Daniel Tammet, 2007-01-09 A journey into one of the most fascinating minds alive today guided by the owner himself Bestselling author Daniel Tammet Thinking in Numbers is virtually unique among people who have severe autistic disorders in that he is capable of living a fully independent life and able to explain what is happening inside his head He sees numbers as shapes colors and textures and he can perform extraordinary calculations in his head He can learn to speak new languages fluently from scratch in a week In 2004 he memorized and recited more than 22 000 digits of pi setting a record He has savant syndrome an extremely rare condition that gives him the most unimaginable mental powers much like those portrayed by Dustin Hoffman in the film Rain Man Fascinating and inspiring Born on a Blue Day explores what it s like to be special and gives us an insight into what makes us all human our minds **How to Change Your Mind** Michael Pollan, 2019-05-14 Now on Netflix as a 4 part documentary series Pollan keeps you turning the pages clear-eyed and assured New York Times A 1 New York Times Bestseller New York Times Book Review 10 Best Books of 2018 and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs and the spellbinding story of his own life changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin the active ingredient in magic mushrooms are being used to provide relief to people suffering from difficult to treat conditions such as depression addiction and anxiety he did not intend to write what is undoubtedly his most personal book But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life he decided to explore the landscape of the mind in the first person as well as the third Thus began a singular adventure into various altered states of consciousness along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research A unique and elegant blend of science memoir travel writing history and medicine How to Change Your Mind is a triumph of participatory journalism By turns dazzling and edifying it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind the self and our place in the world The true subject of Pollan s mental travelogue is not just psychedelic drugs but also the eternal puzzle of human consciousness and how in a world that offers us both suffering and joy we can do our best to be fully present and find meaning in our lives Nothing Happened Susan A. Crane, 2021-01-19 The past is what happened History is what we remember and write about that past the narratives we craft to make sense out of our memories and their sources But what does it mean to look at the past and to remember that nothing happened Why might we feel as if nothing is the way it was This book transforms these utterly ordinary observations and redefines Nothing as something we have known and can remember Nothing has been a catch all term for everything that is supposedly uninteresting or is just not there It will take some possibly considerable mental

adjustment before we can see Nothing as Susan A Crane does here with a capital n But Nothing has actually been happening all along As Crane shows in her witty and provocative discussion Nothing is nothing less than fascinating When Nothing has changed but we think that it should have we might call that injustice when Nothing has happened over a long slow period of time we might call that boring Justice and boredom have histories So too does being relieved or disappointed when Nothing happens for instance when a forecasted end of the world does not occur and millennial movements have to regroup By paying attention to how we understand Nothing to be happening in the present what it means to know Nothing or to do Nothing we can begin to ask how those experiences will be remembered Susan A Crane moves effortlessly between different modes of seeing Nothing drawing on visual analysis and cultural studies to suggest a new way of thinking about history By remembering how Nothing happened or how Nothing is the way it was or how Nothing has changed we can recover histories that were there all along

Space Is the Place John Szwed, 2020-04-30. Considered by many to be a founder of Afrofuturism, Sun Ra (aka Herman Blount) was a composer, keyboardist, bandleader, philosopher, entrepreneur, poet, and self-proclaimed extraterrestrial from Saturn. He recorded over 200 albums with his Arkestra, which dressed in Egyptian space costumes, played everything from boogie woogie and swing to fusion and free jazz. John Szwed's *Space Is the Place* is the definitive biography of this musical polymath, who was one of the twentieth century's greatest avant-garde artists and intellectuals. Charting the whole of Sun Ra's life and career, Szwed outlines how, after years in Chicago as a blues and swing band pianist, Sun Ra set out in the 1950s to impart his views about the galaxy, black people, and spiritual matters by performing music with the Arkestra that was as vital and innovative as it was

mercurial and confounding Szwed's readers whether they are just discovering Sun Ra or are among the legion of poets, artists, intellectuals, and musicians who consider him a spiritual godfather will find that indeed space is the place.
