**Life Finds a Way** Andreas Wagner,2019-06-11 How the principles of biological innovation can help us overcome creative challenges in art business and science In Life Finds a Way biologist Andreas Wagner reveals the deep symmetry between innovation in biological evolution and human cultural creativity Rarely is either a linear climb to perfection instead progress is typically marked by a sequence of peaks plateaus and pitfalls For instance in Picasso s forty some iterations of Guernica we see the same combination of small steps incessant reshuffling and large almost reckless leaps that characterize the way evolution transformed a dinosaur s grasping claw into a condor s soaring wing By understanding these principles we can also better realize our own creative potential to find new solutions to adversity Ultimately Life Finds a Way offers a new framework for the nature of creativity enabling us to better adapt grow and change in art business or science that is in life

*Julian Assange* Julian Assange,2011-09-22 In December 2010 Julian Assange signed a contract with Canongate Books to write a book part memoir part manifesto for publication the following year At the time Julian said I hope this book will become one of the unifying documents of our generation In this highly personal work I explain our global struggle to force a new relationship between the people and their governments In the end the work was to prove too personal Despite sitting for

more than fifty hours of taped interviews and spending many late nights at Ellingham Hall where he was living under house arrest discussing his life and the work of WikiLeaks with the writer he had enlisted to help him Julian became increasingly troubled by the thought of publishing an autobiography After reading the first draft of the book at the end of March Julian declared All memoir is prostitution In June 2011 with thirty eight publishing houses around the world committed to releasing the book Julian told us he wanted to cancel his contract We disagree with Julian s assessment of the book We believe it explains both the man and his work underlining his commitment to the truth Julian always claimed the book was well written we agree and this also encouraged us to make the book available to readers And the contract By the time Julian wanted to cancel the deal he had already used the advance money to settle his legal bills So the contract still stands We have decided to honour it and to publish This book is the unauthorised first draft It is passionate provocative and opinionated like its author It fulfils the promise of the original proposal and we are proud to publish it Canongate Books September 2011

**Alternative Models of Addiction** Hanna Pickard,Serge H. Ahmed,Bennett Foddy,2015-12-07 For much of the 20th century theories of addictive behaviour and motivation were polarized between two models The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly The second model in contrast viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control As our capacity to observe neurobiological phenomena improved the second model became scientific orthodoxy increasingly dominating addiction research and informing public understandings of addiction More recently however a dissenting view has emerged within addiction research based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control On this alternative model of addiction addictive behaviour is an instrumental means to ends

that are desired by the individual although much controversy exists with respect to the rationality or irrationality of these ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction
