

Writing an Art History Paper

By Maureen Gardely '12

Writing about art is based on the same analytical principles used for literature or history, but it requires a different approach and different observational skills. In an art history paper, we must employ a visual vocabulary and translate our visual impressions into a concrete verbal articulation. While this kind of writing can take many forms, the ultimate goals of any art history paper should be to explain the relationship between the technical form of a work and its impression on the viewer and to articulate how the visual elements work together to convey an overall effect.

There are several basic ways to write about art:

I. Formal Analysis:

A formal analysis is the fundamental form of writing about art and often the first taught in any introductory art history course. In a strict formal analysis, no other information is required besides that which you can see, and while some knowledge of the subject matter helps, your focus should be on the visual elements of a work. A formal analysis focuses on aspects like line, color, composition, and style, and describes the effect of these artistic decisions on the viewer. While any formal analysis must employ a good deal of description, it is important to remember that even a pure formal analysis must always be thesis-driven and each point should tie back to the overall interpretation of the work.

Example of a short formal analysis:

In Raphael's *Marriage of the Virgin*, the artist uses one point perspective, balanced composition, and vibrant primary colors to convey a sense of stability and order, thus representing the Christian narrative in the idealized, harmonious aesthetic of the Renaissance. In the foreground, a man and woman stand on either side of a central figure, their adjoining heads creating a focal point which extends back to the doorway on the horizon line. The orthogonal lines created by the tiled pavement move the viewer's eye along the same central path and emphasize the perfect perspective of the scene. The deep tones of yellow and green in the central man's clothing complement the red and blue in the woman's, and form the palette for the rest of the artwork; a simple, pure combination of colors that contributes to the sense of order. The almost perfect symmetry of the scene, as well as the relatively empty middle ground, underscores both the spiritual theme and the aesthetic values of the time.

Note how the writer balances description of the work, using a vocabulary based on knowledge of artistic techniques and visual elements, with analysis of their effect on the viewer. The thesis (in bold) provides a framework for the rest of the paragraph and acts as the driving force behind the descriptive observations.

The example above merely demonstrates the type of writing typically employed in a formal analysis and is therefore shorter and less thorough than most visual analyses. Also

Framing Muslims Peter Morey, Amina Yaqin, 2011-06-13 In *Framing Muslims* Stereotyping and Representation after 9/11 Peter Morey and Amina Yaqin dissect how stereotypes that depict Muslims as an inherently problematic presence in the West are constructed, deployed, and circulated in the public imagination, producing an immense gulf between representation and a considerably more complex reality.

A Short Guide to Writing about Art Sylvan Barnet, 2005 This edition addresses such fundamental matters as description versus analysis, critical approaches to art (e.g., formal analysis, cultural materialism, gender studies), getting ideas for an essay, developing paragraphs, organizing a comparison using bibliographic tools, including the internet, writing a catalog entry, quoting sources, documenting sources using either the Art Bulletin style or the Chicago Manual style, avoiding sexist and Eurocentric language, writing citations for illustrations, engaging in peer review, editing the final draft, writing essay examinations.

Muslim Women in War and Crisis Faegheh Shirazi, 2010-05-01 Representing diverse cultural viewpoints, *Muslim Women in War and Crisis* collects an array of original essays that highlight the experiences and perspectives of Muslim women, their dreams and nightmares, and their daily struggles in times of tremendous social upheaval. Analyzing both how Muslim women have been represented and how they represent themselves, the authors draw on primary sources ranging from poetry and diaries to news reports and visual media. Topics include: Peacebrokers in Indonesia; Exploitation in the Islamic Republic of Iran; Chechen women rebels; Fundamentalism in Afghanistan; from refugee camps to Kabul; Memoirs of Bengali Muslim women; The 7/7 London bombings; British Muslim women and the media. Also exploring such images in the United States, Spain, the former Yugoslavia, Tunisia, Algeria, Lebanon, and Iraq, this collection offers a chorus of multidimensional voices that counter Islamophobia and destructive clichés. Encompassing the symbolic, national, and religious identities of Muslim women, this study goes beyond those facets to examine the realities of day-to-day existence in societies that seek scapegoats and do little to defend the victims of hate crimes. Enhancing their scholarly perspectives, many of the contributors, including the editor, have lived through the strife they analyze. This project taps into their firsthand experiences of war and deadly political oppression.

Gardiner,2005 This book looks at the transformation that Art and Art history is undergoing through engagement with the digital revolution Since its initiation in 1985 CHArt Computers and the History of Art has set out to promote interaction between the rapidly developing new Information Technology and the study and practice of Art It has become increasingly clear in recent years that this interaction has led not just to the provision of new tools for the carrying out of existing practices but to the evolution of unprecedented activities and modes of thought This collection of papers represents the

variety innovation and richness of significant presentations made at the CHArt Conferences of 2001 and 2002 Some show new methods of teaching being employed making clear in particular the huge advantages that IT can provide for engaging students in learning and interactive discussion It also shows how much is to be gained from the flexibility of the digital image or could be gained if the road block of copyright is finally overcome Others look at the impact on collections and archives showing exciting ways of using computers to make available information about collections and archives and to provide new accessibility to archives The way such material can now be accessed via the internet has revolutionized the search methods of scholars but it has also made information available to all However the internet is not only about access Some papers here show how it also offers the opportunity of exploring the structure of images and dealing with the fascinating possibilities offered by digitisation for visual analysis searching and reconstruction Another challenging aspect covered here are the possibilities offered by digital media for new art forms One point that emerges is that digital art is not some discreet practice separated from other art forms It is rather an approach that can involve all manner of association with both other art practices and with other forms of presentation and enquiry demonstrating that we are witnessing a revolution that affects all our activities and not one that simply leads to the establishment of a new discipline to set alongside others

Why Have There Been No Great Women Artists?: 50th anniversary edition Linda Nochlin, 2021-02-16 The fiftieth anniversary edition of the essay that is now recognized as the first major work of feminist art theory published together with author Linda Nochlin's reflections three decades later Many scholars have called Linda Nochlin's seminal essay on women artists the first real attempt at a feminist history of art In her revolutionary essay Nochlin refused to answer the question of why there had been no great women artists on its own corrupted terms and instead she dismantled the very concept of greatness unraveling the basic assumptions that created the male centric genius in art With unparalleled insight and wit Nochlin questioned the acceptance of a white male viewpoint in art history And future freedom as she saw it requires women to leap into the unknown and risk demolishing the art world's institutions in order to rebuild them anew In this stand alone anniversary edition Nochlin's essay is published alongside its reappraisal Thirty Years After Written in an era of thriving feminist theory as well as queer theory race and postcolonial studies Thirty Years After is a striking reflection on the emergence of a whole new canon With reference to Joan Mitchell Louise Bourgeois Cindy Sherman and many more Nochlin diagnoses the state of women and art with unmatched precision and verve Why Have There Been No Great Women Artists has become a slogan and rallying cry that resonates across culture and society In the 2020s Nochlin's message could not be more urgent as she put it in 2015 There is still a long way to go
