Das,2015-12-11 This book presents a one-stop reference to the empirical correlations used extensively in geotechnical engineering. Empirical correlations play a key role in geotechnical engineering designs and analysis. Laboratory and in situ testing of soils can add significant cost to a civil engineering project. By using appropriate empirical correlations, it is possible to derive many design parameters, thus limiting our reliance on these soil tests. The authors have decades of experience in geotechnical engineering as professional engineers or researchers. The objective of this book is to present a critical evaluation of a wide range of empirical correlations reported in the literature along with typical values of soil parameters in the light of their experience and knowledge. This book will be a one-stop shop for the practicing professionals, geotechnical researchers, and academics looking for specific correlations for estimating certain geotechnical parameters. The empirical correlations in the forms of equations and charts and typical values are collated from extensive literature review and from the authors' database. *Handbook of Surface Plasmon Resonance* Richard B. G. Jhingran,Roger S. V. Pullin,1985 *Laboratory Techniques in Thrombosis — a Manual* J. Jespersen,R.M. Bertina,F. Haverkate,2013-12-01 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures It was the result of a unique cooperation between experts brought together by the European Concerted Action on Thrombosis and Disabilities ECAT The Concerted Action was at that time under the auspices of the Commission of the European Union The second edition like the first edition deals with diagnostic tests within the field of thrombosis However the second edition has a broader scope because it is no longer limited by the frontiers of ECAT Experts all over the world in and outside ECAT have contributed to this edition The editors are very grateful for their contributions The need for a new edition is obvious Since 1992 new assays have been introduced for research diagnosis and therapy of thrombosis for other assays improvements have been suggested while a few others became redundant The editors waived the radioimmunoassays of thromboglobulin and platelet factor 4 due to the fact that the kits required for these assays are rarely or no longer available Also the PAI 1 activity assay was waived as it is liable to many inconsistencies and to large variations A list of names and addresses of manufacturers marketing the kits and reagents has been compiled together with a list of the recommended nomenclature of quantities in thrombosis and haemostasis in order to facilitate the use of the updated version These lists have been carefully compiled by Johannes J Sidelmann PhD Department of Clinical Biochemistry in Esbjerg Denmark **Elasmobranch Biodiversity, Conservation and Management** Sarah L. Fowler,Tim M. Reed,Frances Dipper,2002 The Darwin Elasmobranch Biodiversity Conservation and Management project in Sabah held a three day international seminar that included a one day workshop in order to highlight freshwater and coastal elasmobranch

conservation issues in the region and worldwide to disseminate the result of the project to other Malaysian states and countries and to raise awareness of the importance of considering aspects of elasmobranch biodiversity in the context of nature conservation commercial fisheries management and for subsistence fishing communities These proceedings contain numerous peer reviewed papers originally presented at the seminar which cover a wide range of topics with particular reference to species from freshwater and estuarine habitats The workshop served to develop recommendations concerning the future prospects of elasmobranch fisheries biodiversity conservation and management This paper records those conclusions which highlight the importance of elasmobranchs as top marine predators and keystone species noting that permanent damage to shark and ray populations are likely to have serious and unexpected negative consequences for commercial and subsistence yields of other important fish stocks
