Understanding the Working College Student Laura W. Perna, 2023-07-14 How appropriate for today and for the future are the policies and practices of higher education that largely assume a norm of traditional age students with minimal on campus or no work commitments Despite the fact that work is a fundamental part of life for nearly half of all undergraduate students with a substantial number of traditional dependent undergraduates in employment and working independent undergraduates averaging 34 5 hours per week little attention has been given to how working influences the integration and engagement experiences of students who work especially those who work full time or how the benefits and costs of working differ between traditional age students and adult students The high and increasing prevalence and intensity of working among both dependent and independent students raises a number of

important questions for public policymakers college administrators faculty academic advisors student services and financial aid staff and institutional and educational researchers including Why do so many college students work so many hours What are the characteristics of undergraduates who work What are the implications of working for students educational experiences and outcomes And how can public and institutional policymakers promote the educational success of undergraduate students who work This book offers the most complete and comprehensive conceptualization of the working college student available It provides a multi faceted picture of the characteristics experiences and challenges of working college students and a more complete understanding of the heterogeneity underlying the label undergraduates who work and the implications of working for undergraduate students educational experiences and outcomes The volume stresses the importance of recognizing the value and contribution of adult learners to higher education and takes issue with the appropriateness of the term non traditional itself both because of the prevalence of this group and because it allows higher education institutions to avoid considering changes that will meet the needs of this population including changes in course offerings course scheduling financial aid and pedagogy

**Drug Dealer, MD** Anna Lembke, 2016-11-15 The disturbing connection between well meaning physicians and the prescription drug epidemic Three out of four people addicted to heroin probably started on a prescription opioid according to the director of the Centers for Disease Control and Prevention In the United States alone 16 000 people die each year as a result of prescription opioid overdose But perhaps the most frightening aspect of the prescription drug epidemic is that it s built on well meaning doctors treating patients with real problems In Drug Dealer MD Dr Anna Lembke uncovers the unseen forces driving opioid addiction nationwide Combining case studies from her own practice with vital statistics drawn from public policy cultural anthropology

and neuroscience she explores the complex relationship between doctors and patients the science of addiction and the barriers to successfully addressing drug dependence and addiction Even when addiction is recognized by doctors and their patients she argues many doctors don t know how to treat it connections to treatment are lacking and insurance companies won t pay for rehab Full of extensive interviews with health care providers pharmacists social workers hospital administrators insurance company executives journalists economists advocates and patients and their families Drug Dealer MD is for anyone whose life has been touched in some way by addiction to prescription drugs Dr Lembke gives voice to the millions of Americans struggling with prescription drugs while singling out the real culprits behind the rise in opioid addiction cultural narratives that promote pills as quick fixes pharmaceutical corporations in cahoots with organized medicine and a new medical bureaucracy focused on the bottom line that favors pills procedures and patient satisfaction over wellness Dr Lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system the solution for which lies in rethinking how health care is delivered
