Aloysius Bertrand's Gaspard de la Nuit Beyond the Prose Poem A Historical Introduction to Mathematical Modeling of Infectious Diseases Daily Intelligence Reports and Documents

A Historical Introduction to Mathematical Modeling of Infectious Diseases Apr 16 2021 A Historical Introduction to Mathematical Modeling of Infectious Diseases: Seminal Papers in Epidemiology offers step-by-step help on how to navigate the important historical papers on the subject, beginning in the 18th century. The book carefully, and critically, guides the reader through seminal writings that helped revolutionize the field. With pointed questions, prompts, and analysis, this book

helps the non-mathematician develop their own perspective, relying purely on a basic knowledge of algebra, calculus, and statistics. By learning from the important moments in the field, from its conception to the 21st century, it enables readers to mature into competent practitioners of epidemiologic modeling. Presents a refreshing and in-depth look at key historical works of mathematical epidemiology Provides all the basic knowledge of mathematics readers need in order to understand the fundamentals of mathematical modeling of infectious diseases Includes questions, prompts, and answers to help apply historical solutions to modern day problems

Asian Military Evolutions Aug 13 2023 This book explores civil-military relations in Asia. With chapters on individual countries in the region, it provides a comprehensive account of the range of contemporary Asian practices under conditions of abridged democracy, soft authoritarianism or complete totalitarianism. Through its analysis, the book argues that civil-military relations in Asia ought to be examined under the concept of "Asian military evolutions". It demonstrates that while Asian militaries have tried to incorporate standard, Western-derived frameworks of civil-military relations, it has been necessary to adapt such frameworks to suit local circumstances. The book reveals how this has in turn led to creative fusions and novel changes in making civil-military relations an asset to furthering national security objectives.

Essays on Algorithmic Trading Nov 23 2021 Technological innovations are altering the traditional value chain in securities trading. Hitherto the order handling, i.e. the appropriate implementation of a general trading decision into particular orders, has been a core competence of brokers. Labeled as Algorithmic Trading, the automation of this task recently found its way both into the brokers' portfolio of service offerings as well as to their customers' trading desks. The software performing the order handling thereby constantly monitors the market(s) in real-time and further evaluates historical data to dynamically determine appropriate

points in time for trading. Within only a few years, this technology propagated itself among market participants along the entire value chain and has nowadays gained a significant market share on securities markets worldwide. Surprisingly, there has been only little research analyzing the impact of this special type of trading on markets. Markus Gsell's book aims at closing this gap by analyzing the drivers for adoption of this technology, the impact the application of this technology has on markets on a macro level, i.e. how the market outcome is affected, as well as on a micro level, i.e. how the exhibited trading behavior of these automated traders differs from normal traders' behavior.

CTET Central Teacher Eligibility Test A Complete Guide Paper-1 (For Class: I-V) with Latest Solved Paper Jan 18 2024 The Present Edition of "Comprehensive Guide TO CTET Paper -1 (CLASS 1-5)" has been carefully prepared to serve as a Practice sets and solved papers for those aspirants who are preparing for Central Teacher Eligibility Test. The subjects are arranged exactly as per the latest syllabus and pattern, to make it 100% convenient for the candidates. This book gives you an idea of the questions asked in previous years' exams, and also what type of questions you should expect in the upcoming exam. "Latest Solved Paper (2023)" is a collection of useful exam questions. Answers with explanations are available for all questions. Completely based on latest syllabus & exam pattern. Topics to be covered Child Development and Pedagogy English Language Hindi Language Mathematics Environment Study Highlights of the Book This book gives you an idea of the questions asked in previous years' exams. Answers with explanations are available for all questions. According to latest syllabus & exam pattern. Complete coverage of NEP-2020. Based on NCERT module.

Ecological Sustainability Mar 28 2022 Complex systems is a new field of science studying how parts of a system give rise to the collective behaviors of the system, and how the system interacts with its environment. This book examines the complex systems involved in environmental sustainability, and examines the technologies involved to help mitigate human impacts, such as renewable energy, desalination, carbon capture, recycling, etc. It considers the relationships and balance between environmental engineering and science, economics, and human activity, with regard to sustainability.

The Bombing War Sep 14 2023 The ultimate history of the Blitz and bombing in the Second World War, from Wolfson Prize-winning historian and author Richard Overy The use of massive fleets of bombers to kill and terrorize civilians was an aspect of the Second World War which continues to challenge the idea that Allies specifically fought a 'moral' war. For Britain, bombing became perhaps its principal contribution to the fighting as, night after night, exceptionally brave men flew over occupied Europe destroying its cities. The Bombing War radically overhauls our understanding of the War. It is the first book to examine seriously not just the most well-known parts of the campaign, but the significance of bombing on many other fronts - the German use of bombers on the Eastern Front for example (as well as much newly discovered material on the more familiar 'Blitz' on Britain), or the Allied campaigns against Italian cities. The result is the author's masterpiece - a rich, gripping, picture of the Second World War and the terrible military, technological and ethical issues that relentlessly drove all its participants into an abyss. Reviews: 'Magnificent ... must now be regarded as the standard work on the bombing war ... It is probably the most important book published on the history of the second world war this century' Richard J Evans, Guardian 'Monumental ... this is a major contribution to one of the most controversial aspects of the Second World War ... full of new detail and perspectives ... hugely impressive' James Holland, Literary Review 'This tremendous book does what the war it describes signally failed to do. With a well-thought-out strategy and precision, it delivers maximum force on its objectives ... The result is a masterpiece of the historian's art' The Times 'It is unlikely that a work of this scale, scope and merit will be surpassed' Times Higher Education 'What distinguishes Mr Overy's account of the bombing war from lesser efforts is the wealth of narrative detail and analytical rigour that he brings to bear' Economist 'Excellent ... Overy is never less than an erudite and clear-eyed guide whose research is impeccable and whose conclusions appear sensible and convincing even when they run against the established trends' Financial Times 'Hard to surpass. If you want to know how bombing worked, what it did and what it meant, this is the book to read' Times Literary Supplement About the author: Richard Overy is the author of a series of remarkable books on the Second World War and the wider disasters of the twentieth century. The Dictators: Hitler's Germany, Stalin's Russia won both the Wolfson Prize for History and the Hessell-Tiltman Prize. He is Professor of History at the University of Exeter. Penguin publishes 1939: Countdown to War, The Morbid Age, Russia's War, Interrogations, The Battle of Britain and The Dictators. He lives in London.

Aloysius Bertrand's Gaspard de la Nuit Beyond the Prose Poem May 18 2021

Aloysius Bertrand's *Gaspard de la Nuit* (1842) is a familiar title to music lovers, thanks to Ravel's piano work of the same name, and to specialists of French literature, especially those interested in Baudelaire's prose poetry. Yet until very recently the collection and its author have generally been viewed almost exclusively through the prism of their pioneering role in the development of the prose poem. By placing Bertrand back in his original context, adopting a comparative approach and engaging with recent critical work on the collection, Valentina Gosetti proposes a substantial reassessment of *Gaspard de la Nuit* and promotes a new understanding of Bertrand in his own terms, rather than those of his successors. Through his playful and ironic reinterpretation of Romantic clichés, and his overt defiance of the boundaries of poetry and beauty, Bertrand emerges as a fascinating figure in his own right. This book is one of the first full-length studies of Bertrand's work, and it will be of particular interest to specialists of the nineteenth century and of provincial literature, and to students of nineteenth-century poetry or the fantastic.

The Genesis of Missouri Oct 23 2021 When Missouri became the twenty-fourth state in the Union in 1821, it was already heir to a rich and varied historical legacy. From 1673 until the Louisiana Purchase, Europeans of different nationalities, assisted by the Africans they brought with them, competed alternately with Indians and among themselves for control of the land. But while land and resources were the target of the struggle, the region's cultural identity was being determined by the mingling and clashing of diverse cultures -- Indian, French, African, Spanish, and Anglo-American. The story of the blending of those diverse cultures in a land rich in resources and beauty is an extraordinary tale. Especially appealing to many readers will be the attention Foley gives to common Missourians, to the status of women and Blacks, and to Indian-White relations. In this account, the pioneer hunters, trappers, and traders who roamed the Ozark hills and the boatmen who traded on the Missouri and Mississippi rivers take their places beside the small coterie of prominent St. Louisans whose wealth and influence enabled them to

dominate the region politically and economically. - Back cover.

Curzon Oct 03 2022 "A Superb New Biography . . . A Tragic Story, Brilliantly Told." "Andrew Roberts, Literary Review George Nathaniel Curzon's controversial life in public service stretched from the high noon of his country's empire to the traumatized years following World War I. As viceroy of India under Queen Victoria and foreign secretary under King George V, the obsessive Lord Curzon left his unmistakable mark on the era. David Gilmour's award-winning book with a

new foreword by the author is a brilliant assessment of Curzon's character and achievements, offering a richly dramatic account of the infamous long vendettas, the turbulent friendships, and the passionate, risky love affairs that complicated and enriched his life. Born into the ruling class of what was then the world's greatest power, Curzon was a fervent believer in British imperialism who spent his life proving he was fit for the task. Often seen as arrogant and tempestuous, he was loathed as much as he was adored, his work disparaged as much as it was admired. In Gilmour's well-rounded appraisal, Curzon emerges as a complex, tragic figure, a gifted leader who saw his imperial world overshadowed at the dawn of democracy.
