Patron-Driven Acquisitions Judith M. Nixon, Robert S. Freeman, Suzanne M. Ward, 2014-01-02 For over a decade some academic libraries have been purchasing rather than borrowing recently published books requested by their patrons through interlibrary loan These books had one circulation guaranteed and so appealed to librarians who were concerned about the large percentage of books selected and purchased by librarians but never checked out by their patrons Early assessments of the projects indicated that patrons selected quality books that in many cases were cross-disciplinary and covered emerging areas of scholarly interest However now we have a significant database of the ILL purchase records to compare these titles with books selected through normal methods The projects described in this book present a powerful argument for involving patrons in the book selection process This book looks at patron-driven acquisitions for printed books at Purdue University the University of Nebraska Lincoln and the University of Illinois as well as exploring new programs that allow patrons to select e-books or participate in other innovative ways in building the library collections This book was published as a special issue of

A Framework for K-12 Science Education National Research Council,Division of Behavioral and Social Sciences and Education,Board on Science Education,Committee on a Conceptual Framework for New K-12 Science Education Standards,2012-02-28 Science engineering and technology permeate nearly every facet of modern life and hold the key to solving many of humanity s most pressing current and future challenges The United States position in the global economy is declining in part because U S workers lack fundamental knowledge in these fields To address the critical issues of U S competitiveness and to better prepare the workforce A Framework for K 12 Science Education proposes a new approach to K 12 science education that will capture students interest and provide them with the necessary foundational knowledge in the field A Framework for K 12 Science Education outlines a broad set of expectations for students in science and engineering in grades K 12 These expectations will inform the development of new standards for K 12 science education and subsequently revisions to curriculum instruction assessment and professional development for educators This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built These three dimensions are crosscutting concepts that unify the study of science through their common application across science and engineering scientific and engineering practices and disciplinary core ideas in the physical sciences life sciences and earth and space sciences and for engineering technology and the applications of science The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science related issues be careful consumers of scientific and technical information and enter the careers of their choice A Framework for K 12 Science Education is the first step in a process that can inform state level decisions and achieve a research grounded basis for improving science instruction and learning across the country The book will guide standards developers teachers curriculum designers assessment developers state and district science administrators and educators who teach science in informal environments *The Art of Teaching Science* Jack Hassard,Michael Dias,2013-07-04 The Art

of Teaching Science emphasizes a humanistic experiential and constructivist approach to teaching and learning and integrates a wide variety of pedagogical tools. Becoming a science teacher is a creative process and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers, mentors, and instructors and through hands-on activities designed to foster a collaborative, thoughtful learning environment. This second edition retains key features such as inquiry-based activities and case studies throughout while simultaneously adding new material on the impact of standardized testing on inquiry-based science and explicit links to science teaching standards. Also included are expanded resources like a comprehensive website, a streamlined format, and updated content, making the experiential tools in the book even more useful for both pre- and in-service science teachers.

Special Features Each chapter is organized into two sections: one that focuses on content and theme, and one that contains a variety of strategies for extending chapter concepts outside the classroom. Case studies open each chapter to highlight real-world scenarios and to connect theory to teaching practice. Contains 33 Inquiry Activities that provide opportunities to explore the dimensions of science teaching and increase professional expertise. Problems and Extensions. On the Web Resources and Readings guide students to further critical investigation of important concepts and topics. An extensive companion website includes even more student and instructor resources such as interviews with practicing science teachers, articles from the literature, chapter PowerPoint slides, syllabus helpers, additional case studies, activities, and more. Visit <http://www.routledge.com/textbooks/9780415965286> to access this additional material.

Tomorrow's High School. Gene Bottoms, 2022-04-11. How do some high schools produce graduates that consistently achieve at high levels? Would you believe there's a set of proven strategies that could help you deliver similar impressive results and better prepare students for the world after high school? High schools in the United States face a startling reality: many graduates are unprepared for success in postsecondary studies or for high-demand, well-paying jobs in a rapidly changing economy. Although this situation is alarming, the high schools that have embraced new ways of learning show us what is possible. Drawing from his experience with the High Schools That Work initiative, Gene Bottoms offers educators a path forward by urging them to pursue bold goals and outlining bold actions for achieving those goals. His vision is clear: replace the traditional model of secondary education with one that engages students in a rigorous curriculum that combines a solid academic core with intellectually demanding career pathway courses. The notion that nearly all students can achieve at high levels is borne out by numerous examples of high schools, including those with traditionally underperforming student populations that have used key strategies to help all students realize their potential. Bottoms explains the root causes of the current shortcomings in high school education and then specifies critical components of successful transformation: Shared leadership, Powerful assignments, especially in math literacy and career technical education, planned and executed by academic and career

pathway teachers working together Strengthened connections between middle school and high school A redesigned senior year and Comprehensive counseling and advisory programs Provocative and persuasive in its sense of urgency Tomorrow s High School offers proven and practical solutions to finally make high schools a rich and rewarding experience for all students whatever their future college and career goals may be This book is a copublication of ASCD and SREB It includes access to nine downloadable appendixes
