Human-centered Aircraft Automation: A Concept and Guidelines Charles E. Billings, 1991

Human Error in Aviation R. Key Dismukes, 2017-07-05. Most aviation accidents are attributed to human error, pilot error, especially human error, also greatly affects productivity and profitability. In his overview of this collection of papers, the editor points out that these facts are often misinterpreted as evidence of deficiency on the part of operators involved in accidents. Human factors research reveals a more accurate and useful perspective. The errors made by skilled human operators, such as pilots, controllers, and mechanics, are not root causes but symptoms of the way industry operates. The papers selected for this volume have strongly influenced modern thinking about why skilled experts make errors and how to make aviation error resilient.
