New volume in a favorite Bible commentary series
Writing a commentary on Galatians is a daunting task. Despite its relative brevity, this Pauline letter raises a number of foundational theological issues, and it has played a vital role in shaping Christian thought and practice over the centuries. In this replacement of Ronald Y. K. Fung's 1988 New International Commentary volume, David deSilva ably rises to the challenge, providing a coherent account of Galatians as a piece of strategically crafted communication that addresses both the immediate pastoral challenges facing Paul's converts in Galatia and the underlying questions that gave rise to them. Paying careful attention to the history, philology, and theology of the letter, and interacting with a wealth of secondary literature on

both Galatians and the rest of the Pauline corpus, deSilva's exegetically sound commentary will serve as an essential resource for pastors and theological students. Winner of the 2020 Scholarly Contributions to Teaching and Learning Award from the American Sociological Association Many students struggle with the transition from high school to university life. This is especially true of first-generation college students, who are often unfamiliar with the norms and expectations of academia. College professors usually want to help, but many feel overwhelmed by the prospect of making extra time in their already hectic schedules to meet with these struggling students. 33 Simple Strategies for Faculty is a guidebook filled with practical solutions to this problem. It gives college faculty concrete exercises and tools they can use both inside and outside of the classroom to effectively bolster the academic success and wellbeing of their students. To devise these strategies, educational sociologist Lisa M. Nunn talked with a variety of first-year college students, learning what they find baffling and frustrating about their classes, as well as what they love about their professors' teaching. Combining student perspectives with the latest research on bridging the academic achievement gap, she shows how professors can make a difference by spending as little as fifteen minutes a week helping their students acculturate to college life. Whether you are a new

faculty member or a tenured professor, you are sure to find 33 Simple Strategies for Faculty to be an invaluable resource. Supplement your social studies curriculum with 180 days of daily practice! Internet pioneer and renowned filmmaker Tiffany Shlain takes us on a provocative and entertaining journey through time and technology, introducing a strategy for living in our 24/7 world: turning off all screens for twenty-four hours each week. This practice, which she's done for nearly a decade with her husband and kids (sixteen and ten), has completely changed their lives, giving them more time, productivity, connection, and presence. She and her family call it "Technology Shabbat." Drawn from the ancient ritual of Shabbat, living 24/6 can work for anyone from any background. With humor and wisdom, Shlain shares her story, offers lessons she has learned, and provides a blueprint for how to do it yourself. Along the way, she delves into the neuroscience, philosophy, psychology, and history of a weekly day of rest across cultures, making the case for why we need to bring this ritual back. A compelling personal story and a fascinating, far-reaching examination of the complex world we've created, 24/6 is a call to rebalance ourselves and our society. From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset.

She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own. Nehama Leibowitz brings fresh insight into the Bible (Torah). The material for her books come from her years of lectures in Israel. Now you can benefit from her vast knowledge. Translated from the widely-read Hebrew bestseller. Timpanogos beckons the urban populace of Utah. And yet, no "Indian" legend graced the mount until Mormon settlers conjured it—once they had displaced the local Indians, the Utes, from their actual landmark, Utah Lake. On Zion's Mount tells the story of this curious shift. It is a quintessentially American story about the fraught process of making oneself "native" in a strange land. But it is also a complex tale of how cultures confer meaning on the environment—how they create homelands. Only in Utah did Euro-American settlers conceive of having a homeland in the Native American sense—an endemic spiritual geography. They called it "Zion." Mormonism, a religion indigenous to the United States, originally embraced

Indians as “Lamanites,” or spiritual kin. On Zion’s Mount shows how, paradoxically, the Mormons created their homeland at the expense of the local Indians—and how they expressed their sense of belonging by investing Timpanogos with “Indian” meaning. This same pattern was repeated across the United States. Jared Farmer reveals how settlers and their descendants (the new natives) bestowed “Indian” place names and recited pseudo-Indian legends about those places—cultural acts that still affect the way we think about American Indians and American landscapes. Chamine exposes how your mind is sabotaging you and keeping you from achieving your true potential. He shows you how to take concrete steps to unleash the vast, untapped powers of your mind. Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly coupled with practice. Much of the research is carried out in school settings. Research influences educational practice, and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership (SERP) is designed to make this vision a reality. It proposes a large-scale, coherent program of research and development that would put the problems of educational practice at its center, and focus on all stages necessary to influence practice. These include theory testing, the development and evaluation of instructional

programs, the study of practice in context, and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of linking research and practice. It is a call to mobilize the nation's resources and political will, the power of scientific research, and the expertise of our educators, to create a more effective research and development program for improving student learning.
