This up-to-date study guide for the Final FRCA CRQ comprises questions based on every topic examined in the Royal College of Anaesthetists' (RCoA) Final written exam from the past 12 years. It therefore covers the areas of the syllabus that are key to exam success, offering factual learning and the opportunity to practise CRQ-style questions, with chapters that reflect the RCoA syllabus format to help organise learning. The inclusion of diagrams and additional commentary ensure that that this book will help candidates to learn rather than just providing a list of suggested model answers. Advice is offered about revision approaches, best sources of learning for the examination and guidance on structuring answers, which will support exam success in all parts of the Final FRCA. This resource will save hours of work for anaesthetists preparing for the Final FRCA. Since empathy first emerged as an object of inquiry within British history education in the early 1970s, teachers, scholars and policymakers have debated the concept's role in the teaching and learning of history. Yet over the years this discussion has been confined to specialized education outlets, while empathy's broader significance for history and philosophy has too often gone unnoticed. Empathy and History is the first comprehensive account of empathy's place in the practice, teaching, and philosophy of history. Beginning with the concept's roots in nineteenth-century German historicism, the book follows its historical development, transformation, and deployment while revealing its relevance for practitioners today. This book offers an insight into the dynamics and complexities of learning and teaching English as a foreign language at primary level. Taking a Dynamic Systems Theory perspective, the chapters present the findings of longitudinal research undertaken in Croatia into the development of English in young learners. The book includes both qualitative and quantitative research and provides insights into internal individual learner factors and external micro and macro contextual factors which impact English learner development. Importantly, it tackles the unique position of English in today's globalised world in detail. It therefore makes a major contribution to work on learning English by the digitalised generation and to understanding the impact of practices in the modern EFL classroom. The volume will appeal to anyone interested in new ways of researching the complex and dynamic phenomenon of the early learning of English. Instead of proceeding through history descriptively, it looks at several major questions and ideas, such as the role of technology, the development of universal religions, global trade, or participatory politics. If this sounds thematic, it is. But it also progresses chronologically, analyzing these themes as they apply in certain eras. We use both primary sources in-text, and the latest scholarship as secondary source. These we use frequently in each chapter both to employ the voices of scholars where they say things better than we could, and footnote them for students' reference. We also hope to convey the sense that all this content is part of an ongoing debate amongst historians--and scholars from different disciplines. Finally we attempt to keep the text accessible by focusing on narrative elements of history, and keeping in mind that the readers are undergraduates, often with little exposure to the subject matter. However, the level of ideas remains high"--Provided by publisher. This book offers the ultimate collection of questions and model answers for ZIMSEC A-Level exams. How David Hume and Adam Smith forged a new way of thinking about the modern state What is the modern state? Conspicuously undertheorized in recent political theory, this question persistently animated the best minds of the Enlightenment. Recovering David Hume and Adam Smith's long-underappreciated contributions to the history of political thought, *The Opinion of Mankind* considers how, following Thomas Hobbes's epochal intervention in the mid-seventeenth century, subsequent thinkers grappled with explaining how the state came into being, what it fundamentally might be, and how it could claim rightful authority over those subject to its power. Hobbes has cast a long shadow over Western political thought, particularly regarding the theory of the state. This book shows how Hume and Smith, the two leading lights of the Scottish Enlightenment, forged an alternative way of thinking about the organization of modern politics. They did this in part by going back to the foundations: rejecting Hobbes's vision of human nature and his arguments about our capacity to form stable societies over time. In turn, this was harnessed to a deep reconceptualization of how to think philosophically about politics in a secular world. The result was an emphasis on the "opinion of mankind," the necessary psychological basis of all political organization. Demonstrating how Hume and Smith broke away from Hobbesian state theory, *The Opinion of Mankind* also suggests ways in which these thinkers might shape how we think about politics today, and in turn how we might construct better political theory.
