and parcel of the growing inequality plaguing the country today McMillan Cottom discloses the shrewd recruitment and marketing strategies that these schools deploy and explains how despite the well documented predatory practices of some and the campus closings of others ending for profit colleges won't end the vulnerabilities that made them the fastest growing sector of higher education at the turn of the twenty first century And she doesn't stop there With sharp insight and deliberate acumen McMillan Cottom delivers a comprehensive view of postsecondary for profit education by illuminating the experiences of the everyday people behind the shareholder earnings congressional battles and student debt disasters The relatable human stories in *Lower Ed* from mothers

struggling to pay for beauty school to working class guys seeking good jobs to accomplished professionals pursuing doctoral degrees illustrate that the growth of for profit colleges is inextricably linked to larger questions of race gender work and the promise of opportunity in America Drawing on more than one hundred interviews with students employees executives and activists Lower Ed tells the story of the benefits pitfalls and real costs of a for profit education It is a story about broken social contracts about education transforming from a public interest to a private gain and about all Americans and the challenges we face in our divided unequal society *The Sociological Imagination*, 2022 **Introduction to Sociology** George Ritzer, 2012-07-30 A long awaited introductory textbook from one of the biggest names in world sociology

Comparative Sociology of Examinations Fumiya Onaka, 2019-03-28 Contemporary societies are constructed constricted and constrained by various series of examinations Governments of both Western and non Western countries tend to conduct detailed multi layered and continuous systems of tests or examinations International tests such as PISA and TIMSS have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries Examinations therefore provide a methodological pivot for comparing a range of societies They enable us to contrast the West and the East the North and the South tribal and mass society ancient and postmodern civilization and so on Comparing parallel societies from across Asia the Middle East Europe and North America this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations It uses ethnographies interviews questionnaires documents statistics and big data analyses to make comparisons on broad scales of time and space In so doing it suggests hypotheses encompassing different kinds of societies in human history including those in the Axial Age and the Modern Ages **The Invention of Women** Oyèrónké Oyèwùmí, 1997-10 The woman question this book asserts is a Western one and not a proper lens for viewing African society A work that rethinks gender as a Western construction *The Invention of Women* offers a new way of understanding both Yoruban and Western cultures Oyewumi traces the misapplication of Western body oriented concepts of gender through the history of gender discourses in Yoruba studies Her analysis shows the paradoxical nature of two fundamental assumptions of feminist theory that gender is socially constructed in old Yoruba society and that social organization was determined by relative age *Sick Societies* Robert B. Edgerton, 2010-06-15 Author and scholar Robert Edgerton challenges the notion that primitive societies were happy and healthy before they were corrupted and oppressed by colonialism He surveys a range of ethnographic writings and shows that many of these so called innocent societies were cruel confused and misled

**Unveiling Inequality** Roberto Patricio Korzeniewicz, Timothy Patrick Moran, 2009-11-25 Despite the vast expansion of global markets during the last half of the twentieth century social science still most often examines and measures inequality and social mobility within individual nations rather than across national boundaries Every country has both rich and poor populations making demands via institutions political processes or even conflict on how their resources will be distributed But shifts in inequality in one country can precipitate accompanying shifts in another Unveiling Inequality authors Roberto Patricio Korzeniewicz and Timothy Patrick Moran make the case that within country analyses alone have not adequately illuminated our understanding of global stratification The authors present a comprehensive new framework that moves beyond national boundaries to analyze economic inequality and social mobility on a global scale and from a historical perspective Assembling data on patterns of inequality in more than ninety six countries Unveiling Inequality reframes the relationship between globalization and inequality within and between nations Korzeniewicz and Moran first examine two different historical patterns High Inequality Equilibrium and Low Inequality Equilibrium and question whether increasing equality democracy and economic growth are inextricably linked as nations modernize Inequality is best understood as a complex set of relational interactions that unfold globally over time So the same institutional mechanisms that have historically reduced inequality within some nations have also often accentuated the selective exclusion of populations from poorer countries and enhanced high inequality equilibrium between nations National identity and citizenship are the fundamental contemporary bases of stratification and inequality in the world the authors conclude Drawing on these insights the book recasts patterns of

mobility within global stratification The authors detail the three principal paths available for social mobility from a global perspective within country mobility mobility through national economic growth and mobility through migration Korzeniewicz and Moran provide strong evidence that the nation where we are born is the single greatest determining factor of how we will live Too much sociological literature on inequality focuses on the plight of have nots in wealthy nations who have more opportunity for social mobility than even the average individual in nations perennially at the bottom of the wealth distribution scale Unveiling Inequality represents a major paradigm shift in thinking about social inequality and a clarion call to reorient discussions of economic justice in world historical global terms **Sociology** David M. Newman, 2011-11-23 The intro textbook that keeps students reading Continuing his tradition of highly engaging trade like writing best selling author David Newman once again starts in a familiar place the everyday world and then introduces sociological concepts and institutions as they influence students daily existence Full of vivid real world examples and touching personal vignettes this text offers a solid introduction to basic sociological concepts and helps students realize their role in constructing planning maintaining and fixing society New to the Ninth Edition all statistical information and all contemporary illustrative examples have been updated to keep the book as fresh as possible both from the students and instructors perspectives micro macro connections help students better understand the link between individual lives and the structure of society research features expose students to the importance and functionality of social scientific research visual essays have been strategically changed to provide a fresh perspective
