A concise survey of the culture and civilization of mankind, *The Lessons of History* is the result of a lifetime of research from Pulitzer Prize-winning historians Will and Ariel Durant. With their accessible compendium of

philosophy and social progress, the Durants take us on a journey through history, exploring the possibilities and limitations of humanity over time. Juxtaposing the great lives, ideas, and accomplishments with cycles of war and conquest, the Durants reveal the towering themes of history and give meaning to our own. Now part of the HBO docuseries *Exterminate All the Brutes*, written and directed by Raoul Peck The 20th anniversary edition of a pioneering classic that explores the contexts in which history is produced—now with a new foreword by renowned scholar Hazel Carby *Placing the West's* failure to acknowledge the Haitian Revolution—the most successful slave revolt in history—alongside denials of the Holocaust and the debate over the Alamo, Michel-Rolph Trouillot offers a stunning meditation on how power operates in the making and recording of history. This modern classic resides at the intersection of history, anthropology, Caribbean, African-American, and post-colonial studies, and has become a staple in college classrooms around the country. In a new foreword, Hazel Carby explains the book's enduring importance to these fields of study and introduces a new

generation of readers to Trouillot's brilliant analysis of power and history's silences. *Images of Black Women from Colonial America to the Present*. Can today's society, increasingly captivated by a constant flow of information, share a sense of history? How did our media-making forebears balance the tension between the present and the absent, the individual and the collective, the static and the dynamic—and how do our current digital networks disrupt these same balances? Can our social media, with its fleeting nature, even be considered social at all? In *Friending the Past*, Alan Liu proposes fresh answers to these innovative questions of connection. He explores how we can learn from the relationship between past societies whose media forms fostered a communal and self-aware sense of history—such as prehistorical oral societies with robust storytelling cultures, or the great print works of nineteenth-century historicism—and our own instantaneous present. He concludes with a surprising look at how the sense of history exemplified in today's JavaScript timelines compares to the temporality found in Romantic poetry. Interlaced among these inquiries, Liu shows

how extensive “network archaeologies” can be constructed as novel ways of thinking about our affiliations with time and with each other. These conceptual architectures of period and age are also always media structures, scaffolded with the outlines of what we mean by history. Thinking about our own time, Liu wonders if the digital, networked future can sustain a similar sense of history. Except there was no cute guy helping me along, no series of makeover shots with fun background music, no scene where I walked into the room and all heads turned to look at me while wind blew through my hair. I was the ugly high school student, and I did transform, but it wasn't all peaches and cream. Bullied so badly in high school that it ruined my life, I spent my senior year in therapy. It was there that I transformed - not just physically, but mentally as well. I wanted a fresh start and going to college across the country was my ticket to that. It was a whole new world, and things were great and then came the blast from my past. And he didn't recognize me. What was a girl to do? Revenge, of course! My plan was to make him fall for me and then break his heart. Sounds simple, right? Wrong. If

only revenge was black and white ... too bad a lot of gray was in the mix. But one thing was for sure - I needed a way to heal the scars from my past. I just hoped I could. Our History Is the Future is at once a work of history, a personal story, and a manifesto. Now available in paperback on the fifth anniversary of its original publication, Our History Is the Future features a new afterword by Nick Estes about the rising indigenous campaigns to protect our environment from extractive industries and to shape new ways of relating to one another and the world. In this award-winning book, Estes traces traditions of Indigenous resistance leading to the present campaigns against fossil fuel pipelines, such as the Dakota Access Pipeline Protests, from the days of the Missouri River trading forts through the Indian Wars, the Pick-Sloan dams, the American Indian Movement, and the campaign for Indigenous rights at the United Nations. In 2016, a small protest encampment at the Standing Rock reservation in North Dakota, initially established to block construction of the Dakota Access oil pipeline, grew to be the largest Indigenous protest movement in the

twenty-first century, attracting tens of thousands of Indigenous and non-Native allies from around the world. Its slogan “Mni Wiconi”—Water Is Life—was about more than just a pipeline. Water Protectors knew this battle for Native sovereignty had already been fought many times before, and that, even with the encampment gone, their anti-colonial struggle would continue. While a historian by trade, Estes draws on observations from the encampments and from growing up as a citizen of the Oceti Sakowin (the Nation of the Seven Council Fires) and his own family's rich history of struggle. The original edition of this now classic work was hailed by Jacob Cohen in *The Nation* as "the finest one-volume interpretation of American history extant." For this Third Edition of *Out of Our Past*, Carl Degler has added a comprehensive new chapter on the historical development of American families, brought up to date the discussion of U.S. foreign policy, greatly expanded sections dealing with the place and history of women in our past, and made numerous changes throughout the text in light of scholarship published since the appearance of the 1970 Revised Edition. The author explains why he believes in reincarnation, discusses the benefits of past-life therapy, and tells how to recall and explore memories of past lives This book offers an extraordinary interpretation of world history, from the paleolithic era to the present. Renowned historian L.S. Stavrianos conceptualizes human history into three

categories: kinship societies, tributary societies, and capitalist societies. In each, he discerns and studies four "life-line" issues - ecology, gender relations, social relations, and war - that encompass the broadest areas of human experience. The revised edition projects forward to the twenty-first century, offering the author's views on possible future scenarios involving the same lifeline issues. This book reviews the latest research in the field of autobiographical memory. In recent years, history has been increasingly popularized through television docudramas, history museums, paperback historical novels, grassroots community history projects, and other public representations of historical knowledge. This collection of lively and accessible essays is the first examination of the rapidly growing field called "public history." Based in part on articles written for the Radical History Review, these eighteen original essays take a sometimes irreverent look at how history is presented to the public in such diverse settings as children's books, Colonial Williamsburg, and the Statue of Liberty, *Presenting the Past* is organized into three areas which consider the role of mass media ("Packaging the Past"), the affects of applied history ("Professionalizing the Past") and the importance of grassroots efforts to shape historical consciousness ("Politicizing the Past"). The first section examines the large-scale production and dissemination of popular history by mass culture. The contributors

criticize many of these Hollywood and Madison Avenue productions that promote historical amnesia or affirm dominant values and institutions. In "Professionalizing the Past," the authors show how non-university based professional historians have also affected popular historical consciousness through their work in museums, historic preservation, corporations, and government agencies. Finally, the book considers what has been labeled "people's history"--oral history projects, slide shows, films, and local exhibits--and assesses its attempts to reach such diverse constituents as workers, ethnic groups, women, and gays. Of essential interest to students of history, *Presenting the Past* also explains to the general reader how Americans have come to view themselves, their ancestors, and their heritage through the influence of mass media, popular culture, and "public history." Author note: Susan Porter Benson is Associate Professor and Chair of History at Bristol Community College in Massachusetts. Stephen Brier is Director of the American Social History Project and Senior Research Scholar at the Graduate Center, City University of New York. Roy Rosenzweig is Associate Professor of History and Director of the Oral History Program at George Mason University in Virginia. The rise of the multi-billion dollar ancestry testing industry points to one immutable truth about us as human beings: we want to know where we come from and who our ancestors were. John H. Relethford and

Deborah A. Bolnick explore this topic and many more in this second edition of *Reflections of Our Past*. Where did modern humans come from and how important are the biological differences among us? Are we descended from Neandertals? How should we understand the connections between genetic ancestry, race, and identity? Were Native Americans the first to inhabit the Americas? Can we see evidence of the Viking invasions of Ireland a millennium ago even in the Irish of today? Through engaging examination of issues such as these, and using non-technical language, *Reflections of Our Past* shows how anthropologists use genetic information to suggest answers to fundamental questions about human history. By looking at genetic variation in the world today and in the past, we can reconstruct the recent and remote events and processes that have created the variation we see, providing a fascinating reflection of our genetic past. The stories we read as children shape us for the rest of our lives. But it is never too late to discover that transformative spark of hope that children's classics can ignite within us. Award-winning children's author Mitali Perkins grew up steeped in stories--escaping into her books on the fire escape of a Flushing apartment building and, later, finding solace in them as she navigated between the cultures of her suburban California school and her Bengali heritage at home. Now Perkins invites us to explore the promise of seven timeless children's novels for adults living in uncertain times:

stories that provide mirrors to our innermost selves and open windows to other worlds. Blending personal narrative, accessible literary criticism, and spiritual and moral formation, Perkins delves into novels by Louisa May Alcott, C. S. Lewis, L. M. Montgomery, Frances Hodgson Burnett, and other literary "uncles" and "aunts" that illuminate the virtuous, abundant life we still desire. These novels are not perfect, and Perkins honestly assesses their critical frailties and flaws related to race, culture, and power. Yet reading or rereading these books as adults can help us build virtue, unmask our vices, and restore our hope. Reconnecting with these stories from childhood isn't merely nostalgia. In an era of uncertainty and despair, they lighten our load and bring us much-needed hope. As seen in the Sony Pictures 2016 film *Ghostbusters*, the ultimate guide to identifying, understanding, and engaging with any paranormal activity that plagues you Years before they made headlines with the *Ghostbusters*, Erin Gilbert and Abby L. Yates published the groundbreaking study of the paranormal, *Ghosts from Our Past*. Once lost to history, this criminally underappreciated book is now updated for the new century. According to Gilbert and Yates, "extraordinary claims require extraordinary evidence," and whether you're a believer or a skeptic, you'll find the information you're seeking right here in this extraordinary book, including:

- The childhood experiences that inspired Erin and Abby's lifelong passion for the scientific study

- of the paranormal
- The history of ghosts and other supernatural entities, the science that explains their existence, and profiles of the groundbreaking paranormal researchers who have investigated them
- An illustrated guide to Class I through Class VII ghosts
- Helpful sidebars like "A Ghost by Any Other Name" and "Ectoplasm Cleanup Tips"
- Updates including "The Ghostbusters' Arsenal" by Jillian Holtzmann and "Haunted History" by Patty Tolan
- A new Ghostbusting Resources appendix, featuring the "Paranormal Quickstart Guide", "Is It a Ghost? A Handy Quiz", "A Supernatural Stakeout Journal", "The Devil's Dictionary: Paraterminology You Need to Know"

With this helpful—and hilarious—official Ghostbusters guide in hand, you'll be prepared for almost any spirit, spook, or spectre that comes your way. As for the rest, you know who to call. History is full to the brim with untold tales of heroics and villainy, gruesome battles, hilarious happenings and downright bizarre coincidences. Meet the war veteran who lost an eye and amputated his own fingers. Discover the original Die Hards, whose bravery would put even Bruce Willis to shame. Just who stole the still-missing Irish crown jewels and how did Adeline, Countess of Cardigan, scandalise society so completely? In *Lessons from History*, Alex Deane takes us on an uproarious romp through the tales you didn't hear at school. With stories ranging from the little-known characters who played their vital parts in the world's most famous wars to the remarkable

adventures of figures across the centuries, to events so extraordinary as to be almost – almost – unbelievable, this book proves that fact is almost always wilder than fiction. Bringing these stories joyfully and often poignantly back to life, Deane finally shines a light on the tales lost to history, and on what we might learn from them today. What is the purpose of studying history? How do we reflect on contemporary life from a historical perspective, and can such reflection help us better understand ourselves, the world around us, and the God we worship and serve? Written by an accomplished historian, award-winning author, public evangelical spokesman, and respected teacher, this introductory textbook shows why Christians should study history, how faith is brought to bear on our understanding of the past, and how studying the past can help us more effectively love God and others. John Fea shows that deep historical thinking can relieve us of our narcissism; cultivate humility, hospitality, and love; and transform our lives more fully into the image of Jesus Christ. The first edition of this book has been used widely in Christian colleges across the country. The second edition provides an updated introduction to the study of history and the historian's vocation. The book has also been revised throughout and incorporates Fea's reflections on this topic from throughout the past 10 years. An erudite scholar and an elegant writer, Gordon S. Wood has won both numerous awards and a broad readership since

the 1969 publication of his widely acclaimed *The Creation of the American Republic*. With *The Purpose of the Past*, Wood has essentially created a history of American history, assessing the current state of history vis-à-vis the work of some of its most important scholars—doling out praise and scorn with equal measure. In this wise, passionate defense of history's ongoing necessity, Wood argues that we cannot make intelligent decisions about the future without understanding our past. Wood offers a master's insight into what history—at its best—can be and reflects on its evolving and essential role in our culture. This “important and timely” (Drew Faust, *Harvard Magazine*) #1 *New York Times* bestseller examines the legacy of slavery in America—and how both history and memory continue to shape our everyday lives. Beginning in his hometown of New Orleans, Clint Smith leads the reader on an unforgettable tour of monuments and landmarks—those that are honest about the past and those that are not—that offer an intergenerational story of how slavery has been central in shaping our nation's collective history, and ourselves. It is the story of the Monticello Plantation in Virginia, the estate where Thomas Jefferson wrote letters espousing the urgent need for liberty while enslaving more than four hundred people. It is the story of the Whitney Plantation, one of the only former plantations devoted to preserving the experience of the enslaved people whose lives and work sustained it. It is the story of Angola, a former plantation-turned-

maximum-security prison in Louisiana that is filled with Black men who work across the 18,000-acre land for virtually no pay. And it is the story of Blandford Cemetery, the final resting place of tens of thousands of Confederate soldiers. A deeply researched and transporting exploration of the legacy of slavery and its imprint on centuries of American history, *How the Word Is Passed* illustrates how some of our country's most essential stories are hidden in plain view—whether in places we might drive by on our way to work, holidays such as Juneteenth, or entire neighborhoods like downtown Manhattan, where the brutal history of the trade in enslaved men, women, and children has been deeply imprinted. Informed by scholarship and brought to life by the story of people living today, Smith's debut work of nonfiction is a landmark of reflection and insight that offers a new understanding of the hopeful role that memory and history can play in making sense of our country and how it has come to be. Winner of the National Book Critics Circle Award for Nonfiction Winner of the Stowe Prize Winner of 2022 Hillman Prize for Book Journalism A *New York Times* 10 Best Books of 2021 *Seeking Our Past: An Introduction to North American Archaeology* offers an up-to-date and engaging introduction to North America's past that also illustrates contemporary archaeological practice. The authors include examples from both North American prehistory and history—drawn from academic archaeology and Cultural Resource

Management (CRM)—in order to provide a broad overview of how the continent was settled, what archaeologists have learned about life across the North American culture areas, and how current archaeologists research our past. Chapters are enhanced by case studies written especially for this book by the original researchers. Through these case studies readers gain familiarity with particular projects and insight into what archaeologists actually do. In addition, the authors cover such important ethical issues as respecting and working with descendant populations and the need for archaeological stewardship. They also provide valuable information about contemporary practice and careers in archaeology. New to this Edition * Expanded discussion of Paleoindian adaptations * A completely new chapter (13) that covers North American historical archaeology thematically * New and streamlined case studies * Revised and updated "Issues and Debates" and "Clues to the Past" feature boxes and "Faces in Archaeology" profiles * New feature boxes, "Anthropological Themes," which remind students of the broad anthropological research questions listed in Chapter 2 and show where to look for relevant discussions in each chapter Some people make photo albums, collect antiques, or visit historic battlefields. Others keep diaries, plan annual family gatherings, or stitch together patchwork quilts in a tradition learned from grandparents. Each of us has ways of communing with the past, and our

reasons for doing so are as varied as our memories. In a sweeping survey, Roy Rosenzweig and David Thelen asked 1,500 Americans about their connection to the past and how it influences their daily lives and hopes for the future. The result is a surprisingly candid series of conversations and reflections on how the past infuses the present with meaning. Rosenzweig and Thelen found that people assemble their experiences into narratives that allow them to make sense of their personal histories, set priorities, project what might happen next, and try to shape the future. By using these narratives to mark change and create continuity, people chart the courses of their lives. A young woman from Ohio speaks of giving birth to her first child, which caused her to reflect upon her parents and the ways that their example would help her to become a good mother. An African American man from Georgia tells how he and his wife were drawn to each other by their shared experiences and lessons learned from growing up in the South in the 1950s. Others reveal how they personalize historical events, as in the case of a Massachusetts woman who traces much of her guarded attitude toward life to witnessing the assassination of John F. Kennedy on television when she was a child. While the past is omnipresent to Americans, "history" as it is usually defined in textbooks leaves many people cold. Rosenzweig and Thelen found that history as taught in school does not inspire a strong connection to the past. And they reveal

how race and ethnicity affects how Americans perceive the past: while most white Americans tend to think of it as something personal, African Americans and American Indians are more likely to think in terms of broadly shared experiences--like slavery, the Civil Rights Movement, and the violation of Indian treaties." Rosenzweig and Thelen's conclusions about the ways people use their personal, family, and national stories have profound implications for anyone involved in researching or presenting history, as well as for all those who struggle to engage with the past in a meaningful way. Life coach, inspirational speaker, and leadership trainer John Schuster offers a systematic guide to leveraging the biggest, most accessible, and most under-utilized resource for self-improvement: your past. Beloved novelist Marcia Willett continues to captivate readers with her inspiring novels about family, friendship, and love. In *Postcards from the Past* Siblings Billa and Ed share their beautiful, grand old childhood home in rural Cornwall. With family and friends nearby, and their living arrangements free and easy, they seem as contented as they can be. But when postcards start arriving from a sinister figure

they thought belonged well and truly in their pasts, old memories are stirred. Why is he contacting them now? And what has he been hiding all these years? An engrossing look at the cultural consequences of technological change and globalization. Space radar, infrared photography, carbon dating, DNA analysis, microfilm, digital data bases—we have better technology than ever for studying and preserving the past. And yet the by-products of technology threaten to destroy—in one or two generations—monuments, works of art, and ways of life that have survived thousands of years of hardship and war. This paradox is central to our age. We use the Internet to access and assess infinite amounts of information—but understand less and less of its historical context. Globalization may eventually benefit countries around the world; it will also, almost certainly, lead to the disappearance of hundreds of regional dialects, languages, and whole societies. In *The Future of the Past*, Alexander Stille takes us on a tour of the past as it exists today and weighs its prospects for tomorrow, from China to Somalia to Washington, D.C. Through incisive portraits of their protagonists, he describes high-tech struggles to save the Great Sphinx and the Ganges; efforts to preserve Latin within the Vatican; the digital glut inside the National Archives, which may have lost more information in the information age than ever before; an oral culture threatened by a "new" technology: writing itself. Wherever it takes him, Stille

explores not just the past, but our ideas about the past, how they are changing—and how they will have to change if our past is to have a future. Despite predictions of the "death of the past" and the "end of history," the past refuses to go away. In fact, the start of the twenty-first century has seen an upsurge of interest in popular representations of history on the large and small screen, and of impassioned political conflicts over rival understandings of the past. Historical responsibility and apology have become contentious topics of domestic politics and of international diplomatic relations, and memory a profitable commodity for sale to mass markets. Against this background, how do historians deal with the problems of the search for "historical truth"? *The Past Within Us* approaches these issues by examining the problems of representing history in the popular media. Drawing on examples from East Asian and American as well as European history, it poses the question: What happens when accounts of history are transferred from one medium to another? How far does the medium shape the message? How can historians deploy contemporary media in ways which evoke and develop the historical imagination? From the romances of Walter Scott to Steven Spielberg blockbusters, from online Irish nationalism to Japanese revisionist comic books, *The Past Within Us* explores some of the more dramatic modern popular representations and reflects on the key challenges and possibilities for the communication of history in a multimedia age.

Instead of an Anxious Parent, Become a Praying Parent Any Christian mother and father, or grandmother and grandfather, desires what is spiritually best for their children. However, knowing how to pray for them can often be as challenging as knowing what to pray. Without proper guidance, our prayers are prone to become dry, repetitive lists of requests. With the help of Dr. Erwin Lutzer, you can learn how your best, loving intentions can become enriching, effective intercessions for your children or grandchildren. Trade your lists of requests for Scripturally-based prayers that will immerse you in God's promises and will. In *A Practical Guide for Praying Parents*, Dr. Lutzer addresses: -How to pray when children have hardened hearts -How to pray for children who have become wayward prodigals -How to become a prayer warrior who prays in the face of spiritual warfare This small guide will help you pray scriptural prayers that both bring you closer to God and bless your children. You'll also find daily Biblical prayers crafted by Dr. Lutzer himself to help you begin your prayer journey. With your love for your children, your desire to help, and Dr. Lutzer's guidance, your prayers can become effective ministry in the lives of those you care for the most. An experienced, multi-faceted historian shows how revisionist history is at the heart of creating historical knowledge "A rallying cry in favor of historians who, revisiting past subjects, change their minds. . . . Rewarding reading."—Kirkus Reviews History is not, and has never been, inert, certain, merely factual, and beyond reinterpretation. Taking readers from Thucydides to the origin of the French Revolution to the Civil War and beyond, James M. Banner, Jr. explores what historians do and why they do it. Banner shows why historical knowledge is unlikely ever to be unchanging, why history as a branch of knowledge is always a search for meaning and a constant source of argument, and why history is so essential to individuals’ awareness of their location in the world and to every group and nation’s sense of identity and destiny. He explains why all

historians are revisionists while they seek to more fully understand the past, and how they always bring their distinct minds, dispositions, perspectives, and purposes to bear on the subjects they study. The Big Ideas Series With millions of copies sold worldwide, The History Book is part of the award-winning Big Ideas series from DK. The series uses striking graphics along with engaging writing, making big topics easy to understand. Lives grind to a halt when people don't know how to relate to their past. Some believe "the past is nothing" and attempt to suppress the brokenness again and again. Others miss out on renewal and change by making the past more important than their present and future. Neither approach moves people toward healing or hope. Pastor and biblical counselor Stephen Viars introduces a third way to view one's personal history—by exploring the role of the past as God intended. Using Scripture to lead readers forward, Viars provides practical measures to understand the important place "the past" is given in Scripture replace guilt and despair with forgiveness and hope turn failures into stepping stones for growth This motivating, compassionate resource is for anyone ready to review and release the past so that God can transform their behaviors,

relationships, and their ability to hope in a future. We find our way forward by going back. The invented history of the Western world is crumbling fast, Anishinaabe writer Patty Krawec says, but we can still honor the bonds between us. Settlers dominated and divided, but Indigenous peoples won't just send them all "home." Weaving her own story with the story of her ancestors and with the broader themes of creation, replacement, and disappearance, Krawec helps readers see settler colonialism through the eyes of an Indigenous writer. Settler colonialism tried to force us into one particular way of living, but the old ways of kinship can help us imagine a different future. Krawec asks, What would it look like to remember that we are all related? How might we become better relatives to the land, to one another, and to Indigenous movements for solidarity? Braiding together historical, scientific, and cultural analysis, Indigenous ways of knowing, and the vivid threads of communal memory, Krawec crafts a stunning, forceful call to "unforget" our history. This remarkable sojourn through Native and settler history, myth, identity, and spirituality helps us retrace our steps and pick up what was lost along the way: chances to honor rather than violate treaties, to see the land as a relative rather than a resource, and to unravel the history we have been taught. The popular author of How to Be an Adult in Relationships reveals how past trauma can negatively impact our present-day relationships—and offers

guidance on what to do about it We all have a tendency to transfer potent feelings, needs, expectations, and beliefs from childhood or from former relationships onto the people in our daily lives, whether they are our intimate partners, friends, or acquaintances. When the Past Is Present helps us to become more aware of the ways we slip into the past so that we can identify our emotional baggage and take steps to unpack it and put it where it belongs. Drawing on decades of experience as a psychotherapist, Richo helps readers to:

- Understand how the wounds of childhood become exposed in adult relationships—and why this is a gift
- Identify and heal the emotional wounds we carry over from the past so that they won't sabotage present-day relationships
- Recognize how strong attractions and aversions to people in the present can be signals of our own unfinished business
- Use mindfulness to stay in the present moment and cultivate authentic intimacy

Full of practical guidance, When the Past is Present will teach you how to free yourself from old wounds and destructive behavioral partners so you can foster healthier, happier relationships.
