Nature-Based Solutions for Flood Mitigation Carla S. S. Ferreira, Zahra Kalantari, Thomas Hartmann, Paulo Pereira, 2022-05-30 This book provides an overview of the typical nature based solutions NBS used for flood mitigation at different scales and in different areas e.g. from catchment to hillslope scale from urban to coastal areas NBS can provide several ecosystem services such as water regulation and water quality enhancement and as such offer relevant technical solutions to complement typical grey infrastructures to mitigate flood hazard and water quality problems In recent years political awareness and interest from the scientific community have led to increasing implementation of NBS worldwide In light of this trend this book provides valuable insights into the environmental aspects of NBS particularly their effectiveness for flood and pollution mitigation and discusses socio economic aspects related to the implementation of NBS including regulatory aspects cost and citizens perceptions of NBS Compiling the latest research the book furthers our understanding of the role of NBS for flood mitigation and its relation to environmental aspects to guide scientists and stakeholders in future NBS projects It is intended for the scientific community and stakeholders such as spatial planners and landscape managers Chapter Nature based solutions for flood mitigation and resilience in urban areas is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

A New Coast Jeffrey Peterson, 2019-11-26 This is a timely book It should be mandatory reading Minnesota Star Tribune More severe storms and rising seas will inexorably push the American coastline inland with profound impact on communities infrastructure and natural systems In A New Coast Jeffrey Peterson draws a comprehensive picture of how storms and rising seas will change the coast Peterson offers a clear eyed assessment of how governments can work with the private sector and

citizens to be better prepared for the coming coastal inundation Drawing on four decades of experience at the Environmental Protection Agency and the United States Senate Peterson presents the science behind predictions for coastal impacts He explains how current policies fall short of what is needed to effectively prepare for these changes and how the Trump Administration has significantly weakened these efforts While describing how and why the current policies exist he builds a strong case for a bold new approach tackling difficult topics including how to revise flood insurance and disaster assistance programs when to step back from the coast rather than build protection structures how to steer new development away from at risk areas and how to finance the transition to a new coast Key challenges including how to protect critical infrastructure ecosystems and disadvantaged populations are examined Ultimately Peterson offers hope in the form of a framework of new national policies and programs to support local and state governments He calls for engagement from the private sector and local and national leaders in a campaign for a new coast A New Coast is a compelling assessment of the dramatic changes that are coming to America s coast Peterson offers insights and strategies for policymakers planners and business leaders preparing for the intensifying impacts of climate change along the coast
