Business and Economy Yearbook ,2001 **History of Romanian Technology and Industry** Dorel Banabic,2023-10-23 This volume showcases the valuable achievements of the Romanian technology and industry worldwide It started from the premise that the history of Romanian technique is scarcely known outside the borders of Romania The main Romanian contributions to the world s technological heritage are missing except for a few names in the field of aviation from the great encyclopedias and dictionaries published worldwide This is due among other reasons to the insufficient promotion in widely spoken languages of the history of Romanian technology The multidisciplinary approach of the volumes means that the field of technology had to be split into several branches The present volume includes the following industries electrical engineering energy technology biomedicine maritime and rail transport automotive industry aviation The history of engineering societies of engineering education of intellectual property and of inventions as well as a synopsis of the personalities of Romanian engineering have been tackled in separate chapters For each field are engaged the collaboration of authors who have already published a history of their field Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only with the facts and the history of their field but also with the philosophy behind its development The Transition from Communism to the European Union David Turnock,2009 The Transition from Communism to the European Union provides an overview of economic change in Romania and studies in detail the transformation in industry energy and agriculture drawing on fieldwork in all parts of the country The monitoring

of the economic press throughout the post communist period has also yielded much source material Although the political context is examined at some length the prime consideration is economic restructuring involving the establishment of a free market system after decades of government control through central planning It is made clear that the process is still not complete since global competitiveness remains a major challenge now that many people are beginning to experience a degree of prosperity
